NAVIGATING THE FUTURE OF FINANCE: A CRITICAL CALL FOR POLICY ACTION IN EUROPE AND BEYOND.

Forum Guide

5 - 7 MAY 2025, ZURICH

About Point Zero Forum

The fourth edition of the Point Zero Forum, Europe's definitive gathering for policy, finance, and technology, will take place from 5-7 May 2025 in Zurich, Switzerland.

Europe stands at a critical juncture with a growing urgency to redefine its regulatory stance, secure digital sovereignty, and unlock untapped opportunities - while avoiding the risk of falling behind.

Point Zero Forum convenes 2,000 policymakers, central bankers, regulators, industry leaders, and innovators to confront these issues head-on. The programme fosters collaboration and partnership between the public and private sectors through leadership dialogues, regulatory roundtables, deep-dive workshops and curated networking sessions.

Across three days, participants will explore actionable pathways that advance sustainability, inclusivity, innovation, and efficiency in the global financial system, framed by two areas of focus:

- The impact of geopolitics, macroeconomics, and trade on global policies and use cases for technology in financial services and commerce
- Europe deep dive: re-building Europe's competitive edge

GLOBAL FINANCE & TECHNOLOGY NETWORK (GFTN)

The Global Finance & Technology Network (GFTN) is a not-for-profit organisation established by the Monetary Authority of Singapore (MAS) in 2024 to harness technology and foster innovation for more efficient, resilient, and inclusive financial ecosystems through global partnerships. GFTN organises convening forums, offers advisory services on innovation ecosystems, provides access to transformative digital platforms, and invests in technology startups with the potential for growth and positive social impact through its venture fund.

Visit <https://gftn.co> to learn more about Global Finance & Technology Network (GFTN).

STATE SECRETARIAT FOR INTERNATIONAL FINANCE

The State Secretariat for International Finance represents Switzerland's interests in financial, monetary and tax matters not only vis-à-vis partner countries but also in the competent international bodies. It is committed to good framework conditions to ensure that Switzerland can have an innovative, interconnected and sustainable financial centre and business location that is among the world leaders. The State Secretariat is responsible for implementing the financial market policy of the Swiss Government.

Key Dialogues Driving Urgent Policy Action in Europe and Beyond

ON THE FORUM AND FUTUREMATTERS STAGE

"The topics that are chosen for discussion, are things that will be done in the future, and that's very important to us as policymakers because it helps us keep our eyes on what there is to come, and to prepare ourselves for that future."

Tommaso Mancini-Griffoli

Division Chief of the Payments, Currencies, and Infrastructure, International Monetary Fund

The Blueprint for The Future of Digital Money and Infrastructure

The pressure to implement effective regulation for digital assets has never been higher. While MiCA has set a precedent for stablecoin oversight, significant gaps remain in integrating tokenized assets, permissionless blockchains, and Layer 1 infrastructure into regulated finance. Point Zero Forum 2025 will tackle key priorities including:

Stablecoins: Establishing clear rules for compliance, interoperability, and their role in cross-border payments.

Digital asset infrastructure: Defining the regulatory approach for tokenization, settlement networks, and the role of decentralised finance (DeFi) in a multi-network future

Security & market integrity: Addressing risks like market abuse, privacy concerns, and cyber threats through and cross-border regulatory alignment and enforcement

ON THE FORUM AND FUTUREMATTERS STAGE

The Role of Agentic AI-Driven Intelligent Systems in Redefining Industrial Productivity

The rise of Agentic AI-driven intelligent systems is set to transform financial services by enhancing automation, decision-making, and efficiency at unprecedented levels. With the EU AI Act setting new regulatory standards, businesses must navigate compliance while unlocking AI's potential for risk management, fraud detection, and customer personalisation. Point Zero Forum 2025 will explore:

50+ Use Cases of Agentic AI in Financial Services: The forum will showcase use-cases of Agentic AI in action, from self-learning fraud detection and AI-driven investment strategies to autonomous risk management, illustrating how these intelligent systems can optimise decision-making, compliance, and customer experiences.

Importance of Safe & Responsible Adoption: With the EU AI Act and global regulations shaping AI governance, the forum will address transparency, accountability, and risk mitigation, ensuring that AI adoption in financial services is ethical, explainable, and aligned with regulatory standards.

Payments, Entrepreneurship, Wealth Management and More

Wealth Management: How will intergenerational wealth transfer, private and public market shifts, and the demand for alternatives reshape value creation in wealth management?

Payments: Will the global payments landscape converge around inter-connected multilateral networks, or will fragmentation persist across regions and technologies?

Financial Health: What innovative policies can Europe adopt to promote social and economic inclusion in the face of demographic shifts?

Startup Founders Spotlight: How are Europe's founders shaping the future – leveraging innovation, unlocking capital, and scaling solutions that drive economic resilience and global competitiveness?

PUBLIC-PRIVATE ROUNDTABLES

"The fact that the Forum is led by two public organisations gives it credibility and gravitas. The small, high-level format creates a platform for relevant stakeholders to openly discuss the future of financial services, and the opportunities and risks of the technology that will shape it."

Daniela Stoffel

Swiss State Secretary for International Finance

Held under Chatham House Rules, these closed-door roundtables bring together senior officials and industry leaders from across continents to tackle Europe's most pressing policy challenges through public-private collaboration.

Payments, Entrepreneurship, Wealth Management and More

As blockchain, digital assets, and tokenized finance reshape global markets, regulatory fragmentation remains a major barrier to innovation, stability, and cross-border interoperability. Diverging national approaches to blockchains, stablecoins, staking, and digital asset privacy create legal uncertainty, compliance burdens, and operational roadblocks – hindering adoption. With DeFi, stablecoins, and tokenized infrastructure gaining traction, the focus has shifted from whether regulation is needed to how to design frameworks that uphold trust and market integrity without stifling innovation. Roundtables at the Forum bring together policymakers, regulators, and industry leaders to explore how globally compatible rules can support financial innovation.

Strengthening Global Competitiveness in Europe

Europe's economic and technological competitiveness has long been anchored in the strength of its Single Market. But as AI, digital finance, and green technology reshape global power dynamics, Europe must move beyond market cohesion to lead in strategic technologies. In a shifting geopolitical landscape, policymakers and industry must align on investment, policy, and industrial strategy to keep Europe an innovation hub—not a regulatory bystander. The challenge is to drive innovation while managing risk, strengthen regulation without deterring capital and talent, and advance sustainability without compromising growth.

Bridging the Global Divide: Expanding Access to Emerging Technologies

Digital transformation is reshaping economic opportunities, financial systems, and sustainability efforts. Yet billions particularly in the Global South, lack access to essential digital infrastructure, financial services, and next-generation technologies. Without urgent action, this divide could deepen inequality, limit participation in the digital economy, and hinder progress on climate resilience, financial inclusion, and sustainable development. The challenge lies in ensuring access to digital infrastructure while shaping ethical, inclusive, and regionally adaptable technology policies. This discussion will explore scalable solutions focusing on how AI, fintech, and digital payments can drive inclusive, equitable, and sustainable growth.

Regulators & Innovators: Public-Private Projects Driving Financial Transformation

Accelerating the development, scaling and adoption of industry pilots, financial regulatory sandboxes and innovation hubs.

Spotlighting industry projects spearheaded by the public sector, such as those by the Monetary Authority of Singapore, the Swiss National Bank, the BIS Innovation Hub, FINMA, and the Swiss Secretariat for International Finance.

Blockchain and Tokenization in Financial Markets: A Central Banking Perspective

This keynote explores the evolving landscape of money through the lens of blockchain and tokenisation, from a central banking perspective. Andrea M Maechler, Deputy General Manager at the Bank for International Settlements (BIS), will examine how tokenised forms of central bank money, commercial bank deposits, and stablecoins are reshaping financial markets, highlighting the opportunities – such as faster settlement, increased transparency, and financial inclusion – as well as the challenges, such as scalability and singleness of money.

Speaker:

Andrea M Maechler, Deputy General Manager, Bank for International Settlements (BIS)

Tue, May 6
11:20am - 11:40am

Hall A (Level 2)

Financial Innovation and Regulation in Switzerland – Keynote by Stefan Walter, CEO of FINMA

Sustainable financial innovation thrives where clear rules and strong oversight create trust and stability. In Switzerland, sound regulatory and supervisory frameworks has become a key driver of fintech growth and economic resilience. By offering transparent guidance and setting clear expectations, the Swiss Financial Market Supervisory Authority (FINMA) plays a pivotal role in fostering a thriving fintech environment. This keynote by Stefan Walter, CEO of FINMA will explore how Switzerland's approach balances innovation with prudence.

Speaker:

Stefan Walter, Chief Executive Officer, Swiss Financial Market Supervisory Authority (FINMA)

Tue, May 6
11:40am - 12:20pm

Hall A (Level 2)

The Innovation Blueprint: Unlocking Global Competitiveness in a Changing World

In this panel dialogue, experts will discuss challenges in fostering AI innovation and the steps needed to maintain a competitive edge as global competition in the realm of AI research, development, and adoption heats up.

Speakers:

Catrin Hinkel, Chief Executive Officer, Microsoft Switzerland, Microsoft, Daniela Stoffel, State Secretary, State Secretariat for International Finance (SIF), Dr. Jochen Papenbrock, EMEA Head of Financial Technology, NVIDIA, Dr. Chris Purves, Co-Head of Group Emerging Technology, UBS

Moderator:

Tue, May 6
1:00pm - 1:30pm

Hall A (Level 2)

Global State of Digital Asset Regulations: Regulatory Harmonisation on Digital Assets

As global geopolitical tensions rise, progress towards regulatory harmonisation on digital assets has been increasingly imperilled, with divergent attitudes adopted across the United States, EU, and Asia.

This panel brings together a much-needed conversation between industry leaders, central bankers and regulators on the global state of regulatory approaches towards stablecoins, digital assets, and crypto-currencies, how these different approaches will affect the global digital assets and payments ecosystem, and the role of international cooperation in developing cohesive regulatory frameworks.

Speakers:

Prof. Chris Brummer, Chief Executive Officer, Bluprynt and The Fintech Foundation, Georgetown University Law Center, Peter Kerstens, Advisor, DG FISMA, European Commission, Sarah Breedon, Deputy Governor, Bank of England

Moderator:

Elise Soucie Watts, Executive Director, Global Digital Finance

Tue, May 6
1:30pm - 1:50pm

Hall A (Level 2)

Bridging Worlds: Crypto and the Future of Finance

Don't miss this conversation between Pat Patel, Executive Director at GFTN, and Bybit CEO Ben Zhou as he shares his entrepreneurial journey and the challenges of building one of the fastest growing crypto exchanges.

In the wake of ByBit's high-profile security breach, Zhou will provide unprecedented insights into crisis management. This session will conclude with a peek into Bybit's expansion and their AI integration strategy.

Speaker:

Ben Zhou, Co-founder & Chief Executive Officer, Bybit

Moderator:

Pat Patel, Executive Director, Global Finance & Technology Network (GFTN)

Tue, May 6
1:50pm - 2:30pm

Hall A (Level 2)

The Future of Digital Assets Infrastructure: Private, Public... Borderless?

From private blockchains to public blockchain networks which are permissioned, these enable broad participation. The digital assets network space is evolving rapidly – and new models are emerging, such as open and interoperable shared networks that promise to strike their own balance between transparency, participation, and control.

This panel session will gather leaders in the blockchain space to discuss the future of digital assets networks and which future models will strike the optimum balance.

Speakers:

David Rutter, Chief Executive Officer, R3, Holger Neuhaus, Head of Market Innovation and Integration Division, European Central Bank, Lily Liu, President, Solana Foundation, Pradyumna Agrawal, Managing Director, Investment, Temasek, Rene Michau, Global Head, Digital Assets, Standard Chartered

Moderator:

Alan Lim, Director & Head, Financial Infrastructure and Artificial Intelligence Office, Monetary Authority of Singapore

Tue, May 6
2:30pm - 3:10pm

Hall A (Level 2)

The Institutional Digital Money Dialogue

Institutional players are increasingly adopting digital assets, including private sector stablecoins, central bank digital currencies (CBDCs), tokenized real-world assets, and tokenized deposits, as part of their financial infrastructure. With 2025 poised to be the breakout year for digital money, this session brings together financial institutions, regulators, and leaders in the digital assets space to discuss:

- The emerging use-cases and commercial opportunities for on-chain assets, such as improved cross-border transactions and programmable money applications
- The risks institutions will have to navigate when managing their digital money assets, including financial volatility, cyber risks, and compliance concerns
- Integrated approaches to managing assets across the traditional finance and decentralised finance landscape

Speakers:

Audrey Metzger, Director of Innovation and Financial Market Infrastructures, Banque de France, Chan Yam Ki, Vice President, Asia Pacific, Circle, Mathias Imbach, Co-founder & Group Chief Executive Officer, Sygnum, Walter Hesser, Head of Strategy, Paxos

Moderator:

Emma Joyce, Chief Revenue Officer, Global Blockchain Business Council (GBBC)

Tue, May 6
3:10pm - 3:50pm

Hall A (Level 2)

The Future of Cross-Border Payments and Settlements

From stablecoins to the modernisation of correspondent banking and the emergence of regional payments blocs, cross-border payments are at a tipping point, where new alliances and technologies promise to change the game. This session will gather the biggest players in the payments industry to provide their perspectives on the state of cross-border payments, and where the greatest opportunities lie in the coming years.

Speakers:

Alan Marquard, Executive Vice President, Commercial & New Payment Flows, Mastercard, Doug Feagin, President, Ant International, Karmela Holtgreve, Deputy Head of the BIS Innovation Hub & Head of Operations, BIS Innovation Hub, Nick Kerigan, Managing Director, Head of Innovation, Swift, Tommaso Mancini-Griffoli, Division Chief of the Payments, Currencies, and Infrastructure Division, International Monetary Fund

Moderator:

Foo Chek-Tchung, Executive Director, Public Policy, Global Finance & Technology Network (GFTN)

Tue, May 6
3:50pm - 4:30pm

Hall A (Level 2)

The Economics of Payments: Rethinking Business Models in a Web3 World

As digital assets, real-time payments, and AI-driven financial services reshape the industry, how are business models in payments evolving? This session explores the shift in economics, the role of emerging technologies, and the impact of regulatory frameworks on the future of payments.

Speakers:

Adeeb Ahamed, Managing Director, LuLu Financial Holdings, Laust Bertelsen, Chief Executive Officer, Banking Circle SA, Liz Oakes, Independent Advisor, Prajit Nanu, Founder & Chief Executive Officer, Nium

Moderator:

Pat Patel, Executive Director, Global Finance & Technology Network (GFTN)

Private Capital's Growing Influence: Reshaping Wealth and Asset Management

With companies staying private longer and investor appetite for alternatives rising, private capital is transforming wealth and asset management. This panel explores how firms are adapting, the evolving investor landscape, and the implications for portfolio strategies.

Speakers:

Caesar Sengupta, Co-Founder & Chief Executive Officer, Arta Finance, Georgios Leontaris, Managing Director, Chief Investment Officer - Switzerland and EMEA, HSBC Global Private Banking and Wealth, HSBC, Marco Bizzozero, Head of International & Member of the Executive Committee, iCapital

Moderator:

Manisha Tank, Broadcaster & TV Presenter

Tue, May 6
5:00pm - 5:40pm

Hall A (Level 2)

Regulation and Security in a Tokenized World

The rise of tokenization has introduced significant challenges around security and regulatory oversight, with increasingly divergent attitudes across jurisdictions. As digital assets are increasingly fractionalized and moved across borders, regulatory authorities and institutions must grapple with how to monitor, tax, and secure tokenized assets.

What role do governments and institutions play in ensuring that tokenization is safe from misuse, fraud, or money laundering, and how will international regulatory cooperation or divergence impact the growth of tokenized markets? The session will examine regulatory responses and the potential for cross-border legal harmonisation or the lack thereof.

Speakers:

Eleanor Hughes, General Counsel, Binance, Faryar Shirzad, Chief Policy Officer, Coinbase, Katherine Minarik, Chief Legal Officer, Uniswap Labs, Stu Alderoty, Chief Legal Officer, Ripple

Moderator:

Ari Redbord, Global Head of Policy and Government Affairs, TRM Labs

FutureMatters Stage

Tue, May 6
11:50am - 12:05pm

Hall C (Level 2)

Welcome to FutureMatters Stage

The FutureMatters Stage is where pivotal discussions shape the future of key industry verticals. Here, the future isn't speculated - it's architected. Over two days, leaders will reimagine the frameworks powering intelligent systems, digital money, and Europe's innovation landscape. From AI-enabled teammates and programmable finance to the policy shifts required to unlock startup growth, this stage brings together the minds building what's next. Because the future matters, and so do the decisions we make today to shape it.

Speaker:

Francesca Aliverti, Head of Africa & Middle East, Global Finance & Technology Network (GFTN)

Tue, May 6
12:05pm - 12:35pm

Hall C (Level 2)

Future of Capital Markets in an Age of Rapid Transformation

The advent of distributed ledger technology (DLT) is transforming capital markets across the board, from enhancing liquidity across asset classes to enabling instant settlements and powering smart contracts, while artificial intelligence (AI) analytics promise to provide better insights into market risks and opportunities.

Traditional institutions, alongside fintech players, are increasingly playing a role in this transformation, leveraging these technologies to develop innovative solutions that can improve financial processes and identify new opportunities for institutional investors.

This session will gather leaders from exchanges, banks, and digital assets players across the US, Europe and Middle East, to share how technology is reshaping the landscape of capital markets; the emerging opportunities that new technologies and approaches are unlocking within capital markets; and their long-term projections for what the future holds for capital markets.

Speakers:

Marni McManus, Citi Country Officer and Banking Head, Switzerland, Monaco & Liechtenstein, Kai Yang Lee, Co-Founder & Chief Executive Officer, DMZ Finance, David Newns, Head, SIX Digital Exchange, Dushyant D Shahrawat, Managing Director, Rosenblatt Securities

Moderator:

Stefan Grasmann, Chief of Blockchain, Zühlke

The Future of Work: Agentic AI Teammates

Agentic AI promises to transform AI from a tool to a teammate. More than just automating tasks, AI integrates seamlessly into team dynamic—enhancing collaboration, accelerating decision-making, and amplifying collective intelligence.

This interactive demo by Franck Pivert, Co-Founder of Swiss 6022, shines a spotlight on the future of AI-driven collaborative work, with insights into how specialised AI agents are already transforming the world of InsurTech.

Don't settle for AI that simply executes—embrace AI that collaborates.

Speaker:

	<p>Franck Pivert, Co-Founder, swiss6022</p>
<p>Tue, May 6 12:50pm - 1:30pm</p> <p>Hall C (Level 2)</p>	<h2>Industry-Academia Public Sector Partnerships: Key to FinTech Innovation and Talent</h2> <p>Technological breakthroughs are advancing at an unprecedented pace, driven by the rapid maturation of university-led research and industry partnerships. As fintech innovation accelerates in the areas of AI, digital assets, and digital transformation, collaborations between universities and industry players—combined with the development of real-world use cases—have become essential in empowering next-generation talent, creating new commercial solutions, and enhancing innovation capabilities within financial services. These efforts not only enhance the efficiency of humanitarian aid but also have the potential to address the sector's most pressing and underfunded challenges.</p> <p>This panel brings together leaders from academia, banking, and corporate treasury in the humanitarian sector to explore how industry-research collaboration can drive technological transformation, accelerate fintech innovation, and provide real-world experiences to the innovators of tomorrow.</p> <p>Speakers:</p> <p>Carmen Hett, Corporate Treasurer, United Nations High Commissioner for Refugees (UNHCR), Prof. Lam Khin Yong, Vice President (Industry), Nanyang Technological University, Singapore, Prof. Michael Otmar Hengartner, President, ETH Board</p> <p>Moderator:</p> <p>Preeti Dawra, Chief Communications Officer, Global Finance & Technology Network (GFTN)</p>
<p>Tue, May 6 1:30pm - 2:00pm</p> <p>Hall C (Level 2)</p>	<h2>Data and Innovation in Financial Services: Next Stage of AI, Payments and Banking</h2> <p>Data is the foundation of next-gen innovation - from AI breakthroughs to climate solutions and frictionless financial services. This panel explores how data accessibility, governance, and cross-sector collaboration are shaping the future of AI, sustainable finance, and digital payments.</p> <p>Speakers:</p> <p>Gary Liu, Co-founder & Chief Executive Officer, Terminal 3, Dr. Kati Suominen, Founder & Chief Executive Officer, Nextrade Group, Max Flötotto, Senior Partner, McKinsey & Company</p> <p>Moderator:</p> <p>Nitin Mathur, Senior Account Director, Customer Success, Global Finance & Technology Network (GFTN)</p>
<p>Tue, May 6 2:00pm - 2:30pm</p> <p>Hall C (Level 2)</p>	<h2>Laying the Foundation: Digital Infrastructure for AI-driven Decarbonisation in Global Value Chains</h2> <p>Global industry organisations are increasingly scaling the use of data and AI to enhance sustainability and resilience across their global value chains. While there is untapped potential to harness data from the built environment and manufacturing sector, governance and interoperability frameworks are key to scaling impact without undermining trust, control and economic incentives.</p> <p>We are witnessing a shift in carbon accounting for Scope 3 emissions from corporate-level reporting to more granular, product-level carbon footprint. In parallel, companies are likely to move from enterprise-wide data exchanges to more</p>

	<p>precise, machine-level data flows. What implications and opportunities does this present for how we build and govern digital infrastructure?</p> <p>Participants on this panel will define the challenges industry faces and outline the contours of emerging partnerships and initiatives to enhance data quality, trust and scalability needed for a future world of AI-driven decision making and compliance.</p> <p>Speakers:</p> <p>Dominic Waughray, Executive Vice President, WBCSD, Richard Cockle, Head of GSMA Foundry & Connected Industries, GSMA, Siddharth Shetty, Co-Creator, Finternet</p> <p>Moderator:</p> <p>Ivan Mortimer-Schutts, Global Head of vLEI, Global Legal Entity Identifier Foundation (GLEIF)</p>
<p>Tue, May 6 2:30pm - 3:00pm</p> <p>Hall C (Level 2)</p>	<h2>The SwissHacks Showcase: Demos from 2025 Finalists</h2> <p>What happens when Switzerland's most ambitious young minds get 48 hours, a serious tech challenge, and just enough caffeine? Magic—or at least some pretty impressive prototypes.</p> <p>In this session, the finalists from SwissHacks 2025, Switzerland's premier government-backed hackathon, take the stage to pitch what they built and why it matters. From Stablecoins and Agentic AI in Banking to Machine Learning in Client Onboarding, these solutions address real financial sector challenges posed by industry giants like Julius Bär, Raiffeisen, Ripple, ArchRe, and Innosuisse.</p> <p>Organised by the Swiss Financial Innovation Desk (FIND) and powered by Tenity, SwissHacks is where the next wave of fintech ideas gets a running start.</p> <p>Come for the fresh tech, stay for the fast pitches, and maybe leave with a new favorite team to watch. Moderated by renowned TV journalist Tanya König, this session brings bold ideas and fresh energy to the FutureMatters stage.</p> <p>Moderators:</p> <p>Eva Selamlar, Head, Swiss Financial Innovation Desk, Tanya König, Journalist & Moderator, finance.swiss</p>
<p>Tue, May 6 3:05pm - 3:10pm</p> <p>Hall C (Level 2)</p>	<h2>Welcome to The Founders Peak™</h2> <p>Europe, It's Time to Bet on Startup Founders!</p> <p>The startup landscape in Europe is at a pivotal moment. The region's regulatory complexities and fragmented markets have made it difficult to attract capital, affecting its ability to compete as an innovator on a global scale. As the world transitions from digital to now AI-driven and onwards to a quantum economy, Europe must act decisively and speedily to recalibrate its startup ecosystem – or risk falling behind significantly.</p> <p>Returning for its second edition at PZF 2025, The Founders Peak will bring exceptional startup founders who will each share their most critical lessons for building, scaling, and sustaining growth inside and from Europe. So expect raw, unfiltered stories of grit, audacity, and lived experiences that will guide European entrepreneurs on how to navigate the realities of entrepreneurship better.</p> <p>Over three transformative hours, we'll explore what it truly takes to build a thriving, globally competitive European startup ecosystem. In addition to as many as 10 individual talks from exceptional founders, over a new purpose-built dialogue series called Startup Meets Policy Dialogue, we are setting a new standard for a dialogue on startup-driven</p>

policy action and economic reinvention.

The Startup Meets Policy Dialogue: Europe's Capital Crunch - Fixing the Funding Gap for Startups

Although European investors may be seen to be backing local growth-stage success stories, many later-stage companies often turn to foreign investors. If Europe is to reduce its reliance on growth stage foreign capital to a level similar to other mature ecosystems such as the US or China which self-funds to the tune of 80%, European investors would need to step up significantly as Europe's startups are still gasping for capital. It's time for bold action: harmonized regulations, tax incentives for investors, and maybe a pan-European startup visa?

Join us to debate how Europe can unleash its entrepreneurial potential and close the funding gap before it's too late.

Speakers:

Prajit Nanu, Founder & Chief Executive Officer, Nium, Hon. Sunil Sabharwal, Operating Partner, Blackstone Growth Equity, Gerry Cross, Director, Capital Markets and Funds, Central Bank of Ireland, Shane James Chesson, Vice Chair, Singapore Venture and Private Capital Association (SVCA)

The Startup Meets Policy Dialogue: Rethinking Policymaking to Propel Startup Growth in Europe

European startups continue to face fragmented, unclear and overlapping regulations, bureaucratic hurdles, and uneven market access when scaling beyond their home countries. This session will bring together startup founders and policymakers to address key barriers and discuss solutions for a more integrated European startup ecosystem.

- Are European startups at a disadvantage compared to the US and Asia?
- How can policymakers help startups scale cross-border without excessive compliance costs?
- Is it time for the EU to rethink its traditional regulations-first stance and begin to take informed steps towards becoming innovation-first?

Speakers:

Audrey Metzger, Director of Innovation and Financial Market Infrastructures, Banque de France, Eva Selamlar, Head, Swiss Financial Innovation Desk, Ivan de Lastours, Blockchain/Crypto Lead, BPI France, Nikos Andrikogiannopoulos, Founder & Chief Executive Officer, Metrika, Gert Sylvest, Co-founder, Tradeshift, Head of Strategy and Partnerships, Semfi

Roundtable Room 1 (Level 2)

Permissionless blockchain in financial services

The objective of this roundtable is to bring together regulators, financial institutions, and technology leaders, to advance industry thinking on the use of permissionless blockchain in financial services.

Key outcomes of this roundtable:

1. To identify why permissionless blockchains have not made significant inroads with industry incumbents, exploring whether the hurdles are primarily commercial, regulatory, reputational, or a lack of expertise
2. To explore how financial services can be provided on transparent, permissionless and immutable blockchain while advancing the goal of consumer protection
3. To assess the challenge posed by the fragmented landscape of blockchain infrastructure and brainstorm potential solutions to enable greater interoperability

Speakers:

Anton Bukov, Co-founder, 1inch, John O'Neill, HSBC Group Head of Digital Assets & Currencies, HSBC, Khai Uy Pham, Cross-border Wholesale CBDC Projects Leader, Banque de France, Liang Li, Chief Executive Officer, Hashkey OTC, Matthew Osborne, Europe Policy Director, Ripple, Dr. Neha Narula, Director, Digital Currency Initiative, MIT, Rehan Ahmed, Chief Executive Officer, Marketnode, Sonja Davidovic, Senior Digital Expert, International Monetary Fund, Varun Paul, Senior Director, Financial Markets, Fireblocks, Victor Jung, Global Head of Digital Assets, Hamilton Lane

Moderator:

Pradyumna Agrawal, Managing Director, Investment, Temasek

Tue, May 6
10:00am - 11:30am

Roundtable Room 2 (Level 2)

AI governance in a competitive world: Balancing innovation, regulation and ethics

The EU AI Act with its pioneering risk-based approach, sets a precedent for regulating AI by categorising applications based on their potential risks to individuals and society. By establishing clear guidelines for high-risk AI systems whilst imposing outright bans on some risks like social scoring, the Act seeks to balance ethics with AI development. However, stringent regulations risk presents some trade-offs, like having high compliance burdens for SMEs and startups, which can stifle innovation, pushing talent and investment to more business-friendly AI regions, and limiting Europe's AI leadership.

1. Navigating the EU AI Act: How can regulators ensure the EU remains an AI leader while implementing risk-tiered regulations that prevent harm without stifling technological progress?
2. Competitiveness vs Overregulation: With global AI competition intensifying, what policy strategies can ensure that AI startups and enterprises thrive without unnecessary compliance burdens?
3. Ethical AI as a competitive advantage: Can responsible AI practices become a strategic differentiator for European companies, positioning them as global leaders in trustworthy, human-centric AI deployment?

Speakers:

Dr. Christoph Strnadl, Chief Technology Officer, Gaia-X AISBL, Georgina Jarratt, Managing Director, Head of FinTech & Digitalisation, International Capital Market Association, Gregor Kaelin, Head of Financial Services, Google Cloud Switzerland, Dr. Henrike Mueller, Manager, Financial Conduct Authority, Dr. Jose M. de Barreda, Principal Digital Finance & Fintech Advisor, IFC, Kenneth Gay, Chief FinTech Officer, Monetary Authority of Singapore, Linardo Martinčević, Advisor in the Governor's Office, Croatian National Bank, Michael Jefferson, Head of Financial Services

Market abuse in crypto markets

As cryptocurrencies continue to reshape the financial landscape, the rise of decentralized finance and crypto trading platforms has introduced new opportunities and new challenges when it comes to maintaining market integrity. In recent years, the cryptocurrency space has witnessed a surge in trading activity, but with this growth comes the risk of market manipulation, insider trading, pump-and-dump schemes, and other forms of market abuse. These practices can undermine trust in the market.

At this roundtable, we will be exploring the complexities of market abuse in cryptocurrency trading and regulatory frameworks that are evolving to address these challenges.

Speakers:

Prof. Chris Brummer, Chief Executive Officer, Bluprynt and The Fintech Foundation, Georgetown University Law Center, Prof. Christoph Kreiterling, Professor for Technology Impact & Sustainability, Hochschule Trier (Trier University of Applied Sciences), Isabella Chase, Head of Policy, EMEA, TRM Labs, Rupert Harrison, Manager, Cryptoasset Policy, Financial Conduct Authority (FCA), Ryosuke Ushida, Chief Fintech Officer, Financial Services Agency of Japan, Sandrine Chabbey, Policy Advisor, State Secretariat for International Finance (SIF)

Roundtable Room 1 (Level 2)

Shaping the future of DeFi: Global standards, security and innovation in public blockchain infrastructure

IOSCO's 2023 policy recommendations on DeFi emphasise the principle of "same activity, same risk, same regulation" to ensure that DeFi arrangements are held to the same standards as traditional financial systems. Against the backdrop of tightening regulations like MiCA and DORA in Europe and growing geopolitical tensions over digital sovereignty, regulators worldwide grapple with the challenge of applying IOSCO's principle to DeFi. How can innovation thrive while addressing critical issues of security, interoperability, and cross-border compliance?

This roundtable brings together regulators, blockchain architects, and financial innovators to explore the evolving role of DeFi and public blockchain infrastructure in global markets.

Key topics include:

1. Global standards and geopolitics
2. Tech neutrality and security in DeFi
3. DeFi and tokenisation: Reshaping capital markets
4. The future of staking and investor protection

Observers can refer to these pre-reading reference materials to prepare for the roundtable:

- BIS: Cryptocurrencies and decentralised finance: functions and financial stability implications: Cryptocurrencies and decentralised finance: functions and financial stability implications
- IOSCO Final Report on DeFi Policy Recommendations (2023): FR14/23 Final Report with Policy Recommendations for Decentralized Finance (DeFi)
- OECD Report: "Why Decentralised Finance (DeFi) Matters and the Policy Implications:
<https://doi.org/10.1787/109084ae-en>

Tue, May 6
12:00pm - 1:30pm

Roundtable Room 3 (Level
3)

Trust in AI: Will consumer protection and data privacy regulations hinder or enable AI adoption in the Global South?

As AI adoption accelerates globally, governments in the global south are shaping data regulations to govern its development and use. The EU and GDPR have set global benchmarks for responsible AI governance, but do these frameworks guide or constrain adoption of AI in the Global South? Should stringent AI governance frameworks be replicated, adapted or reimaged for emerging markets? How do these policies impact SMEs, startups and institutions broadly, given compliance costs, regulatory capacity and skills gap.

1. How can policymakers and businesses in the Global South balance AI expansion with consumer rights, economic growth, and local challenges such as digital literacy and limited AI infrastructure?
2. Can a risk-based approach to AI regulation ensure ethical deployment without stifling local innovation?
3. SMEs are key to job creation. How can governments introduce scaled compliance to encourage SME growth whilst balancing accountability
4. Are regional data sharing agreements the way to go, balancing sovereignty of data and facilitating regional trade and growth

This roundtable serves as the first part of a discussion that will be followed up at the Global SME Finance Forum 2025 in South Africa. Part 2 can consider including the practical voice of SMEs and their challenges. Presenters will also be invited to participate in Part 2 in South Africa.

Speakers:

Anum Malkani, Head of Public Policy for Financial Services, APAC, AWS, Bertrand Ndengeyingoma, Chief Technology and Innovation Officer, National Bank of Rwanda, Francesca Brown, Director of Policy, Women's World Banking, Hannah Anderson, Policy Advisor, Institute of International Finance (IIF), Dr. Joseph Breeden, Chief Executive Officer, Deep Future Analytics, Marcel Beer Kremnitzer, Policy Specialist, Banco Central do Brasil

Architecting the future of cross-border payments – An Agora roundtable

This roundtable gathers experts from key organizations involved in shaping the future of wholesale cross-border payments. In this early phase—focused on collecting diverse requirements, shaping the technological fundamentals and establishing a multi-stakeholder project organisation—participants will share initial lessons learned and discuss anticipated challenges for future phases of Project Agora. The discussion is designed to foster robust debate and exchange innovative ideas from various perspectives.

It aims to discuss the driving forces and motivation behind project Agora and synthesise early insights around key coordination, technical, and operational challenges in building a resilient next-generation tokenised cross-border payment platform. Further the roundtable aims to share and ideate on possible strategies to resolve identified challenges and consider emerging technology trends in future phases of the project.

The discussion will produce a report of synthesised insights, current challenges and proposed solutions and strategies, to effectively and efficiently enable the future of cross-border payments with future phases of Project Agora.

Speakers:

Audrey Metzger, Director of Innovation and Financial Market Infrastructures, Banque de France, Conan French, Director, Digital Finance, Institute of International Finance (IIF), Dr. Efthimia Kefalea, Head of Derivatives Clearing Market Development, Eurex Clearing AG, Gottfried Leibbrandt, Member of the Board, CLS Group, Jennifer Fowler, Member of the Secretariat, Financial Stability Board, Marco Kessler, Head of Digital Assets, SDX, Nick Kerigan, Managing Director, Head of Innovation, Swift, Per von Zelowitz, Director, New York Innovation Center, Federal Reserve Bank of New York, Rajeev Sambyal, Managing Director, Digital Assets, BNY, Sung-guan Yun, Director General of Office of Digital Currency Research, Bank of Korea, Zou Xiaonan, Head of Digital Assets, Group Treasury, UBS

Roundtable Room 1 (Level
2)

Harnessing AI and blockchain to combat financial crime

As technology advances, so do the tactics of illicit actors. Criminal networks are leveraging artificial intelligence (AI) and blockchain to launder money, conduct fraud, and evade detection at unprecedented speed and scale. At the same time, these same technologies hold the key to turning the tide—enhancing transparency, accelerating detection, and strengthening financial crime controls.

This roundtable will explore the dual-use nature of AI and blockchain in financial crime, unpacking key questions such as:

- How criminals are weaponising AI for money laundering, fraud, and deepfake-driven scams—and how financial institutions can counteract these threats using AI-powered defenses
- How AI's predictive capabilities and blockchain's transparency can work together to enhance compliance, improve regulatory oversight, and disrupt criminal networks

- Emerging challenges, including AI bias, privacy risks, and the arms race between law enforcement and bad actors leveraging next-gen technology

By convening policymakers, financial industry leaders, and technology experts, this discussion will examine how we can turn these emerging technologies from a double-edged sword into a powerful force for financial security and integrity.

Observers can refer to these pre-reading reference materials to prepare for the roundtable:

Restoring confidence: Rebuilding trust in carbon markets for a sustainable future

As the global push for sustainability intensifies, carbon markets play a crucial role in achieving climate goals. However, trust in these markets has been shaken due to concerns over transparency, accountability, and effectiveness. In this insightful roundtable discussion, six diverse organizations – representing associations, startups, corporates, and consulting companies – will come together to explore how trust can be restored and strengthened in the carbon markets. Each participant will share their unique perspective on the evolving landscape, key challenges, and opportunities. They will also highlight the concrete steps their organizations are taking to rebuild confidence, ensuring that carbon markets contribute to a truly sustainable and impactful future for all.

Speakers:

Barbara Truyers, VP Finance & Professional Services, Climeworks, Caroline Wehrle, Senior Policy Advisor Sustainable Finance, State Secretariat for International Finance (SIF), Erica Vertefeuille, Managing Director, Terra Natural Capital, Eva van der Want, Senior Business Development Manager Carbon Markets, SIX, Fred Fournier, Chief Executive Officer, Open Forest Protocol, Gerrit Sindermann, President, Green Fintech Network & Executive Director, Green Digital Finance Alliance (GDFA), Liling Koh, Head of Partnerships & Communications, Xilva, Marco Magini, Executive Director of Projects & Portfolio, South Pole

The Ultimate Black Swan: Preserving financial stability through decentralised infrastructure in a post-nuclear conflict

In moments where diplomacy fails and economic instruments lose traction, the unthinkable—the outbreak of global conflict—must be considered as strategic foresight in a public multi-stakeholder debate. The possibility of systemic financial collapse triggered by a combination of escalating trade wars, sovereign debt spirals, currency devaluation, and geopolitical proxy war hotspots spiralling into a global military conflict is no longer remote. The question is no longer if but when we must confront cascading failure scenarios—and how well our financial systems are prepared to endure and rebuild.

In March 2025, the European Union issued formal guidance for its 450 million citizens to prepare for wartime conditions, following earlier warnings from NATO leadership. These developments are not isolated; they reflect a deeper pattern: deteriorating global governance and security, disrupted trade and supply chains, politicised capital flows, technological disruption, and military escalation across multiple regions.

Should a full-spectrum crisis occur—reaching as far as market seizures, infrastructure compromise, or even nuclear deployment—what financial infrastructure, if any, remains viable? And more critically: what systems can support recovery?

This roundtable addresses the serious, strategic challenge of financial survivability. We ask:

- Is our global financial infrastructure resilient enough to withstand systemic rupture?
- What are the weak spots and central points of failure in the current financial systems?
- Can decentralised protocols—once theorised by Paul Baran to survive Cold War devastation—serve as functional fallback systems today?
- If decentralised systems—public, permissionless, and antifragile by design—are viable tools for a post-collapse economic recovery capable of preserving financial continuity, how can we strategically integrate them with the current financial infrastructure today?

This discussion brings together economists, technologists, policymakers, and financial strategists across public and private sectors to interrogate the real-world feasibility of decentralised financial lifeboats—not as ideological and academic alternatives to the system, but as critical infrastructure in scenarios where the system itself ceases to function.

Speakers:

Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore, Antonio Alvarez Lorenzo, Chief Compliance Officer, Crypto.com, Bryan Zhang, Co-founder & Executive Director of Cambridge Centre for Alternative Finance (CCAF), University of Cambridge, Candace Kelly, Chief Legal & Policy Officer, Stellar Development Foundation, Carmen Hett, Corporate Treasurer, United Nations High Commissioner for Refugees (UNHCR), Daniel Eidan, Advisor, BIS Innovation Hub, Paolo Tasca, Executive Chairman, Exponential Science, Prof. Ross Buckley, Scientia Professor, UNSW Sydney, Shane James Chesson, Vice Chair, Singapore Venture and Private Capital Association (SVCA)

Moderator:

Dr. Andrzej Gwizdalski, Senior Partner, Global Finance & Technology Network (GFTN); Co-founder & Chairman, UWA, Western Australia Web3 Association

Tue, May 6
4:00pm - 5:30pm

Roundtable Room 1 (Level
2)

Re-thinking payment in a blockchain and tokenized world

The worlds of DeFi and TradFi are converging, and there is no better example than payments on blockchains, with stablecoin issuers pursuing bank charters, and banks embracing blockchain and tokenization. This confluence presents an opportunity to implement best practices from both, yet carries a risk of importing complexities from each.

This roundtable convenes experts from DeFi and TradFi to share learnings and discuss key topics that can lead to stronger alignment and collaboration as we work towards common objectives:

1. Standards and Interoperability: Connectivity is critical to unlocking the ecosystem benefits of blockchain, and standards is key to enabling connectivity. What is the right approach for standards with payment tokens? Is the approach of broad standards developed with industry-level consensus (like with ISO20022) viable in a decentralized world? How can we collaborate and drive convergence on token standards?
2. Detecting and Responding to Financial Crimes: Payment tokens on blockchain introduces greater transparency, real-time traceability, and enhanced enforcement capabilities, which could enable regulators and financial institutions to detect, monitor, and act on illicit activity more efficiently than ever before. What is the current state of play? What are the existing tools available, how well do they perform and what are the limitations?
3. Payment Controls: TradFi and DeFi take different approach towards payment controls, which has often been framed as efficiency versus safety. Is this still an appropriate characterization? Can we enable efficiency without compromising safety? How are payment controls applied currently by TradFi and DeFi players? How could regulations further evolve to account for these new techniques?

Speakers:

Amine Lahrichi, Head of Financial Markets, Open Zeppelin, Angela Ang, Head of Policy and Strategic Partnerships, APAC, TRM Labs, Antonio Alvarez Lorenzo, Chief Compliance Officer, Crypto.com, Chan Yam Ki, Vice President, Asia Pacific, Circle, Emma Joyce, Chief Revenue Officer, Global Blockchain Business Council (GBBC), Karen Ottoni, Senior Director of Ecosystem and Strategic Initiatives, Linux Foundation Decentralized Trust, Mike Truter, Director, Regional Head of Industry Engagement (EMEA), Swift, Milind Sanghavi, Founder & Chief Executive Officer, XWeave.io, Patrick Green, Head of AML, Banking Circle, Toh Wee Kee, Global Head of Business Architecture for Digital Payments, Kinexys by J.P. Morgan, Varun Paul, Senior Director, Financial Markets, Fireblocks

Moderator:

Dr. Neha Narula, Director, Digital Currency Initiative, MIT

Tue, May 6
4:00pm - 5:30pm

Roundtable Room 3 (Level 3)

The Europe opportunity: Enhancing digital sovereignty in climate action

Former European Central Bank President Mario Draghi's report on European Union competitiveness highlighted the need for 800 billion euros of investment each year (or up to 5% GDP) to keep pace economically with rivals. The EU is an important power-broker in climate diplomacy and financing, in aggregating individual efforts of its member countries and its partners for mobilising climate financing and action efforts.

As Europe accelerates its twin green and digital transitions, this session explores how the continent can leverage its strengths to become a global leader in sustainable technology. We'll examine the intersection of digital innovation and climate action, discussing strategies to enhance Europe's technological autonomy while driving forward its ambitious environmental agenda.

1. Integration of digital and environmental agendas through the European Green Deal
2. The need to leverage common European funds as opposed to national investments
3. Fostering collaborative ecosystems to enhance competitiveness in greentech
4. Balancing strict environmental regulations to meet ambitious climate goals, with policies that are also conducive to technological advancement to foster innovation and ensure competitiveness (e.g. Clean Industrial Deal with regulations to make greener products mandatory, drive international collaboration)

	<p>Speakers:</p> <p>Craig Cameron, Senior Vice President, Head of Global Equity Sustainability, Franklin Templeton, Jose Manuel Marques Seviliano, Director Financial Innovation and Market Infrastructures, Bank of Spain, Simonas Krėpšta, Board Member, Bank of Lithuania, Simone Utermarck, Senior Director, Sustainable Finance, International Capital Market Association, Vickram Tikkoo, Global Head of Sustainable Finance Data (ESG), Bloomberg LP</p> <p>Moderator:</p> <p>Emma McGarthy, Head, Sustainable Policy Institute, OMFIF</p>
<p>Tue, May 6 4:00pm - 5:30pm</p> <p>Roundtable Room 2 (Level 2)</p>	<h2>GL1 Dialogue: Market infrastructure for digital assets</h2> <p>The proliferation of tokenized financial assets across distinct networks has created significant challenges for both the private and public sectors, including issues of interoperability, scalability, regulatory compliance and security. A base layer foundational digital infrastructure, which facilitates interoperability and supports secure transactions of tokenised assets across such networks, could address these challenges while unlocking new opportunities for economic growth.</p> <p>Global Layer One (GL1) is a collaborative initiative between the public and private sectors to foster the development of multi-purpose, shared ledger infrastructures, that will facilitate seamless cross-border financial transactions while meeting regulatory expectations. More information about GL1 may be found at https://global-layer-one.org/</p> <p>The GL1 Dialogue is a series of in person public-private dialogues to facilitate broader industry engagements around GL1. These dialogues seek to bring together financial institutions and policymakers to discuss and learn about developments in financial and asset tokenisation, and features key milestones and progress under GL1. This roundtable will discuss the regulatory and operational considerations in building an ecosystem of regulatory compliant digital infrastructure for tokenised financial transactions.</p> <p>Speakers:</p> <p>Amy Kim, Head of Global Policy and Government Relations, Blockchain, Crypto, and Digital Currencies (BCDC), PayPal, Basak Toprak, EMEA Head of Kinexys Digital Payments, J.P. Morgan, David Mills, Senior Associate Director, Payments Division, Federal Reserve Board (FRB), Emma Butterworth, Head of Innovation & Payments Policy, Bank of England, Holger Neuhaus, Head of Market Innovation and Integration Division, European Central Bank, Isabelle Delorme, Global Head of Product Strategy and Innovation, Euroclear, John O'Neill, HSBC Group Head of Digital Assets & Currencies, HSBC, Kelvin Li, Head of Platform Tech, Ant International, Khai Uy Pham, Cross-border Wholesale CBDC Projects Leader, Banque de France, Maha El Dimachki, Centre Head, BIS Innovation Hub - Singapore Centre, Masashi Watanabe, Managing Director, Deputy Head of Digital Strategy Division, MUFG Bank, Ltd., Patrick Hansen, Senior Director, EU Strategy & Policy, Circle, Rachel Pierce, Financial Technology Policy Specialist, U.S. Treasury - Office of the Comptroller of the Currency (OCC), Ryosuke Ushida, Chief Fintech Officer, Financial Services Agency of Japan, Thibaut Desouches, Head of Secondary Markets, Societe Generale-FORGE, Tommaso Mancini-Griffoli, Division Chief of the Payments, Currencies, and Infrastructure Division, International Monetary Fund</p> <p>Moderator:</p> <p>Alan Lim, Director & Head, Financial Infrastructure and Artificial Intelligence Office, Monetary Authority of Singapore</p>

Tuesday, 6 May 2025

Workshops

<p>Tue, May 6 10:00am - 10:30am</p> <p>Workshop Room 3 (Level 3)</p>	<h3>How to Invest Directly in Digital Assets as an Institution? - Powered by Bpifrance</h3> <p>The curation of content and speakers was wholly managed by Bpifrance and does not reflect the views of the organisers or its staff.</p> <p>Bpifrance is the French sovereign wealth fund and cumulates 150 million euros exposure to blockchain sector. With a 25 million euro token fund, we have now a direct exposure to digital assets. Why pushing such a strategy and what did we learn?</p> <p>This session is presented by: Ivan de Lastours, Blockchain/Crypto Lead, Bpifrance</p>
<p>Tue, May 6 10:00am - 11:00am</p> <p>Workshop Room 1 (Level 3)</p>	<h3>Unlocking Cross-Border Payments in ASEAN: Opportunities for Cross-Border Trade and Growth - Powered by Amazon</h3> <p>The curation of content and speakers was wholly managed by Amazon and does not reflect the views of the organisers or its staff.</p> <p>Southeast Asia is a rapidly growing hub for digital payments innovation. However, significant frictions persist in cross-border payments within the region. These frictions increase ASEAN businesses' costs of doing crossborder trade, curtail the growth of crossborder ecommerce and regional value chains, and limit consumer choice. One key contributor to these frictions is Association of Southeast Asian Nations (ASEAN) Member States' fragmented and, in some cases, restrictive payments and digital policies that complicate payment service providers' scalability in the region. The ASEAN Digital Economy Framework Agreement (DEFA) negotiations open an important opportunity for promoting cross-border payments in the ASEAN region. This session reviews a study published by the Nextrade Group with the support of the Amazon's payments public policy team on how ASEAN could use the DEFA to promote interoperable payments.</p> <p>This is presented by:</p> <ol style="list-style-type: none">1. Benjamin Lee, Director, Nexus Global Payments2. Deborah Im, General Counsel, Coda Payments3. Dr. Kati Suominen, Founder and CEO, Nextrade Group4. Jo Yeo, Director & Head, Payments Development and Data Connectivity Office, Monetary Authority of Singapore5. Todd Fox, Head of Global Policy, Visa <p>Moderated by: Amira Karim, Head of Public Policy, Payments & Financial Services, Amazon</p>
<p>Tue, May 6 10:00am - 10:30am</p> <p>Workshop Room 2 (Level 3)</p>	<h3>Unlocking DeFi for TradFi: The Convergence of Permissioned Blockchain Networks with Public Ecosystems - Powered by R3</h3> <p>The curation of content and speakers was wholly managed by R3 and does not reflect the views of the organisers or its staff.</p>

	<p>This session will examine the distinct evolutionary paths of public and private blockchains, highlighting their respective impacts on regulated financial markets. Attendees will gain unique insights into emerging hybrid models and the future convergence of TradFi and DeFi, that is set to unlock significant growth.</p> <p>This session is presented by:</p> <ol style="list-style-type: none">1. Marcy Dumitrescu, Senior Product Manager, R32. Richard Brown, Chief Product and Technology Officer, R3
<p>Tue, May 6 11:00am - 11:30am</p> <p>Workshop Room 3 (Level 3)</p>	<h2>Mass Adoption of RWA Tokenization: Use Cases and Middle East Momentum - Powered by DMZ Finance</h2> <p>The curation of content and speakers was wholly managed by DMZ Finance and does not reflect the views of the organisers or its staff.</p> <p>This session will highlight the Middle East's growing exploration in the evolving landscape of Real-World Asset (RWA) tokenization, showcasing the region's progressive regulatory developments and accelerating momentum toward mass adoption. Industry leaders will delve into key trends, market drivers, and institutional strategies that are shaping the future of tokenized finance in the region.</p> <p>The discussion will provide a deep dive into the current RWA landscape in the Middle East, including regulatory frameworks and emerging investment and infrastructure opportunities. It will also explore the rise of RWA tokenization, with a particular focus on how centralized exchanges (CEXs), blockchain networks, and financial institutions are integrating RWAs into their ecosystems to unlock new investment potential. Finally, the session will offer a forward-looking perspective on scaling RWA tokenization, examining the path toward broader institutional adoption and cross-border applications through 2025 and beyond.</p> <p>This session is presented by:</p> <ol style="list-style-type: none">1. Andrea Vianelli, COO - Asset Management and Strategic Advisory, Laser Digital (Nomura Group)2. Teddy Pornprinya, Co-founder and CBO, Plume3. Thierry Cottet, Head of Investments, QNB (Suisse) SA <p>Moderated by: Lee Kai Yang, Co-Founder & Chief Executive Officer, DMZ Finance</p>
<p>Tue, May 6 11:30am - 12:30pm</p> <p>Workshop Room 1 (Level 3)</p>	<h2>Next-Generation Verifiable Identity for Enterprises and Governing Bodies - Powered by Cardano Foundation</h2> <p>The curation of content and speakers was wholly managed by Cardano Foundation and does not reflect the views of the organisers or its staff.</p> <p>As digital ecosystems evolve worldwide, the demand for secure, interoperable, and regulation-ready identity solutions has become business-critical. In this session, Thomas A. Mayfield introduces Veridian, the Cardano Foundation's next-generation, enterprise-grade identity management platform.</p> <p>Designed to meet the needs of financial institutions, governments, and multinational enterprises, Veridian supports LEI and vLEI integration, verifiable document signing, and secure credential management. The platform delivers these features while remaining flexible enough to accommodate regional privacy regulations through optional, light-touch distributed ledger technology (DLT).</p>

Veridian is built with future-proof technology at its core, enabling:

- Global interoperability
- Post-quantum security
- Verifiable, auditable trust mechanisms
- Secure web integration for seamless deployment

This session is presented by:

1. Fergal O'Connor, Identity Solutions Lead Architect, Cardano Foundation
2. Thomas A. Mayfield, Head of Decentralized Trust and Identity Solutions, Cardano Foundation

Tue, May 6
11:30am - 12:30pm

Workshop Room 2 (Level
3)

Secure Custody Orchestration to Capture Growth in the Digital Asset Economy - Powered by Ripple

The curation of content and speakers was wholly managed by Ripple and does not reflect the views of the organisers or its staff.

Whether you're tokenizing assets such as money market funds, or leveraging digital assets for instant settlement, secure custody of those assets should be at the core of your strategy. Some of the world's largest financial institutions trust Ripple Custody as their mission-control technology for digital asset custody and orchestration. Join Ripple and a Ripple Custody customer to gain insights that can help you:

- Understand the different digital asset use cases that are gaining traction in the market
- Implement secure yet flexible digital asset orchestration across different use cases
- Build a trusted execution environment to protect digital assets from hacks using a customisable governance engine

This is presented by:

1. Cassie Craddock, Vice President & Managing Director, UK & Europe, Ripple
2. Maximilian Ruf, Director of Custody, Ripple
3. Philippe Meyer, Head of Digital and Blockchain Solutions, BBVA Switzerland

Tue, May 6
1:00pm - 1:30pm

Workshop Room 3 (Level
3)

Digital Asset Infrastructure: Scaling Fund Management for Modern Investors - Powered by Chainlink

The curation of content and speakers was wholly managed by Chainlink and does not reflect the views of the organisers or its staff.

By 2048, the global economy will see nearly \$100 trillion of assets shift to millennials and Gen Z, creating a pivotal moment for wealth managers. This panel will explore how financial institutions can adapt their operating models to meet the evolving demands of these digital-native investors, particularly through the strategic adoption of blockchain technology and tokenization to unlock new product innovation and operational efficiencies.

Join the experts as they discuss the critical considerations for designing and implementing effective fund management strategies, focusing on:

- Fund Tokenization, Money Market Funds, and the transformation of collateral management on-chain.
- Digitisation of alternative collective investment vehicles and their role in the definition of new asset classes
- Digital Transfer Agency and the fund lifecycle, across data, transaction management and asset servicing
- Settlement Mechanisms - onchain and offchain capital and the settlement process.

	<p>This session is presented by:</p> <ol style="list-style-type: none">1. Isabelle Delorme, Global Head of Product Strategy and Innovation, Euroclear2. Rehan Ahmed, Chief Executive Officer, Marketnode3. Victor Jung, Managing Director, Head of Digital Assets, Hamilton Lane <p>Moderated by: Angie Walker, Global Head of Banking and Capital Markets, Chainlink Labs</p>
<p>Tue, May 6 1:00pm - 2:00pm</p> <p>Workshop Room 1 (Level 3)</p>	<h2>How to Secure Switzerland's Lead in Digital Assets in an Internationally Competitive Environment? - Powered by Bank Julius Baer & Co. Ltd</h2> <p>The curation of content and speakers was wholly managed by Julius Baer & Co. Ltd and does not reflect the views of the organisers or its staff.</p> <p>Switzerland has been a pioneer and leading venue for DLT and other innovative financial technologies. However, competitors are catching up quickly. This workshop presents an initiative of key industry associations to secure and reinforce Switzerland's leading role. It highlights the need for an interdisciplinary approach and an open dialogue between authorities, lawmakers, the industry, and other stakeholders.</p> <p>This session is presented by:</p> <ol style="list-style-type: none">1. Daniela Stoffel, State Secretary, State Secretariat for International Finance (SIF)2. Hans Kuhn, Author of the Manifesto "Twelve Points for Strengthening the Innovative Capacity of the Financial Center" and Member of the Regulatory Working Group, Swiss Blockchain Federation, Swiss Blockchain Federation3. Mathias Imbach, Co-founder & Group Chief Executive Officer, Sygnum Bank4. Pascale Bruderer, Chairwoman Swiss Stablecoin, former member of the Council of States and National Council5. Philipp Vonmoos, Chief Financial Officer, Solana Foundation <p>Moderated by: Nicolas de Skowronski, Head Digital Transformation & Deputy COO, Bank Julius Baer & Co. Ltd.</p>
<p>Tue, May 6 1:00pm - 2:00pm</p> <p>Workshop Room 2 (Level 3)</p>	<h2>Technical Showcase: Connecting Retail Cross-border Payments, Tokenised FX, and Programmable Compliance - Powered by Bank for International Settlements</h2> <p>The curation of content and speakers was wholly managed by Bank for International Settlements and does not reflect the views of the organisers or its staff.</p> <p>The worlds of traditional finance and tokenisation are converging. This showcase explores, how three BISIH projects (Nexus, Rialto, Mandala) can be interlinked. The session will give a background on each project and the include a technical demonstration of the implementation.</p> <p>This is presented by:</p> <ol style="list-style-type: none">1. Benjamin Lee, Director, Nexus Global Payments2. Friedrich Klinger, Advisor, Bank for International Settlements3. Khai Uy Pham, Cross-border wholesale CBDC projects leader, Banque de France
<p>Tue, May 6 2:00pm - 2:30pm</p>	<h2>Stablecoins: Real-world Use Cases in Asia - Powered by Cobo</h2>

Workshop Room 3 (Level 3)

The curation of content and speakers was wholly managed by Cobo and does not reflect the views of the organisers or its staff.

Stablecoins are rapidly becoming the foundation for global crypto settlement—powering faster, programmable, and cost-efficient cross-border payments. Yet institutional adoption still faces critical challenges: how to secure underlying assets, enforce risk policies, and meet evolving compliance demands at scale.

In this session, Cobo's Head of Sales and Solutions, Lucas Yang, joins experts from The Banking Circle Group to explore how stablecoins are already being deployed across Asia in institutional-grade environments. They'll share lessons from real-world use cases and discuss what it takes to build a secure, scalable stablecoin ecosystem that works for the next era of global finance.

This session is presented by:

1. Daniel Lee, Head of Web3, Banking Circle
2. Lucas Yang, Head of Sales & Solutions, Cobo

Tue, May 6
2:30pm - 3:30pm

Workshop Room 1 (Level 3)

Collateral Mobility & Management: The Next Evolution of Tokenization - Powered by Taurus

The curation of content and speakers was wholly managed by Taurus and does not reflect the views of the organisers or its staff.

As financial institutions navigate the evolving digital asset landscape, effective collateral management is crucial for optimizing liquidity, mitigating risk, and ensuring regulatory compliance.

This session is presented by:

1. Victor Busson, Chief Marketing Officer, Taurus

Tue, May 6
2:30pm - 3:30pm

Workshop Room 2 (Level 3)

Institutional DeFi with Programmable Privacy - Powered by Kaleido

The curation of content and speakers was wholly managed by Kaleido and does not reflect the views of the organisers or its staff.

Currently, institutions can be hesitant to engage with DeFi due to concerns including privacy, scalability, and interoperability. However, composable finance with privacy and interoperability can address many of these concerns by creating a more robust and flexible infrastructure. This session will provide attendees the opportunity to:

- Understand the privacy challenges facing stablecoins, tokenized deposits, and tokenized money market funds—and discover how leading privacy techniques address these issues through advanced cryptography and modular, open-source frameworks
- Get hands-on insight into Paladin, the Linux Foundation Decentralized Trust Lab code base enabling privacy-preserving tokens and smart contracts on EVM blockchains.
- Learn from real-world projects already building with Paladin, and discuss the future of privacy in digital finance.

This is presented by:

1. Dr. Darko Hajdukovic, Chief Executive Officer, Digital Market Infrastructure, London Stock Exchange Group
2. Nadine Teychenne, Head of Digital Assets, Security Services, Citi
3. Stéphanie Lheureux, Head of Digital Assets Competence Center, Euroclear
4. Steve Cerveny, CEO and Co-Founder, Kaleido

	<p>Moderated by: Javier Garcia, Head of Digital Assets & Tokenization, Kaleido</p>
<p>Tue, May 6 3:00pm - 3:30pm</p> <p>Workshop Room 3 (Level 3)</p>	<h2>Digital Assets and Cross-Border Payments: The New Revolution in Global Asset Flows - Powered by HashKey OTC Global</h2> <p>The curation of content and speakers was wholly managed by HashKey and does not reflect the views of the organisers or its staff.</p> <p>This session will provide a comparative survey between traditional banking methods vis-a-vis on-chain transfers on the blockchain. Attendees will gain a deeper understanding of the capabilities of over-the-counter (OTC) trading solutions for fiat and digital assets, and their position in the broader cross-border payments ecosystem.</p> <p>This is presented by: Li Liang, CEO, HashKey OTC</p>
<p>Tue, May 6 4:00pm - 4:30pm</p> <p>Workshop Room 3 (Level 3)</p>	<h2>Nordic Values, Global Impact: Building Trustworthy FinTech for a Sustainable Future</h2> <p>The curation of content and speakers was wholly managed by Copenhagen Fintech and does not reflect the views of the organisers or its staff.</p> <p>As part of the Nordic Delegation to Point Zero Forum, this session offers a first look at some of the most forward-thinking fintech companies emerging from the Nordic region. All united by a shared vision of embedding trust, transparency, and sustainability into the very DNA of financial innovation.</p> <p>This event mirrors the mantra of Nordic Fintech Week 2025: Nordic Values, Global Impact. You'll hear directly from fintech leaders who are shaping the next generation of trustworthy digital finance. Through identity, compliance, intelligence and data integrity.</p> <p>This session is presented by:</p> <ol style="list-style-type: none">1. Jonathan Patscheider, Vice President, Trust Stamp Denmark2. Kurt Nielsen, President & Co-Founder, Partisia Blockchain3. Line Christa Amanda Sørensen, Chief Commercial Officer, Trifork4. Franziska Steiner, Senior Opportunity Architect, Innovation & Venturing by PostFinance (VNTR) <p>Moderated by: Simon Schou, Chief Innovation Officer, Copenhagen Fintech</p>
<p>Tue, May 6 4:00pm - 4:30pm</p> <p>Workshop Room 1 (Level 3)</p>	<h2>Strengthening Trust in AI Agents through Digital Identity - Powered by Terminal 3</h2> <p>The curation of content and speakers was wholly managed by Terminal 3 and does not reflect the views of the organisers or its staff.</p> <p>Enterprises are deploying Agentic AI at an astounding rate, with 50% of enterprises projected to be using AI agents by 2027. However, between lack of trust in the underlying models, the actions they take, and additional challenges around authorization and privacy, there is a significant trust deficit that limits how AI agents are able to be deployed by organizations in meaningful ways.</p>

	<p>In this session, Gary Liu from Terminal 3 will explore how privacy-enhancing technologies and decentralized solutions can effectively bridge the trust gap for AI agent use cases. Participants will learn how establishing secure and verifiable digital identities for AI agents can enhance transparency and accountability, and ultimately foster greater trust between consumers, regulators, and businesses.</p> <p>This is presented by: Gary Liu, Co-founder & Chief Executive Officer, Terminal 3</p>
<p>Tue, May 6 4:00pm - 5:00pm</p> <p>Workshop Room 2 (Level 3)</p>	<h2>AI in Decision-making - Powered by BIS Innovation Hub</h2> <p>The curation of content and speakers was wholly managed by BIS Innovation Hub and does not reflect the views of the organisers or its staff.</p> <p>The purpose of this workshop is to explore how AI can enhance decision-making. In a live demo of a concrete example, it will be showcased how granular data and AI can be leveraged to obtain timely insights into the Swiss economy. The expert panel featuring representatives from Snowflake the Swiss National Bank and the BIS Innovation Hub, Bank for International Settlements – will share real-world examples, challenges, and lessons learned from integrating AI into decision-making workflows.</p> <p>This is presented by:</p> <ol style="list-style-type: none">1. Alexandre Jannaud, Data Scientist, Argusa2. Emanuel Nussli, Data Scientist, BIS Innovation Hub, Bank for International Settlements3. Dr. Jennifer Belissent, Principal Data Strategist, Snowflake4. Marko Nanut Petric, Advisor, BIS Innovation Hub, Bank for International Settlements5. Dr. Rachel Arulraj-Cordonier, Advisor, BIS Innovation Hub, Bank for International Settlements6. Road to Agentic AI in Financial Services - Part II: Policy, Regulation and Governance

As AI agents evolve from automation to decision-making, how will they reshape financial services in 2025? This 2 part session brings together regulators and industry leaders to explore opportunities, risks, and the policy landscape for agentic AI in finance.

Speakers:

Kenneth Gay, Chief FinTech Officer, Monetary Authority of Singapore, Dr. Nicola Jentzsch, Head of Innovation, Deutsche Bundesbank, Ryosuke Ushida, Chief Fintech Officer, Financial Services Agency of Japan, Miguel Díaz, Deputy Head of the BIS Innovation Hub and Head of Strategy, Bank for International Settlements (BIS)

Moderator:

Jaskaran Bhalla, Head of Content, Global Finance & Technology Network (GFTN)

Wed, May 7
11:00am - 11:40am

Hall A (Level 2)

A New Era of Payment Technology: A Central Bank Dialogue on the Next Steps in the Evolution of Domestic and Cross-Border Payments

This panel convenes a high-level public sector discussion on the developments of next generation payment technology, diving into the subject areas of both domestic and cross-border payments as well as retail and wholesale applications. Senior experts will debate innovative technological solutions to existing pain points in the financial system and the potential to significantly improve existing processes involving central bank and commercial bank money.

Speakers:

Leong Sing Chiong, Deputy Managing Director, Markets and Development, Monetary Authority of Singapore, Naoto Shimoda, Deputy Director-General, Payment and Settlement Systems Department, Bank of Japan, Petra Tschudin, Member of the Governing Board, Swiss National Bank, Tom Mutton, Director, Fintech & CBDC, Bank of England

Moderator:

Morten Bech, Centre Head - Switzerland, BIS Innovation Hub

Wed, May 7
11:40am - 12:10pm

Hall A (Level 2)

The Future of Wealth: Generational Shifts, Platforms & Alternatives

As trillions in wealth shift generations, digital platforms rise, and demand for alternative investments grows, wealth management is undergoing a transformation. This panel explores how these forces are redefining value creation and client expectations.

Speakers:

Dr. Dirk Klee, Country Head, BlackRock Switzerland, Dushyant D Shahrawat, Managing Director, Rosenblatt Securities, Johann Kerbrat, Senior Vice President & General Manager, Crypto, Robinhood

Moderator:

Stephanie K. Wickihalder, President, Swiss FinTech Innovations (SFTI)

Democratising Access to Finance – Keynote by Vittorio Di Bello, International Finance Corporation (IFC)

In this keynote presentation, Vittorio di Bello, Director, Financial Institutions Group, LAC/EUR, International Finance Corporation (IFC), will share about the upcoming Digital Invoice Finance Origination (DIFO) initiative. Through digitised and standardised invoice data, the initiative aims to alleviate bottlenecks and democratise verifiable due diligence and risk assessment for SME finance.

Speaker:

Vittorio Di Bello, Director, Financial Institutions Group, LAC/EUR, International Finance Corporation (IFC)

Wed, May 7
1:20pm - 1:50pm

Hall A (Level 2)

AI & Blockchain: Navigating the Crossroads with Regulation

The intersection of AI and blockchain holds transformative potential for financial markets, leading to increased efficiency, transparency, and security. However, the realization of these benefits will depend on overcoming technological, regulatory, and ethical challenges.

As these technologies continue to evolve, financial institutions must embrace innovation while remaining vigilant to the associated risks. This dialogue explores how regulators can balance innovation and oversight to foster trust, security, and sustainable growth in this evolving landscape.

Speakers:

Frederik Gregaard, Chief Executive Officer, Cardano Foundation, Maha El Dimachki, Centre Head, BIS Innovation Hub – Singapore Centre, Prof. Ross Buckley, Scientia Professor, UNSW Sydney

Moderator:

Nicole Dyskant, Global Senior Advisor, Regulatory & Public Affairs, Fireblocks

Wed, May 7
1:50pm - 2:20pm

Hall A (Level 2)

Cyber Resilience in the Age of Converging Technologies

As emerging technologies like artificial intelligence, quantum technology, and distributed ledger technologies reshape the way people work, live, and transact, concerns about present and future cyber risks threaten trust in digital financial services and beyond.

This panel will explore the growing opportunities and risks associated with technological convergence within financial services, how to best balance risk and innovation, and the robust security approaches needed to safeguard critical systems, financial services, and global digital infrastructure.

Speakers:

Dr. Alessandro Curioni, IBM Fellow, Vice President, Europe & Africa and Director, IBM Research – Zurich, IBM, Friederike Lange, Head of Digital Finance, Payment Services and Cybersecurity, German Federal Ministry of Finance, Jason Lau, Board of Directors, ISACA & Chief Information Security Officer, Crypto.com

Moderator:

Oliver Bussmann, Chief Executive Officer, Bussmann Advisory

Wed, May 7
2:20pm - 3:00pm

Hall A (Level 2)

Accelerating AI Innovation: Bridging Academia, Industry, and Regulation

What drives AI breakthroughs from research to real-world impact? This panel brings together global experts to discuss the collaboration needed to scale AI innovation, navigate regulation, and align research with market needs.

Speakers:

Hans Koning, Digital Transformation Officer, Former International Finance Corporation (World Bank Group), Prof. Lam Khin Yong, Vice President (Industry), Nanyang Technological University, Singapore, Bryan Zhang, Co-founder & Executive Director of Cambridge Centre for Alternative Finance (CCAF), University of Cambridge

Moderator:

Jessica Renier, Managing Director & Head of Digital Finance, Institute of International Finance (IIF)

G20 Presidency Priorities: Opening Remarks by South African Reserve Bank (Virtual)

Watch this space for more information!

Speaker:

Dr. Mampho Modise (Virtual), Deputy Governor, South African Reserve Bank (SARB)

Wed, May 7
3:10pm - 3:30pm

Hall A (Level 2)

The State of Stables

One of the world's most respected fintech influencers, Simon Taylor of Fintech Brainfood, offers his views on the current state of play for the stablecoin markets and how stablecoins are poised to overhaul cross-border payments systems as we understand it.

Speaker:

Simon Taylor, Head of Strategy, Sardine

Wed, May 7
3:30pm - 4:00pm

Hall A (Level 2)

A Global Policymaker Dialogue on Future of Payments

Global payments sit at the heart of the financial system – connecting businesses, people, and economies across borders. But currently, they're often too slow, too expensive, and too complex, especially for small businesses and developing markets. At the same time, the landscape is shifting fast: instant payment systems, stablecoins, and new global standards are all reshaping the way money moves.

This panel brings together leaders who are directly shaping that future – to explore how policymakers, regulators, and international bodies like the BIS can work together to build a faster, safer, and more inclusive global payments ecosystem.

Speakers:

Benjamin Lee, Director, Nexus Global Payments, Marcel Beer Kremnitzer, Policy Specialist, Banco Central do Brasil, Rainer Olt, Head of Payment and Settlement Systems Department, Eesti Pank (National Central Bank of Estonia)

Moderator:

Raadhika Sihni, Head of Public Policy, Global Finance & Technology Network (GFTN)

FutureMatters Stage

Wed, May 7 11:45am - 12:00pm Hall C (Level 2)	<h3>Welcome to FutureMatters Stage Day 2: The Digital Asset Summit</h3> <p>The FutureMatters Stage is where pivotal discussions shape the future of key industry verticals.</p> <p>Here, the future isn't speculated - it's architected. Over two days, leaders will reimagine the frameworks powering intelligent systems, digital money, and Europe's innovation landscape. From AI-enabled teammates and programmable finance to the policy shifts required to unlock startup growth, this stage brings together the minds building what's next. Because the future matters, and so do the decisions we make today to shape it.</p>
Wed, May 7 12:00pm - 12:30pm Hall C (Level 2)	<h3>Combating Financial Crime Through Innovative Collaboration and Technology</h3> <p>In this session, our panelists will discuss how to harness innovative technologies and collaborative frameworks that enhance financial integrity and combat the rising tide of financial crime. By exploring the intersections of diverse data sources, involving multiple stakeholders, and conceptualising broader engagement, the panel can forge a path forward that not only addresses current challenges but also fortifies the resilience of the global financial system against future threats.</p> <p>Following the panel, there will be a short preview of the G20 TechSprint 2025, a joint initiative between the G20 Presidency and the BIS Innovation Hub to seek out best-in-class tech innovations to solve common challenges of the global regulatory and central banking community. This year's TechSprint invites global innovators to develop solutions addressing problem statements focused on digital identity, secure credit data portability and fraud mitigation in fast payment systems.</p>
Wed, May 7 12:30pm - 1:10pm Hall C (Level 2)	<h3>The Road Ahead: The Future of Digital Assets in Institutions</h3> <p>Digital assets have reached a tipping point when it comes to institutional adoption. Once sceptical, institutional players and investors are increasingly embracing digital money solutions - from tokenized assets to central bank digital currencies (CBDCs), cryptocurrencies, and stablecoins - as part of their financial portfolios.</p> <p>Simultaneously, technological developments, from evolving custody solutions to emerging blockchain innovations such as smart contracts, interoperability, and cross-border tokenized transactions, are presenting new opportunities for investors to capture.</p> <p>This session will gather industry leaders to discuss the evolution of custody and blockchain solutions to support investor needs, the impact of cryptocurrencies like Bitcoin and Ethereum and tokenized asset classes on institutional strategies, and the changing landscape of digital asset adoption by institutional investors.</p>
Wed, May 7 1:10pm - 1:40pm Hall C (Level 2)	<h3>Navigating the New Global Order: Legal Frameworks for Financial Stability in a Fractured World</h3> <p>This session convenes legal experts from across the financial landscape to share how legal frameworks can evolve to address the rise of digital assets, AI, and decentralised finance without stifling innovation, and how central banks and international institutions can best align their approaches to foster stability in a fractured world.</p>
Wed, May 7 1:40pm - 2:20pm Hall C (Level 2)	<h3>Regulation and the Layer 1 Question</h3> <p>As governments and institutions grapple with regulating Layer 1 blockchains, approaches vary widely - from integrating permissionless technologies within structured regulatory environments to favouring permissioned measures for greater oversight.</p> <p>This panel will explore how Layer 1 protocols influence regulatory strategies, examining challenges such as decentralized governance, tax policy complexities, and AML/KYC compliance, as well as how emerging approaches,</p>

	<p>such as decentralised blockchain protocols, can support organisations in achieving their regulatory objectives. What approaches can regulators and industry leaders take to support blockchain innovation and interoperability while safeguarding economic stability and compliance?</p>
<p>Wed, May 7 2:20pm - 3:00pm</p> <p>Hall C (Level 2)</p>	<h2>Evolving Consumer Expectations and Their Impact on the Future of Security in Crypto</h2> <p>As the crypto space continues to mature, so too does the sophistication of its users. Once dominated by early adopters and tech-savvy investors, the industry is now welcoming mainstream consumers who demand not only innovative financial products but also heightened security and ease of use. This shift in consumer expectations is reshaping the future of crypto security, compelling businesses to adapt rapidly or risk losing user trust.</p> <p>This panel will explore how evolving consumer needs are influencing security practices in crypto, from the demand for enhanced privacy protections to the increasing desire for intuitive user experiences. Panelists will discuss the key trends in consumer behavior, the growing emphasis on secure yet seamless interactions, and how the industry can strike a balance between robust security measures and user-friendly interfaces.</p>
<p>Wed, May 7 3:00pm - 3:40pm</p> <p>Hall C (Level 2)</p>	<h2>Scaling Tokenized Markets and the Evolution of Secondary Markets</h2> <p>This panel will explore the scaling of tokenized markets, focusing on the key challenges and opportunities involved in creating and evolving secondary markets for tokenized assets. Panelists will discuss the infrastructure, regulatory frameworks, and technological advancements needed to enable the smooth scaling of tokenized markets, along with the role that secondary markets play in providing liquidity, transparency, and investor confidence.</p> <p>Key topics will include:</p> <ul style="list-style-type: none">• The Scaling of Tokenized Asset Markets: Panelists will discuss the technological, operational, and regulatory challenges in scaling tokenized markets, from blockchain scalability to cross-chain interoperability and institutional adoption.• Building Liquidity in Secondary Markets: Panelists will explore the role of market makers, exchanges, and liquidity protocols in attracting investors and enhancing the liquidity of tokenized assets.• Regulatory Considerations for Scaling Tokenized Markets: Panelists will discuss the evolving regulatory environment and the challenges and opportunities of creating a global regulatory framework for tokenized assets.• Globalization of Tokenized Secondary Markets: Panelists will explore the opportunities and challenges of global adoption, including cross-border trading and international regulatory coordination.
<p>Wed, May 7 3:40pm - 4:10pm</p> <p>Hall C (Level 2)</p>	<h2>Future of Decentralised Finance (DeFi) in the Financial System</h2> <p>As decentralized finance (DeFi) continues to evolve, its core principles of openness, transparency, and accessibility remain at the forefront of innovation. This panel will explore the future of DeFi in a permissionless ecosystem.</p> <p>Panelists will discuss the unique opportunities and challenges that come with building a truly permissionless financial system, from the integration of decentralized identity solutions to the growing role of blockchain scalability.</p>
<p>Wed, May 7 4:10pm - 4:50pm</p> <p>Hall C (Level 2)</p>	<h2>Digital Money and its Role in the Financial System</h2> <p>Digital money, from central bank digital currencies (CBDCs) to stablecoins and tokenized deposits, have promised to simplify cross-border payments, accounting and record-keeping, as well as to improve financial inclusion on a global scale. Despite these benefits, digital money projects remain in a largely experimental stage and widespread adoption remains limited. This is in part due to challenges such as cybersecurity concerns and regulatory uncertainty to technical limitations, such as a lack of interoperability.</p> <p>In this panel, leaders from the worlds of decentralised finance, investment banking, and technology, will share how today's technical advancements are reshaping the landscape of digital money and financial market infrastructures, the factors that will determine the success of digital money initiatives, and how digital money will transform the financial system in the coming years.</p> <p>Panelists will address:</p> <ul style="list-style-type: none">· The benefits and risks associated with digital money· The factors that will determine the success of digital money initiatives· How technical advancements today are reshaping the landscape of digital money and financial market infrastructures

- How digital money will transform the financial system in the coming years

Wed, May 7
4:50pm - 5:00pm

Hall C (Level 2)

State of G20 Cross-Border Payment Goals

Announced in 2021, the G20 Roadmap for Enhancing Cross-border Payments aims to make cross-border payments cheaper, faster, as well as more accessible and transparent by 2027. Amongst other goals, the plan aims to ensure that 75% of cross-border payments will be completed within an hour, with the remainder completed within one business day.

In this data-driven presentation, Ian Manns, VP of Cards and Global Indices, FXC Intelligence, will share insights on the state of cross-border payments, the progress made so far against the G20 Roadmap, and the impact of geopolitical trends and technological developments on the payments landscape.

Wed, May 7
5:00pm - 5:40pm

Hall C (Level 2)

The Curious Case of Stables: New Value Propositions

The growth of stablecoins is unquestionable. Industry commentators predict a 10x growth in supply in the next decade, reaching \$1.6trn by 2030 — some even going as far as to state that stablecoins will soon qualify as "systemic". As the industry moves beyond the early use cases, what can we imagine as the next set of value propositions? In this session, hear the latest thinking from our panellists, who will each share the next big value propositions for stables that will take the market by storm.

GFTN Insights™

<p>Wed, May 7 10:00am - 11:30am</p> <p>Roundtable Room 1 (Level 2)</p>	<h3>Cross-border payments – The past, the present, and the future we envisage</h3> <p>Cross-border payments are the backbone of global trade and financial flows, yet they continue to face significant frictions, including inefficiencies, high costs, and complex regulatory landscapes. Central banks and financial institutions have been exploring various approaches to deliver public goods –bilateral, regional, and multilateral initiatives– to improve speed, cost, accessibility, transparency and resilience. By sharing lessons learned, key challenges, and past strategies, Part A of this roundtable will be an opportunity for discussants to take stock of key developments in cross border payments and importantly provide an opportunity to draw out key lessons and insights from the past and present evolution of cross border payments.</p> <p>Building on these insights, Part B will focus on the opportunities for transformation to explore what is next. The discussion will explore how private sector innovation and public-private collaboration can enhance cross-border payment systems, with a particular emphasis on the opportunities that the newly minted Nexus global hub brings as it comes into live operations. Key areas of exploration include emerging use cases, commercial models, industry partnerships, and technological advancements. A core consideration will be the long-term sustainability of these solutions—ensuring that improvements are scalable, inclusive, and resilient in an increasingly interconnected financial ecosystem.</p> <p>This roundtable is designed to generate tangible insights that contribute to the evolution of cross-border payments. A detailed roundtable report will be prepared, capturing key discussion points, lessons learned, and emerging recommendations. This document will serve as a resource for participants and industry stakeholders, supporting future iterations and potential scaling of innovative solutions in this space.</p>
<p>Wed, May 7 10:00am - 11:30am</p> <p>Roundtable Room 2 (Level 2)</p>	<h3>Working 'Above Borders': Governance, architecture & standards of digital public infrastructure</h3> <p>Governance, the Architecture & Standards for the Digital Economy: Striving for international connectivity and trust in a fragmented world.</p> <p>How can governments act locally but support global interconnectivity and the development of the digital economy? What standards, conventions, or infrastructures do we need to adapt or create to enhance access and empower citizens and companies to participate on equal footing in the global digital economy while addressing risks and protecting sovereignty?</p>
<p>Wed, May 7 10:00am - 11:30am</p> <p>Roundtable Room 3 (Level 3)</p>	<h3>Adapting to the future: Building resilient supply chains in the face of climate change</h3> <p>As climate change presents increasing risks to global supply chains, organizations are being forced to adapt and innovate to ensure long-term resilience. The Green Fintech Network will facilitate an exchange between six organizations – representing associations, startups, corporates, and consulting companies – who will come together to discuss how the supply chain landscape is evolving in response to climate-related disruptions. Participants will share their insights on the key challenges and strategies for building more resilient, sustainable supply chains, and showcase how their organizations are driving change. The discussion will explore actionable solutions, from risk mitigation to technological innovations, that will help businesses navigate the complexities of climate change while securing their supply chains for the future.</p>
<p>Wed, May 7 12:00pm - 1:30pm</p> <p>Roundtable Room 3 (Level 3)</p>	<h3>Regulated activities on public blockchains</h3> <p>This roundtable examines the potential of public permissionless blockchains to enhance traditional financial services. However, with new opportunities come new risks. These risks, such as operational, reputational and legal risks need to be adequately addressed. The aim of the roundtable is to discuss potential use cases for regulated activities on public permissionless blockchains, the risks involved and how these risks can be mitigated by policymakers, including international and industry standard setters, and regulators.</p> <p>Participants can familiarise themselves with the topic with the following pre-read materials from the discussants:</p>

	<ul style="list-style-type: none"> • Enhancing financial services with permissionless blockchains - Publications Office of the EU • guardian-fixed-income-framework.pdf • Private sector partners join Project Agorá • Introducing Digital Asset Securities Control Principles (DASCP) - Euroclear <p>The mentioned discussions of potential use cases for regulated activities on public permissionless blockchains, the risks involved and how these risks can be mitigated by policymakers, including international and industry standard setters, and regulators will be published in a whitepaper.</p>
<p>Wed, May 7 12:00pm - 1:30pm</p> <p>Roundtable Room 2 (Level 2)</p>	<h2>The FinTech Ecosystem Playbook: Foundational components to drive innovation, financial inclusion and economic growth</h2> <p>This high-level roundtable will convene public and private sector leaders to explore the core building blocks required to cultivate a thriving fintech ecosystem. Through a structured dialogue across three strategic themes—policy and regulatory design, capacity building and inclusion, and digital infrastructure and innovation—the session will unpack lessons learned and share playbook recommendations for governments, regulators, and ecosystem builders shaping their fintech strategies.</p>
<p>Wed, May 7 12:00pm - 1:30pm</p> <p>Roundtable Room 1 (Level 2)</p>	<h2>The Fungibility of Stablecoins: Unlocking cross-border payments or fragmenting the global financial system?</h2> <p>Stablecoins are emerging as a serious contender for cross-border transactions, offering faster settlement, lower costs, and reduced reliance on traditional banking rails. Recent developments signal that major payment service providers (PSPs) are beginning to explore stablecoins as part of their core infrastructure, while other incumbents have maintained their commitment to fiat-based transactions.</p> <p>Herein also lies the question of fungibility. Are all stablecoins truly exchangeable across networks, jurisdictions and use cases, or do regulatory and operational constraints create fragmentation risks? If stablecoins are to become a mainstay in global payments, PSPs must navigate liquidity, compliance and interoperability challenges that could either accelerate adoption or hinder scalability.</p> <p>Discussion themes:</p> <ol style="list-style-type: none"> 1. The growing role of stablecoins in cross-border payments - Are lower costs, instant settlement, and financial inclusion advantages enough to drive broader PSP adoption? 2. Strategic moves in the payments industry - What does the acquisition of a stablecoin platform signal about the future of PSP-stablecoin integration, and will it force competitors to reconsider their stance on stablecoins? 3. The fungibility challenge - How do differences in issuance models, reserve structures, and regulatory classifications affect stablecoins' usability across different payment rails and jurisdictions? 4. Regulatory and market barriers - What are key regulatory, liquidity, and operational challenges preventing PSPs from fully embedding stablecoin-powered payments into their infrastructure? What's needed to bridge the gap between stablecoins and traditional finance? <p>This session is held in collaboration with the Ripple Policy Summit.</p>
<p>Wed, May 7 2:00pm - 3:30pm</p> <p>Roundtable Room 3 (Level 3)</p>	<h2>Decoupling from Big Tech: Towards digital sovereignty in Europe</h2> <p>European policymakers are actively seeking to reduce reliance on overseas technology giants while fostering homegrown tech innovation, with initiatives such as the EU Chips Act, the EU AI Act, Gaia-X and the EuroStack. Does Europe's push for digital independence enable a more competitive technology ecosystem or does it risk creating new regulatory and technological barriers that stifle cross-border technology collaboration? What are these trade-offs, and what are the opportunities for digital decoupling to enable other policy goals, such as nurturing local innovation ecosystems and build sovereign, trustworthy payment systems? This roundtable will explore the trade-offs and opportunities offered by the digital sovereignty movement, and spotlight the case of digital payments as an example where these questions are playing out.</p> <p>This roundtable gathers researchers, technologists, policymakers, as well as AI and digital payments experts, to identify the steps Europe can take to invest in the capabilities, skills, and partnerships needed to drive digital sovereignty efforts; explore how European privacy standards are influencing the development of sovereign digital</p>

payments infrastructure in Europe; learn from alternative models emerging from the Global South; and map out a European path towards technological autonomy.

This roundtable seeks to:

- Identify the steps Europe can take to mobilise and invest in the capabilities, skills, and partnerships needed to drive digital sovereignty efforts
- Explore the trade-offs of Europe's digital decoupling strategy and its impact on technology research, enterprise adoption, and cross-border innovation, and identify opportunities for digital decoupling to achieve these policy goals
- Learn from open-source alternatives emerging from Europe and the Global South that offer pathways of technological autonomy
- Map out a third way to achieving a European Innovation paradigm built on European privacy standards as an alternative model to the Big-Tech-driven US approach and China's state-led ecosystem

Wed, May 7
2:00pm - 3:30pm

Roundtable Room 1 (Level 2)

The Stablecoin Debate Unpacked: Right rules for stability, security and growth

Stablecoins have introduced a new paradigm for digital finance, offering the promise of faster payments, greater financial inclusion, and seamless cross-border transactions. But with this potential comes risk—from financial crime and illicit activity to consumer protection gaps and systemic market threats. As regulators race to put the right guardrails in place, the question remains: What does an optimal regulatory framework for stablecoins look like?

Tighter oversight could bring greater legitimacy and mainstream adoption, but at what cost? Could excessive restrictions stifle innovation and limit stablecoins' ability to compete with traditional finance? Meanwhile, financial institutions are stepping into the space, bridging the divide between regulated banking and digital assets—but is this the answer to ensuring stability, or simply a step toward the centralization of stablecoins?

This discussion brings back the banking and crypto voices from the three-part debate ([Battle Royale of Payments](#), [Digital Currency Showdown](#) and [Stablecoins vs Tokenised Deposits](#)) with policy experts to tackle the key risks of ML/TF compliance, consumer protection, and financial stability. Expect a hard-hitting discussion on the future of stablecoin regulation as we break down the real risks, real opportunities, and real regulatory solutions that will determine whether stablecoins remain an experimental asset class—or the foundation of the next financial revolution.

Wed, May 7
2:00pm - 3:30pm

Roundtable Room 2 (Level 2)

Tokenization as a driver for growth and financial inclusion: Lessons from emerging markets

The case for tokenization varies across asset classes and jurisdictions. The calculus – and speed of adoption of technology – is likely to be different for existing financial centres, tied to traditional financial market infrastructure and where incumbents have significant sway and large parts of the population have access to digital money and financial services, and emerging economies, which can leapfrog. Despite that, the public discussion and the discussion in global fora is heavily shaped by the experience of AEs. This roundtable would aim to address that gap, identifying use cases prevalent in Emerging Market and Developing Economies_ (EMDEs) and fostering an exchange about options to regulate tokenization. It would be complementary to the work IOSCO has done so far, and supportive of the current workstream on tokenization.

This roundtable will bring together market participants and regulators from select EMDE jurisdictions to discuss:

- a. Specific use cases for tokenisation in EMDEs
- b. Key regulatory and policy considerations, including barriers to tokenisation
- c. Regulatory innovation initiatives and challenges of moving from experimentation to regulatory reform

Observers can refer to these pre-reading reference materials to prepare for the roundtable:

- **Tokenisation in the context of money and other assets: concepts and implications for central banks, BIS** - <https://www.bis.org/cpmi/publ/d225.htm>
- **The Financial Stability Implications of Tokenisation, FSB** - <https://www.fsb.org/2024/10/the-financial-stability-implications-of-tokenisation/>
- **"Tokenisation in Financial Services: Pathways to Scale" - Opening Keynote Address by Mr Leong Sing Chiong, Deputy Managing Director (Markets &**

Development), Monetary Authority of Singapore, at the Layer One Summit on 4 November 2024, MAS,

<https://www.mas.gov.sg/news/speeches/2024/tokenisation-in-financial-services-pathways-to-scale>

- Tokenisation of assets and distributed ledger technologies in financial markets, OECD

[-https://www.oecd.org/content/dam/oecd/en/publications/reports/2025/01/tokenisation-of-assets-and-distributed-ledger-technologies-in-financial-markets_be149012/40e7f217-en.pdf](https://www.oecd.org/content/dam/oecd/en/publications/reports/2025/01/tokenisation-of-assets-and-distributed-ledger-technologies-in-financial-markets_be149012/40e7f217-en.pdf)

Wed, May 7
4:00pm - 6:00pm

Roundtable Room 2 (Level 2)

DLT for FMI: What is missing?

Distributed ledger technology (DLT) is frequently highlighted as a game-changer for financial market infrastructure (FMI). Yet, despite numerous pilots, proofs of concept, and even some production deployments, it has (yet) neither replaced nor fundamentally transformed today's financial markets. Rather, DLT has remained limited to niche applications.

Which key elements are still missing, or are insufficiently mature, to enable DLT to truly reshape FMI? Is the main hurdle the current regulatory framework, or do challenges around standardization, interoperability with legacy systems, scalability, governance, and proven use cases with sufficient value bear the greatest responsibility?

Wed, May 7
4:00pm - 5:30pm

Roundtable Room 1 (Level 2)

Navigating global headwinds: Digital money in tokenized markets

Legislators and regulators are currently considering how to support and oversee financial market infrastructure that leverages DLT technology. This requires changes to the trading and post-trading infrastructure as well as targeted regulatory changes.

One of the key questions is what form of digital money will be used to settle transactions, i.e., what tokenized instruments will be allowed and fit for purpose? EU regulators seem to prefer wholesale CBDC over stablecoins. This coincides with the additional momentum for wholesale CBDC in the EU and synthetic CBDCs in the UK. However, CBDCs are not the only option – stablecoins and even tokenized money market funds (MMFs) may have a role to play. The emerging US approach will also shape market preferences and is likely to spill over into European policy discussion.

In this regard, this roundtable will bring together policymakers, technologists and financial sector experts to tackle the following main questions:

- What are the lessons learned from recent tokenization trials when it comes to the digital money used for settlement? What are the next steps in Europe and in the UK on developing the payment and settlement layer for tokenization?
- Can stablecoins play a role? What about other versions, like synthetic stablecoins, or tokenized MMFs?
- Are there fragmentation or liquidity risks if the UK or EU are out of step with other jurisdictions?
- How should regulators approach this?

Wednesday, 7 May 2025

Workshops

Wed, May 7
10:00am - 11:00am

Workshop Room 1 (Level
3)

Scaling Trust: The Future of Digital Assets and Transaction Processing in a Regulated and Interoperable World - Powered by IBM

The curation of content and speakers was wholly managed by IBM and does not reflect the views of the organisers or its staff.

Join us for a vivid discussion among financial system pioneers on the challenges for delivering digital assets at scale, followed by an exclusive deep dive into IBM's cutting-edge digital asset technologies and ecosystem collaborations.

This session unveils IBM's full-stack offerings, designed to support digital assets, including Central Bank Digital Currencies (CBDCs), Tokenized Deposits, and Securities - individually or in combination - to meet the evolving needs of financial institutions at scale.

We will explore how IBM ensures robust security and regulatory compliance, both today and in the future, while seamlessly integrating with open ecosystems. Discover the latest advancements in scalable, regulation compliant, privacy-preserving digital asset infrastructures and be the first to hear about open-source initiatives shaping the next generation of digital finance.

This session is presented by:

1. Alexandre Kech, Chief Executive Officer at Global Legal Entity Identifier Foundation (GLEIF)
2. Daniel Eidan, Advisor & Solution Architect at Bank for International Settlements, Innovation Hub
3. Karen Ottoni, Senior Director of Ecosystem and Strategic Initiatives, Linux Foundation
4. Oliver Kuepfer, Head IT, SIX Digital Exchange

Moderated by: Dr. Elli Androulaki, IBM Distinguished Engineer, IBM Research Europe

Wed, May 7
10:00am - 10:30am

Workshop Room 2 (Level
3)

Creating Community-Driven Defences for the Digital Frontier - Powered by TRM Labs

The curation of content and speakers was wholly managed by TRM Labs and does not reflect the views of the organisers or its staff.

In this workshop, we will have a solutions-focused discussion on how the digital asset community can take the lead in building proactive, community-driven defences against the threats facing the crypto ecosystem. From illicit finance and major hacks to fraud and nation-state interference, these risks continue to outpace law enforcement's ability to respond.

To ensure the long-term integrity and security of the digital asset space, industry must work together to harden defences. This workshop draws on lessons from traditional finance—particularly around Public-Private Partnerships (PPPs)—and explores how these models must evolve to meet the unique challenges of the crypto landscape.

Participants will engage in a practical discussion on what successful collaboration looks like, how to operationalise threat intelligence sharing, and what role each stakeholder must play in defending the digital asset ecosystem.

This session is presented by:

1. Magdalena Bošić, Head of RegTech & Crypto Compliance Services, Sygnum Bank
2. Todd McElduff, Enterprise Compliance Director, Binance
3. Patrick Green, Head of AML, Banking Circle

	Moderated by: Isabella Chase, Head of Policy EMEA, TRM Labs
Wed, May 7 10:00am - 10:30am Workshop Room 3 (Level 3)	<h2>Europe's Approach to the Future of Capital Markets: Regulated Secondary Markets on Public Permissionless Blockchains - Powered by Zühlke</h2> <p>The curation of content and speakers was wholly managed by Zühlke and does not reflect the views of the organisers or its staff.</p> <p>In this fireside chat, we will provide deep insights into the journey of two pioneers in this field: 21X and BX Digital. Both were the first to receive licenses in their respective jurisdictions (EU and CH) to operate a regulated exchange for tokenised securities on public blockchains and are about to launch their marketplaces soon. We will dive into their journey and take a look into the future.</p> <p>This is presented by:</p> <ol style="list-style-type: none">1. Dr Lidia Kurt, Chief Executive Officer, BX Digital2. Max Heinzle, Founder & Chief Executive Officer, 21X <p>Moderated by: Stefan Grasmann, Chief of Blockchain, Zühlke</p>
Wed, May 7 11:00am - 11:30am Workshop Room 3 (Level 3)	<h2>Closing the \$\$bn Gap: Entering a New Era in Financial Compliance and Enforcement - Powered by Taxbit</h2> <p>The curation of content and speakers was wholly managed by Taxbit and does not reflect the views of the organisers or its staff.</p> <p>With billions in crypto-related tax revenue going uncollected each year—and non-compliance rates as high as 90%—governments are confronting a significant enforcement gap. This session will unpack the far-reaching implications of the OECD's Crypto-Asset Reporting Framework (CARF), highlighting how it will redefine compliance expectations for both businesses and users. We'll also explore the rising importance of off-chain data under CARF and how authorities can bridge the gap between off-chain and on-chain sources to enable truly comprehensive financial crime investigations.</p> <p>What You'll Learn:</p> <ul style="list-style-type: none">- Why crypto tax compliance is currently broken – and what's driving the multi-billion dollar gap- How CARF's institutional reporting requirements will impact VASPs and reshape the compliance landscape- Practical insights into how leading crypto platforms are preparing for new mandates, including user self-certifications, transaction tracking, and reporting- Strategies to comply with minimal disruption to user experience and operational workflows- Cutting-edge approaches to integrating on-chain and off-chain data for holistic financial crime investigations <p>This session is presented by:</p> <p>Dr. Max Bernt, Global Head of Regulatory Affairs & MD Europe, Taxbit</p>
Wed, May 7 11:30am - 12:30pm Workshop Room 1 (Level 3)	<h2>The Interplay of CBDCs, Stablecoins, and Tokenized Deposits - Powered by Giesecke + Devrient</h2>

3)

The curation of content and speakers was wholly managed by Giesecke + Devrient and does not reflect the views of the organisers or its staff.

Ledger-based solutions, such as DLT and blockchain, are poised to significantly transform the global payment landscape. In this workshop we will examine the importance of Central Bank Digital Currencies (CBDCs) as a trust anchor in an ecosystem that includes multiple forms of digital money. Discussions will also cover how central banks, in collaboration with the private sector, are uniquely positioned to lay the groundwork for a tokenized economy, offering a regulated alternative to unregulated private initiatives. Leveraging the strengths of the current financial system, token-based digital currencies—such as retail and wholesale CBDCs, deposit tokens, and regulated stablecoins—have the potential to revolutionize the financial system by enhancing its efficiency, accessibility, and transparency for the benefit of consumers.

This workshop will equip participants with valuable perspectives that will contribute to shaping a visionary financial future, highlighting the importance of collaborative partnerships between central banks and the private sector.

This session is presented by:

1. Adeline Bachellerie, Deputy Director of Innovation and Financial Market Infrastructures, Banque de France
2. Basak Toprak, EMEA Head of Kinexys Digital Payments, J.P. Morgan
3. Dr. Wolfram Seidemann, Chief Executive Officer, Currency Technology, Giesecke+Devrient

Moderated by: Katie-Ann Wilson, Managing Director, Digital Monetary Institute, OMFIF

Is Synchronization a Viable Alternative Path to Achieving the Unified Ledger Vision? - Powered by Partior

The curation of content and speakers was wholly managed by Partior and does not reflect the views of the organisers or its staff.

Today's panel explores a timely and important question: Is synchronization a viable alternative path to achieving the unified ledger vision? As central banks, commercial institutions, and infrastructure providers work towards a unified ledger infrastructure vision that brings together tokenized money and assets on a shared infrastructure, an emerging view is that it is not necessary to have it on a shared ledger to unlock the benefits. Instead, synchronization, or coordinating actions across independent ledgers in a secure, atomic, and legally sound manner, offers a modular, scalable approach. Projects like BIS Meridian and the UK's RLN have shown that interoperability and orchestration may bring us closer to the unified ledger's promise. Let's explore whether this could be the more practical and powerful path forward.

This is presented by:

1. Daniel Eidan, Senior Advisor, Bank for International Settlements
2. Dovile Naktinyte, Strategy Manager, Payments & Settlements, Bank of England
3. Ryan Hayward, Head of Digital Assets and Strategic Investments, Barclays
4. Willy Lim, Assistant Director, Emerging Technology and CBDC, Central Bank of the UAE

Moderated by: Abhinav Goel, Head of Client solutions, Partior

Bridging TradFi and Stablecoins: How Financial Institutions Can Lead the Next Growth Phase - Powered by Solana

The curation of content and speakers was wholly managed by Solana and does not reflect the views of the organisers or its staff.

Banks are ideally positioned to bring stablecoins into the mainstream. This session looks at key leverage points: issuing regulated stablecoins, offering tokenized cash products, integrating stablecoins into payments, or supporting FX and trade finance use cases.

This is presented by:

1. Daniel Lee, Head of Web3, Banking Circle
2. Lu Yin, APAC Lead, Solana Foundation

Wed, May 7
3:00pm - 4:00pm

Workshop Room 3 (Level
3)

How is AI Reshaping Finance? - Powered by State Secretariat for International Finance

The curation of content and speakers was wholly managed by State Secretariat for International Finance and does not reflect the views of the organisers or its staff.

- Present the most recent developments in AI
- Discuss use cases demonstrating how AI is transforming the financial sector
- Goal: provide the participants with an overview of expected developments related to artificial intelligence in the financial sector

This is presented by:

1. Fernando Perez-Cruz, Senior Advisor, BIS & Professor Titular, ETH Zurich
2. Lisa Bechtold, Head of AI Governance, Zurich Insurance
3. Michel Neuhaus, Head AI, Data & Analytics, UBS

Moderated by: Eszter Major, Lawyer, State Secretariat for International Finance
