Forum Guide

23 - 25 June 2026 | Kongresshaus, Zurich

Three inflection points are **reshaping** European finance in 2026

The digital money Europe uses, the AI Europe scales, the rules that govern both, and the capital Europe can mobilise. Their consequences run through European finance, and every global firm operating in it.

97% of the global stablecoin market is USD-pegged. Will Europe's settlement standard be European?

With Euro- and Swiss Franc-denominated stablecoins entering the market and the Digital Euro in its next preparation phase, the choice now sits with:

- European banks and stablecoin issuers weighing their issuance strategy under MiCA
- Payment networks rebuilding rails for agentic commerce
- Corporate treasurers choosing what to settle in

The settlement standard that emerges decides who builds Europe's payments rails, and who profits from them

MiCA has landed. The AI Act's high-risk rules now apply 2 December 2027. Will Europe's rulebook hold at scale?

With MiCA transitional period ending 1 July and the AI Act classifying credit-scoring AI as high-risk, the rulebook now reaches:

- Digital asset firms in the MiCA licensing queue
- European banks and fintechs deploying AI in credit scoring, KYC, and customer onboarding
- Global firms whose access to 450 million EU customers depends on compliance

Europe's 2026 enforcement windows decide whether the rulebook delivers, and which firms can build under it.

EU equity markets sit at **73%** of GDP. US markets at **270%**. Can Europe close the gap to compete?

With the Savings and Investments Union action plan publishing this summer, the capital mobilisation runs through:

- European banks counting on a securitisation revival
- Pension funds and insurers redirecting long-term capital
- Founders weighing whether to list at home or in New York

The settlement standard that emerges decides who builds Europe's payments rails, and who profits from them.

The Defining Conversations of 2026

Across Forum Stage keynotes, panels, and closed-door roundtables under Chatham House Rule, the Forum convenes Europe's policymakers, Switzerland's financial leadership, and the industry building under both, on the choices ahead for the region's money, rules, and capital.

Opening Fireside Chat

H.E. Maria Luís Albuquerque, Commissioner for Financial Services and the Savings and Investments Union, European Commission

Karin Keller-Sutter, Federal Councillor and Head of the Federal Department of Finance, Switzerland

The Infrastructure Gap: What It Actually Takes to Put Assets

Burkhard Balz, Member of the Executive Board, Deutsche Bundesbank

Carolyn Rogers, Senior Deputy Governor, Bank of Canada

Sarah Breen, Deputy Governor, Bank of England

Leong Sing Chiong, Deputy Managing Director, Monetary Authority of Singapore

A Stocktake on the Digital Euro

Piero Cipollone, Member of the Executive Board, European Central Bank

Governing AI Agents and Frontier Models in Financial Services

Prof. Dr. Fritzi Köhler-Geib,
Member of the Executive
Board, Deutsche Bundesbank

Tommaso Mancini-Griffoli,
Head of the Innovation Hub,
BIS Innovation Hub

Kenneth Gay, Chief FinTech
Officer, Monetary Authority of
Singapore

ON THE FORUM STAGE

Tokenizing Trust: Programmable Money as the Infrastructure of Inclusive Global Finance

The \$320 Trillion Rewiring: Infrastructure, Rules and the Race to Move Money

MiCA, GENIUS, CLARITY and the Global Race to Write the Rules for Digital Assets

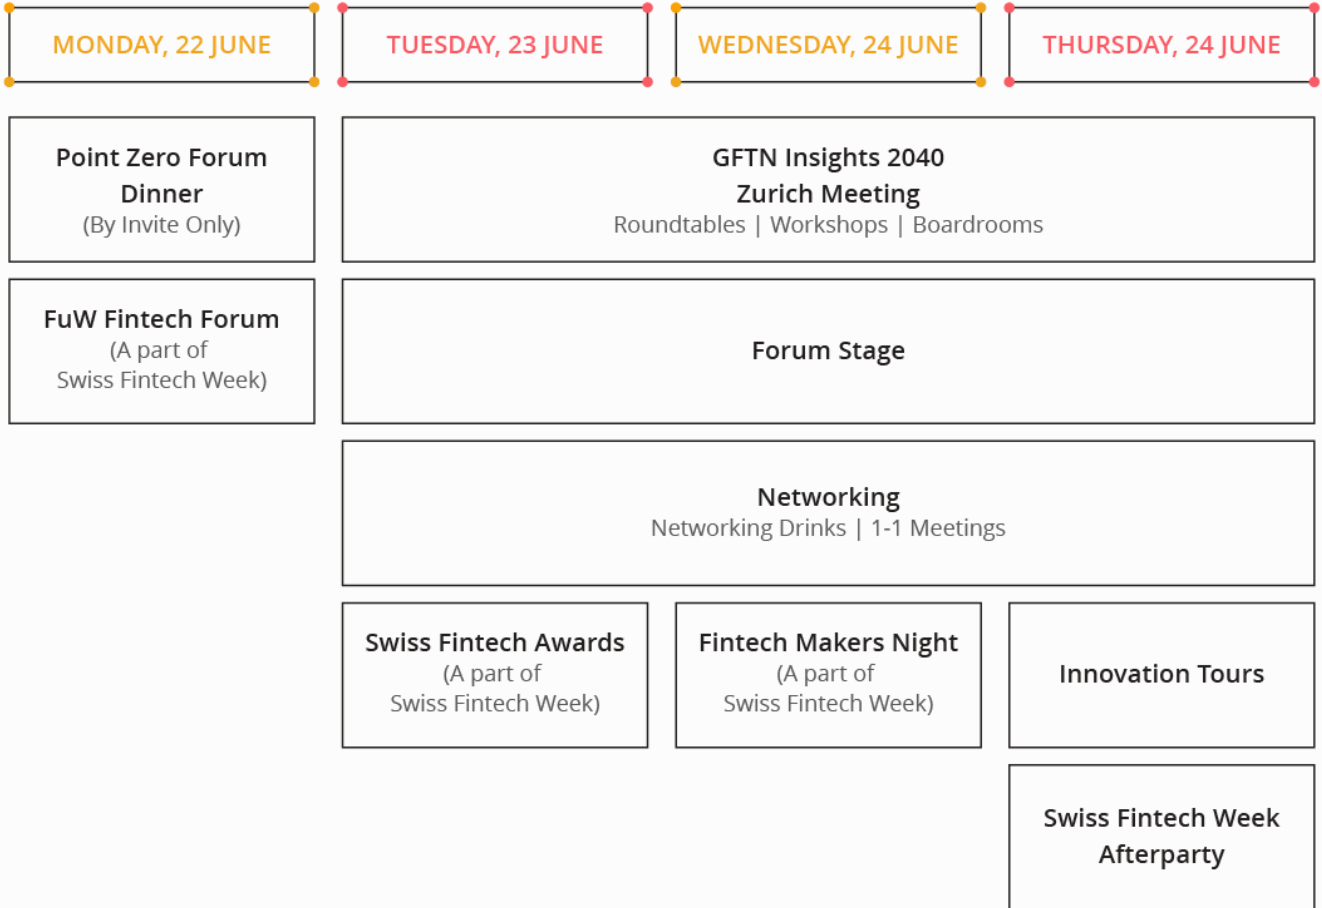

PUBLIC-PRIVATE ROUNDTABLES

Solving for the Fundamentals: Identity Wallets, Trust Infrastructure, and Preparing for the Agentic Economy

Agentic Commerce: Who Governs the Machine That Pays?

Governing AI Applications in Financial Services

Beyond the Stage

Point Zero Forum Dinner (by Invite Only)

22 June 2026

This exclusive, invite-only dinner is open to speakers, VIPs, and Executive Pass holders as the prime networking opportunity ahead of the Forum dialogue at the main venue.

1-1 Meetings

23-25 June 2026

Connect, exchange knowledge and explore partnerships with C-suite executives and regulators at our dedicated meetings area. Simply make your 1-1 bookings through our dedicated Point Zero Forum app.

Innovation Tours

25 June 2026

Various Locations Across Zurich

Gain exclusive access to leading Swiss companies and innovation labs on the final day of the Forum. The Innovation Tours give participants the unique opportunity to experience cutting-edge projects and developments, offering a deep dive into the latest trends and technologies driving innovation.

Daily Networking Drinks

23-25 June 2026

Daily, post-programme

Unwind and continue the day's conversations over complimentary drinks at the venue. Join fellow delegates, speakers, and sponsors each evening to connect in a relaxed setting.

Tuesday, 23 June 2026
Forum Stage

<p>Tue, Jun 23 8:50am - 9:00am</p> <p>Kongresssaal, Level 1</p>	<p>Welcome to Point Zero Forum 2026</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>
<p>Tue, Jun 23 9:00am - 9:30am</p> <p>Kongresssaal, Level 1</p>	<p>Opening Fireside Chat: Karin Keller-Sutter, Federal Councillor, Switzerland & H.E. Maria Luis Albuquerque, Commissioner, European Commission</p> <p>More details to follow soon.</p> <p>Speakers: Karin Keller-Sutter, Federal Councillor & Head of the Federal Department of Finance, Switzerland H.E. Maria Luis Albuquerque, Commissioner for Financial Services and the Savings and Investments Union, European Commission</p>
<p>Tue, Jun 23 9:30am - 9:45am</p> <p>Kongresssaal, Level 1</p>	<p>Keynote Speech by Alvin Tan, Minister of State, Singapore</p> <p>More details to follow soon.</p> <p>Speaker: Alvin Tan, Minister of State, Ministry of Trade and Industry and Ministry of National Development, and Board member of Monetary Authority of Singapore,</p>
<p>Tue, Jun 23 9:45am - 10:00am</p> <p>Kongresssaal, Level 1</p>	<p>Welcome Address by Agustín Carstens, International Advisory Board, GFTN</p> <p>More details to follow soon.</p> <p>Speaker: Agustín Carstens, International Advisory Board Member, Global Finance & Technology Network (GFTN); Visa Economic Empowerment Institute Member, Visa; Former General Manager, Bank for International Settlements (BIS),</p>

<p>Tue, Jun 23 10:00am - 10:20am</p> <p>Kongresssaal, Level 1</p>	<h3>Tokenizing Trust: Programmable Money as the Infrastructure of Inclusive Global Finance</h3> <p>As programmable money matures from stablecoin to full financial infrastructure, the question shifts from whether it works to who it serves and how it's governed. This fireside with Tether CEO Paolo Ardoino explores the role of programmable assets in building a faster, more inclusive, and global financial system.</p> <p>Speaker: Paolo Ardoino, Chief Executive Officer, Tether</p> <p>Moderator: Stephendu Mohanty, Group Chief Executive Officer, Global Finance & Technology Network (GFTN)</p>
<p>Tue, Jun 23 10:20am - 10:35am</p> <p>Kongresssaal, Level 1</p>	<h3>The Global State of SupTech: Keynote by Marlene Amstad, Chair, FINMA</h3> <p>More details to follow.</p> <p>Speaker: Marlene Amstad, Chair, Swiss Financial Market Supervisory Authority (FINMA)</p>
<p>Tue, Jun 23 11:05am - 11:55am</p> <p>Kongresssaal, Level 1</p>	<h3>The Governance of Agentic AI and Frontier Models in Financial Services</h3> <p>Even as AI becomes increasingly systemic in financial services, the development of autonomous agents and frontier models with unprecedented capabilities are posing new challenges to existing AI governance frameworks, which remain a work-in-progress across jurisdictions around the world.</p> <p>As AI systems become more autonomous and deeply embedded in financial institutions and financial market infrastructures, the session will explore how authorities can ensure resilience, trust, and responsible adoption while managing emerging operational, governance, and cyber risks. The session will also focus on the safeguards, standards, and governance frameworks needed to support trustworthy AI deployment as well as the role of central banks and regulators in shaping the future of AI in the financial system.</p> <p>Speakers: Prof. Dr. Fritz Köhler-Geib, Member of the Executive Board, Deutsche Bundesbank Kenneth Gay, Chief FinTech Officer, Monetary Authority of Singapore Ryosuke Ushida, Director for International Policy, International Affairs Office, Financial Services Agency of Japan (JFSA) Tommaso Mancini-Griffoli, Head of the Innovation Hub, BIS Innovation Hub</p> <p>Moderator: Joasia E. Popowicz, Associate Editor, Central Banking Publications</p>

Tue, Jun 23
11:55am - 12:35pm

Kongresssaal, Level 1

The Agentic Leap: Deploying AI at Scale in Financial Services

AI agents are moving from impressive demos to live deployments - developing software, executing trades, processing credit decisions, managing liquidity, and engaging clients. But scaling agentic AI across a regulated institution demands more than a powerful model; it requires deliberate choices across all five layers of the stack, from energy and compute infrastructure to cloud architecture, model selection, and application design. This session maps the full journey from pilot to production - where the industry is succeeding, where it is stalling, and what the roadmap to truly intelligent financial services looks like.

Speakers:

Giuliano Benjamin Clark, Head of Product, Agentic Payments, Amazon

Ian Rogers, Chief Human Agency Officer, Ledger

Dr. Jochen Papenbrock, EMEA Head of Financial Technology, NVIDIA

Nicolas de Skowronski, Head Digital Business Transformation, Bank Julius Baer & Co. Ltd.

Tin Pei Ling, Co-President, MetaComp

Moderator:

Arjun Vir Singh, Partner, Global Head of Fintech & Digital Assets, Arthur D. Little

Tue, Jun 23
1:20pm - 2:00pm

Kongresssaal, Level 1

From Pilots to Plumbing: How Switzerland Is Building the Infrastructure for Programmable Money

Switzerland is not debating whether programmable money works - it is building it. Various pilots are now looking to answer the same question: how does programmable money move from laboratory to the infrastructure layer of everyday finance? This session examines where deposit tokens, stablecoins, and CBDCs serve genuinely different use cases, and what the rest of the world can learn from the Swiss approach.

Speakers:

Dr. Alexander Thoma, Head of Digital Assets, PostFinance

Frederik Gregaard, Chief Executive Officer, Cardano Foundation

Dr. Roman Studer, Chief Executive Officer, Swiss Bankers Association

Stephanie K. Wickihalder, President, Swiss FinTech Innovations | SFTI

Moderator:

Stefan Grasmann, Group Head of Thought Leadership & Chief of Blockchain, Zühlke

<p>Tue, Jun 23 2:00pm - 2:30pm</p> <p>Kongresssaal, Level 1</p>	<h2 style="color: #E91E63;">Policymakers' Dialogue: Forging Europe's Strategic Autonomy in Finance</h2> <p>Europe's pursuit of digital sovereignty has become increasingly critical to financial and technological policy. As payments infrastructure, cloud services, digital identity systems, and digital currencies intersect with geopolitics, European policymakers are working to reduce strategic dependencies while maintaining financial stability, fintech prowess, and global openness.</p> <p>This session explores how European financial institutions can implement strategic autonomy without fragmenting the global financial system, the role of regulators in fostering conditions for greater digital self-reliance, and the practical steps needed to ensure Europe's financial system remains competitive, innovative, and resilient.</p> <p>Speakers: Daniela Stoffel, State Secretary, State Secretariat for International Finance (SIF) Januš Kizenevič, Vice-Minister of Finance, Ministry of Finance of the Republic of Lithuania Peter Kerstens, Advisor, DG FISMA, European Commission Steven Maijor, Executive Board Member, De Nederlandsche Bank</p> <p>Moderator: Prof. Ross Buckley, Scientia Professor, UNSW Sydney</p>
<p>Tue, Jun 23 2:30pm - 3:05pm</p> <p>Kongresssaal, Level 1</p>	<h2 style="color: #E91E63;">Industry Dialogue: Cloud, Control and Capital - What Digital Sovereignty Means for European Financial Institutions</h2> <p>The geopolitical case for European digital sovereignty is clear. The practical reality is harder. Across cloud infrastructure, AI models, data residency and application layers, European financial institutions are making decisions today about what to keep within the EU and how to structure arrangements that satisfy DORA, the EU AI Act and GDPR simultaneously. This session brings together the architects of the Financial Tech stack to ask the honest questions: what sovereignty is technically achievable, what it genuinely costs, and where the gap between regulatory requirement and operational reality remains dangerously wide for financial services.</p> <p>Speakers: Dr. Alessandro Curioni, IBM Fellow, Vice President, Europe & Africa and Director, IBM Research - Zurich, IBM Research Martin Merz, President, Sovereign Cloud Solutions, SAP Sarah Levy, Head Swiss AI Platform, Swisscom</p> <p>Moderator: Oliver Bussmann, Chief Executive Officer, Bussmann Advisory</p>

<p>Tue, Jun 23 3:05pm - 3:45pm</p> <p>Kongresssaal, Level 1</p>	<h3>Tokenization 101 for Finance: What's Being Built, How, and Why It Matters</h3> <p>The word tokenisation gets used everywhere - but the infrastructure behind it is more nuanced, more varied, and more consequential than most realise. From fractionalised real estate to on-chain private credit to tokenised government bonds, this session deconstructs the mechanics of how different asset classes are brought on-chain, who the key players are, and what the market actually looks like in 2026.</p> <p>Speakers: Fernando Vázquez, President, Capital Markets, Chainlink Fiona Murray, Vice President & Managing Director, Asia Pacific, Ripple Kara Kennedy, Global Head of Market Development, Kinexys Kirit Bhatia, Chief Digital Assets Officer, Banking Circle Michelle Neal, Chief Executive Officer, Fnality</p> <p>Moderator: Dushyant "D" Shahrawat, Crypto & Digital Asset Market Structure, Bloomberg</p>
<p>Tue, Jun 23 3:45pm - 4:25pm</p> <p>Kongresssaal, Level 1</p>	<h3>Tokenized Equities: How the Stock Market Gets Rebuilt On-Chain</h3> <p>Recent tokenisation pilots signal that T+0 equity settlement is no longer theoretical - it is arriving, and it will change how shares are issued, traded, and held. Digital exchanges, wealth managers, platforms and custodians now face a fundamental question: how do you integrate on-chain equities into portfolios and platforms? This session brings together the architects of digital equity tokens to map what the transition actually requires.</p> <p>Speakers: Irina Chuchkina, Chief Growth Officer, Wallet in Telegram Lamine Brahimi, Co-founder & Managing Partner, Taurus Marco Kessler, Head Product and Business Development for Digital Assets, SIX Group Nicola White, Vice President, Institutional Crypto, General Manager, Bitstamp, Robinhood Oya Celiktemur, Director, EMEA, Ondo Finance</p> <p>Moderator: Lars Sjögren, Board Director, NFT Ventures AB</p>
<p>Tue, Jun 23 4:25pm - 5:05pm</p> <p>Kongresssaal, Level 1</p>	<h3>Tokenization, Stablecoins and DeFi: How Institutions Are Going On-Chain</h3> <p>Institutional finance is no longer watching stablecoins and DeFi from the sidelines - a growing cohort of banks and asset managers are deploying capital into permissioned on-chain liquidity pools, tokenised collateral markets, and stablecoin-settled instruments. This session explores how institutions are building the frameworks, partnerships, and guardrails to participate in on-chain markets at scale - and what it will take to bring the rest of the industry with them.</p> <p>Speakers: Elif Bilgi Zapparoli, Head of International Client Strategy, Bank of America Jean-Marc Stenger, Chief Executive Officer, Societe Generale-FORGE Julian Sawyer, Chief Executive Officer, Zodia Custody Sergio Mello, Global Head of Stablecoin Solutions, Anchorage Digital Jonathan Jachym, Global Head of Policy & Market Structure, Payward</p> <p>Moderator: Josh Lipsky, Vice President & Chair, International Economics, Atlantic Council</p>

<p>Tue, Jun 23 5:05pm - 5:45pm</p> <p>Kongresssaal, Level 1</p>	<h2 style="color: #e91e63;">On-Chain Settlement: The Infrastructure for Atomic Finality</h2> <p>The promise of blockchain settlement has always been atomicity - simultaneous exchange of asset and payment, with finality in seconds rather than days. Live pilots from major exchanges, custodians, and correspondent banks are proving the technology works; the harder challenge is rebuilding the legal frameworks, operational workflows, and legacy infrastructure that surround it. This session examines what it genuinely takes to move from today's T+1 standard to a world where settlement is instantaneous, global, and always on.</p> <p>Speakers: Emanuel Vila, Director, Strategy and Innovation, CEO Office, CLS Services Isadora Arredondo, Vice President, Global Policy, Hedera Ryan Hayward, Managing Director, Digital Assets, Barclays Sébastien Van Campenhoudt, Director, Innovation & Digital Assets, Tokenized Cash Lead, Euroclear Tim Way, Senior Director, Global Banking Initiatives Lead, Fireblocks</p> <p>Moderator: Laura Navaratnam, UK Policy Lead, Crypto Council for Innovation</p>
<p>Tue, Jun 23 5:45pm - 6:00pm</p> <p>Kongresssaal, Level 1</p>	<h2 style="color: #e91e63;">Transforming Global FX Markets</h2> <p>What happens when longstanding market infrastructure meets programmable finance? Join industry leaders for a look at an emerging model that could reshape how value moves across borders, reduce settlement friction, and unlock new efficiencies in global financial markets.</p>

Tuesday, 23 June 2026
GFTN Insights™

<p>Tue, Jun 23 12:00pm - 1:30pm</p> <p>Roundtable Room 1, Ground Floor</p>	<h3>AI Pathfinders: Racing Ahead or Playing It Safe?</h3> <p>This roundtable discussion will examine the critical transition from establishing AI governance principles to their practical implementation across organisations. Participants will explore how to effectively translate high-level frameworks into actionable policies and oversight mechanisms, addressing current implementation barriers and sharing proven strategies for embedding responsible AI practices. The discussion will particularly focus on preparing governance frameworks for emerging technologies such as agentic AI systems in finance.</p> <p>Speakers: Yip Shue Heng, Managing Director, Head of Asia Digital Strategy, MUFG Bank, Ltd. Simon Taylor, GTM, Tempo Thiébaut Meyer, Director, Office of the CISO, Google Cloud Frankie Phua, Managing Director & Head, Group Risk Management, UOB Caroline Louveaux, Chief Privacy, AI & Data Responsibility Officer, Mastercard Sam Hinton-Smith, Head of International Public Policy, Stripe</p> <p>Moderator: Alan Lim, Director & Head, Financial Infrastructure & Artificial Intelligence Office, Monetary Authority of Singapore</p>
<p>Tue, Jun 23 12:00pm - 1:30pm</p> <p>Roundtable Room 3, Ground Floor</p>	<h3>Agorá - How Moving Money Matters</h3> <p>Project Agorá tests the hypothesis that a multi-currency settlement mechanism that leverages tokenisation and programmability could mitigate inefficiencies and frictions in cross-border payments, making them faster, more transparent and safer.</p> <p>To examine this, the Bank for International Settlements (BIS) and the Institute of International Finance (IIF) combined forces to convene seven central banks and over 40 international financial institutions to test the tokenisation of commercial bank deposits and central bank reserves on a unifying ledger. The roundtable will bring together Project Agorá public and private sector participants to reflect on the project and lessons learned.</p> <p>Speakers: Audrey Metzger, Director of Innovation & Financial Market Infrastructures, Banque de France Holger Neuhaus, Head of Market Innovation & Integration, European Central Bank Jesse McWaters, EVP, Head of Global Policy, Mastercard Marianne Zentriegen, Head of Payment Journeys, PostFinance AG Masashi Watanabe, Managing Director, Head of Digital Assets, MUFG Bank, Ltd. Nick Kerigan, Managing Director, Head of Innovation, Swift Sabih Behzad, Head of Digital Assets & Currencies Transformation, Deutsche Bank AG London Zou Xiaonan, Executive Director, Group Digital Assets; Head of Digital Assets, Group Treasury, UBS</p> <p>Moderator: Jessica Renier, Managing Director & Head of Digital Finance, Institute of International Finance (IIF)</p>
<p>Tue, Jun 23 12:00pm - 1:30pm</p> <p>Roundtable Room 2, Ground Floor</p>	<h3>Agentic Commerce: Who Governs the Machine That Pays?</h3> <p>AI agents are already initiating real financial transactions - booking, subscribing, settling, and disbursing without a human approving each step. The commerce and payments infrastructure built around human decision-makers was not designed for a counterparty that never sleeps, cannot be held to a contract in the traditional sense, and can be compromised at the model layer rather than the credential layer.</p>

This session convenes payments architects, legal practitioners, and AI deployment leads to work through the practical questions the industry is looking to answer: how do you authenticate an agent, assign liability for an autonomous transaction gone wrong, and design governance frameworks for a technology that is already in production.

Participants will examine the specific mechanics of agentic payment flows - wallet delegation architectures, spending limit enforcement, multi-agent authorisation chains, and the emerging standards around agent identity that are still being written in real time by consortia that have not yet reached consensus.

The session will also surface the fraud and risk management implications: how transaction monitoring systems designed to flag anomalous human behaviour respond to the high-frequency, pattern-consistent activity of a well-functioning agent - and what entirely new risk frameworks may be required when the buyer is a model, the merchant is an API, and the dispute resolution process was designed for neither.

Speakers:

Amira Karim, Head of International Public Policy, Payments & Financial Services, Amazon

Caroline Louveaux, Chief Privacy, AI & Data Responsibility Officer, Mastercard

Chan Yam Ki, Managing Director, Asia Pacific, Circle

Colin Payne, Head of Innovation, Financial Conduct Authority (FCA)

Dea Markova, Director of Policy, Fireblocks

Georg Schneider, Global Head of RWA, Digital Asset

Nicole Sandler, Chief Ecosystem Officer, Ubyx Inc

Simon Taylor, GTM, Tempo

Sophie Gilder, Managing Director, Blockchain & Digital Assets, Commonwealth Bank Australia

Tang Wei, Head of Public Policy, Southeast Asia & Greater China, Stripe

Thibault Murel, CISO, DFNS

Moderator:

Jaskaran Bhalla, Head of Content, Global Finance & Technology Network (GFTN)

Tue, Jun 23
2:00pm - 3:30pm

Roundtable Room 1,
Ground Floor

AI Pathfinders: The Agentic Frontier

The Roundtable discusses financial sector AI adoption and development as financial institutions move into Agentic AI. Hear from leaders in leading financial institutions and the AI innovation space on practical financial sector enterprise AI, considerations of collective AI toolkits and the transformational impact on new AI native business models.

Speakers:

Charlotte Wood, Global Head of AI & Innovation, Schroders

Imam Hoque, Co-Founder, Quantexa

Kelvin Li, General Manager of Platform Tech, Ant International

Luke Waddington, Chief Executive Officer & Co-Founder, Blue Fire AI

Maria Apazoglou, Group Head of AI Engineering & Platforms, Zurich Insurance Group

Nivesh Pawar, Managing Director, Partners Group

Shayan Hazir, Chief Digital Officer, Asia (xHK) & MENAT, HSBC

Tobias Schweiger, Co-Founder and Chief Executive Officer, Hawk AI

Moderator:

Kenneth Gay, Chief FinTech Officer, Monetary Authority of Singapore

Tue, Jun 23
2:00pm - 3:30pm

Roundtable Room 3,
Ground Floor

Central Banking in the Age of AI: Cybersecurity, Resilience and Trusted Adoption

AI adoption by central banks, the financial institutions they supervise, and in financial systems and infrastructure is growing, even as AI's capabilities and the AI risk landscape is rapidly evolving.

Increasingly powerful frontier models can enhance efficiency and decision making, whilst posing cybersecurity and financial system resilience risks as they can autonomously identify and exploit software vulnerabilities, raising significant implications for critical financial infrastructure such as national payment systems and the wider financial industry.

This roundtable discusses how central banks can prepare and respond to the next and future generations of AI capabilities and risks, ensuring cybersecurity, resilience and the trusted adoption of AI. The session will highlight best practices, challenges, lessons learnt and opportunities for cross-border collaboration in implementing and scaling AI safely and securely.

Speakers:

Colin Payne, Head of Innovation, Financial Conduct Authority (FCA)

Dr. Jochen Papenbrock, EMEA Head of Financial Technology, NVIDIA

Laura Tamayo, Data, AI, & Business Development Director, Iberpay

Michael Jefferson, Head of Financial Services Public Policy Africa, Middle East, Switzerland & UK, Amazon Web Services

Díaz Miguel, Deputy Head of the BIS Innovation Hub and Head of Strategy, Bank for International Settlements (BIS)

Dr. Nino Landerer, Deputy Director General Strategy & Innovation, Deutsche Bundesbank

Randall Duran, Senior Lecturer, Singapore Management University

Sonja Davidovic, Senior Digital Expert on Transformative Technology, International Monetary Fund

Trevor Fitzpatrick, Head of Division, Central Bank of Ireland

Moderator:

Díaz Miguel, Deputy Head of the BIS Innovation Hub and Head of Strategy, Bank for International Settlements (BIS)

Tue, Jun 23
2:00pm - 3:30pm

Roundtable Room 2,
Ground Floor

The Future of Commercial Bank Money On-Chain

As the adoption of stablecoins accelerates globally, policymakers and financial institutions are confronting a deeper structural question: what form of money will anchor the next generation of digital finance?

Deposit tokens have emerged as one of the leading responses to this challenge, combining the safeguards of the traditional banking system with the programmability and efficiency of distributed ledger technology. However, despite growing institutional interest, most initiatives remain confined to pilots and closed networks, even as stablecoins rapidly achieve scale, distribution, and integration across digital asset ecosystems.

This roundtable brings together banks, infrastructure providers, and policymakers to examine the regulatory, legal, operational, and governance challenges that constrain adoption of tokenized deposits, and the extent to which deposit tokens will coexist with or compete against stablecoins and other forms of digital money. It will also explore the growing push by jurisdictions worldwide to develop local-currency stablecoins as a strategic counterweight to dollar-denominated instruments and what these twin approaches - local currency stablecoins vis-a-vis on-chain commercial bank money - mean for the future shape of digital money.

Critically, the discussion will pose a broader strategic question for policymakers and financial institutions alike: whether tokenized commercial bank deposits can provide a sovereign and trusted foundation for the digital economy, or whether the future of digital money will be predominantly shaped by private stablecoin ecosystems, and the role of jurisdiction-specific stablecoin models therein.

Speakers:

Mai Kaneko, International Business Lead, DeCurret DCP Inc.

Omar Azhar, VP of Business Development, Matter Labs | ZKsync

Aymeric Salley, Head of Digital Assets Platform, Banking Circle

Manuel Klein, Head of Market Management Payments & Digital Currencies, Deutsche Bank

Sébastien Van Campenhoudt, Director, Innovation & Digital Assets, Tokenized Cash Lead, Euroclear

	<p>Moderator: Erwin Voloder, Director, Research & Strategy, Blockchain For Europe</p>
<p>Tue, Jun 23 4:00pm - 5:30pm</p> <p>Roundtable Room 1, Ground Floor</p>	<p>Practical Settlement Options in Tokenised Markets</p> <p>The development of tokenized settlement assets plays a key role in enhancing liquidity and improving settlement efficiency in financial services. Yet the diversity of settlement assets – regulated stablecoins, tokenized deposits, tokenized central bank reserves – could introduce fragmentation and substitution risk if token interoperability, yield and incentive mechanisms, and financial stability considerations are not well addressed.</p> <p>This roundtable brings together the financial industry and policymakers to address the multi-faceted considerations for tokenized settlement assets, ensuring they are fit-for-purpose across banking, capital markets, and wholesale payments.</p> <p>Speakers: Dr. Anna-Naomi Bandi-Lang, Executive Director, Digital Asset Structuring, UBS Investment Bank Sunil Pant, Executive Director - Kinexys by JP Morgan, JP Morgan Chase Tang Wei, Head of Public Policy, Southeast Asia & Greater China, Stripe Vid Hribar, Head of Institutional Partnerships, Qivalis Kelvin Li, General Manager of Platform Tech, Ant International Dante Disparte, Chief Strategy Officer and Head of Global Policy & Operations, Circle</p> <p>Moderator: Alan Lim, Director & Head, Financial Infrastructure & Artificial Intelligence Office, Monetary Authority of Singapore</p>
<p>Tue, Jun 23 4:00pm - 5:30pm</p> <p>Roundtable Room 3, Ground Floor</p>	<p>Measuring What Matters: Building a Global Index for the Future of Fintech Regulation</p> <p>Countries worldwide are competing to attract fintech investment, talent, and innovation. But understanding the quality of fintech regulation remains a work-in-progress. Are rules and institutions working in lockstep to promote fintech? Are these rules findable, coherent, and comprehensive enough to give firms, consumers, and supervisors genuine confidence? Can they promote innovation, market access as well as economic opportunity?</p> <p>The Financial Regulatory Futures Index (FRFI) is a joint initiative of the Fintech Foundation and GFTN designed to fill that gap. Structured around five analytical pillars, the FRFI will assess regulatory environments not by perception or reputation, but by reference to verifiable primary sources: statutes, supervisory guidance, licensing frameworks, and enforcement records. Its methodology is being developed by five specialist working groups comprising leading regulators, central bankers, academics, and industry practitioners from over 30 jurisdictions. An Executive Council – comprising globally recognized thought-leaders and experienced policy innovators – will oversee the development of this initiative.</p> <p>This roundtable will offer one of the first public windows into the emerging draft methodology, including how the Index defines and scores: regulatory clarity and comprehensiveness, consumer protection and market conduct, innovation and market infrastructure, resilience and integrity as well as economic opportunity and market access.</p> <p>It will open a moderated discussion on the Index's intended policy impact, the trade-offs embedded in any cross-jurisdictional benchmarking exercise, and how the FRFI can best serve as a tool for peer learning and reform rather than as a simplistic league table. Feedback from regulators, practitioners, academics and subject matter experts in this conversation will inform the methodology ahead of its launch at DC Fintech Week in October 2026.</p> <p>Speakers:</p>

Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)
Peter Kerstens, Advisor, DG FISMA, European Commission
Tanvi Singh, Board Member, Advisor & Founder, Qubera AG
Aqsa Zubair, Deputy Director, FinTech Supervision, Bermuda Financial Authority
Alisha Chhangani, Associate Director, Future of Money, Atlantic Council
Camilla Bullock, Chief Executive Officer, Emerging Payments Association Asia

Solving for the Fundamentals: Identity Wallets, Trust Infrastructure, and Preparing for the Agentic Economy

By the end of 2026, all EU member states will be required to issue the European Digital Identity Wallet (EUDI), with a goal of achieving 80% voluntary adoption by 2030.

While much of the current focus has been on user adoption and interoperability, a more fundamental shift in the economy is underway: the rise of AI agents capable of acting, transacting, and coordinating on behalf of individuals and businesses. This raises a critical question: how can these agents be trusted to act, transact, and take decisions safely across platforms and jurisdictions?

Identity-wallets and verifiable credentials hold the potential to become foundational trust infrastructure that unlocks this shift, by authenticating identity, delegating authority from human to agent, and resolving KYC and liability questions. With the right design choices today, the EUDI could evolve into a global benchmark not just for digital identity, but for programmable, interoperable trust.

Yet, critical questions remain around adoption, sustainable business models, and resilience to emerging technological risks. As the deadline draws closer, this roundtable will convene financial institutions, digital identity and verifiable credentials providers, technologists, and policymakers to examine key design and coordination challenges and trade-offs facing identity wallet ecosystems today.

Speakers:

Aoife Houlihan, Vice President, Government Affairs, Visa
Gary Liu, Co-Founder & Chief Executive Officer, Terminal 3
Isabella Chase, Head of Policy, EMEA, TRM Labs
Livia Benisty, Chief External Affairs Officer, Banking Circle
Dr. Nicolas Jacquemart, Chief Legal Officer, Cardano Foundation
Patrick Hansen, Senior Director, EU Strategy & Policy, Circle
Mai Fujimoto, Co-Founder, zERC20

Moderator:

Ivan Mortimer-Schutts, Global Head of vLEI, Global Legal Entity Identifier Foundation (GLEIF)

Workshops

<p>Tue, Jun 23 11:30am - 12:00pm</p> <p>Workshop Room, Level 1</p>	<p>Crypto Rails for Everyday Payments: Building the User, Regulatory, and Trust Layers That Make It Work! - Powered by Kraken (Payward)</p> <p>Payments is where crypto either earns its place in the real economy or doesn't. Stablecoins now move meaningful volume, but most everyday users still can't navigate wallet addresses, and most regulators are still working out how to supervise a payment instrument that settles on public infrastructure. The gap between "technically possible" and "actually used at scale" is the most interesting policy and product problem in the space right now.</p> <p>Speakers: Nick Gersh, Senior Regulatory Counsel, Paxos Evaldas Ruzgys, Member of the Board, Bank of Lithuania</p> <p>Moderator: Jonathan Jachym, Global Head of Policy & Market Structure, Payward</p>
<p>Tue, Jun 23 12:30pm - 1:30pm</p> <p>Workshop Room, Level 1</p>	<p>Catalyzing Global Impact: The Official Launch of the Financial Access & Sustainable Empowerment Foundation (FASE) Foundation - Powered by Tether</p> <p>Join us for the official launch of the Financial Access and Sustainable Empowerment (FASE) Foundation, a Swiss not-for-profit multi-stakeholder collective. This interactive session will introduce our four strategic pillars: Financial Safety, Financial Inclusion, Access to Resources, and Responsible AI & Robotics. Participants will:</p> <ul style="list-style-type: none"> • Learn how FASE unites private, non-profit, and institutional actors to solve systemic global challenges. • Gain insights into our current pilot projects, including cybercrime prevention with UNODC and victim assistance with the UN Trust Fund. • Discover opportunities to join the Foundation's Founding Members Group to drive scalable, inclusive development.
<p>Tue, Jun 23 2:00pm - 3:00pm</p> <p>Workshop Room, Level 1</p>	<p>Resilience Runs on Trust: Securing Payments in an Uncertain World - Powered by Visa</p> <p>Today's heightened geopolitical uncertainty (fragmentation, cyber risk, and macroeconomic volatility) is testing the resilience of the global payments system, which depends fundamentally on trust and security to function at scale.</p> <p>This session explores how public authorities and the private sector can work together to preserve confidence, continuity, and cross-border connectivity through information-sharing, interoperable standards, and regulatory approaches that strengthen resilience without fragmenting the ecosystem. It also explores how Visa is innovating for resilience, including through offline solutions that safeguard transactions in low-connectivity or high-risk environments.</p> <p>The discussion aims to highlight how security and fraud prevention are not peripheral issues but core pillars of payments resilience.</p> <p>Speakers: Agustín Carstens, International Advisory Board Member, Global Finance & Technology Network (GFTN);</p>

	<p>Visa Economic Empowerment Institute Member, Visa; Former General Manager, Bank for International Settlements (BIS), Todd Fox, President of Visa Economic Empowerment Institute, Visa Peter Kerstens, Advisor, DG FISMA, European Commission</p>
<p>Tue, Jun 23 3:30pm - 4:30pm</p> <p>Workshop Room, Level 1</p>	<h3>Breaking the Speed Barrier: How to Address the Structural Frictions in Cross-border Payments - Powered by Swift</h3> <p>Cross-border payments are the lifeblood of the global economy, underpinning trade, remittances, investment and financial connectivity. As technology has advanced and economies have become increasingly interconnected, expectations for international transfers have evolved too. Progress has been made, with 75% of payments travelling over Swift reaching destination banks within just 10 minutes. But frictions remain, particularly at the 'last mile' of a payments journey, where 80% of the total time is spent before it is credited to the end account or wallet.</p> <p>Emerging technologies, including blockchain, promise a real-time, 24/7 reality. But innovation in cross-border payments will not come from new rails alone. It will emerge from steady progress in resolving structural frictions - improving data quality, harmonising standards, strengthening coordination and enhancing transparency across the value chain.</p> <p>In this interactive session hosted by Swift, experts will discuss the structural frictions identified in Swift's Payment Optimisation Index and provide practical insights on what institutions can do to improve the overall speed and transparency of cross-border payments.</p> <p>Speaker: Mike Truter, Director, Head of Industry Engagement, Swift</p>
<p>Tue, Jun 23 5:00pm - 6:00pm</p> <p>Workshop Room, Level 1</p>	<h3>The New Crisis Architecture: Digital Platforms and the Future of Global Citizen Financial Protection - Powered by GCash</h3> <p>Crises today - geopolitical, climatic, cyber, or economic - move faster than traditional institutions can respond. At the same time, millions of people now live financial lives that cross borders: OFWs, tourists, digital nomads, expats, and cross-border families who remain deeply connected to their home states even while living abroad. When disruptions occur, these global citizens rely on digital rails to stay financially secure and emotionally anchored.</p> <p>In this environment, digital platforms have become core components of national crisis infrastructure, ensuring continuity of payments, identity assurance, and access to timely support. The Philippines offers a compelling example: during the recent global crisis, GCash, the Philippines' leading finance platform, activated targeted, time-bound interventions—including remittance support measures, accelerated verification, and relief pathways—within a regulatory framework that enabled agility without altering long-term commercial models.</p> <p>This workshop explores how Digital Public-Private Partnerships (Digital PPPs) can strengthen national resilience by enabling fintechs and regulators to collaborate on crisis-ready financial architecture. Through a human-centered persona activity, participants will examine how global citizens experience crises and what digital and regulatory systems must be in place to protect them.</p> <p>Speaker: Arjun Varma, General Manager, GCash International</p>

Tuesday, 23 June 2026

Boardrooms

<p>Tue, Jun 23 12:00pm - 1:30pm</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] Lunch Briefing: Unlocking Stablecoin Payments at the Point of Sale - Powered by Bluecode</p> <p>The promise of digital currencies for everyday commerce remains largely untapped. While DeFi innovations are rapidly evolving, the seamless integration of stablecoin payments into existing fiat acceptance networks at the point of sale presents a significant hurdle. For digital currencies to achieve mainstream adoption, they must transition from speculative assets into practical, everyday payment tools. How can we bridge the gap between DeFi ecosystems and traditional fiat acceptance networks to unlock this potential?</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p>
<p>Tue, Jun 23 2:00pm - 3:30pm</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] The Sovereignty Stakes: Navigating USD Dominance in the Tokenized Economy - Powered by BCG</p> <p>As tokenized money moves from experimental pilots to systemic infrastructure, a new "Monetary Frontier" is emerging. While USD-denominated stablecoins offer unparalleled liquidity and efficiency, they present a profound strategic challenge to regional monetary sovereignty - particularly across Asian markets.</p> <p>This closed-door Boardroom powered by BCG will convene a curated assembly of central bankers, senior commercial leaders, and infrastructure innovators to stress-test the future of regional financial architectures. We will move beyond the technical "how-to" of tokenization to debate the hard strategic choices: Can Asian markets build resilient local-currency alternatives that compete with dollar hegemony, or will the "tokenized world" inadvertently entrench a new era of USD dominance?</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p>
<p>Tue, Jun 23 4:00pm - 5:30pm</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] Who Supervises a Global Stablecoin? Navigating the Multi-Issuance Frontier - Powered by Stripe</p> <p>Stablecoins are global by design, yet their regulatory oversight remains stubbornly local. As regulations evolve across jurisdictions, a multi-issuance model is emerging — where a single global stablecoin is issued by separate, supervised entities in multiple markets. While token holders experience seamless fungibility, regulators grapple with fragmented reserves, unclear redemption chains, and the potential for systemic run risk.</p> <p>This GFTN Select Boardroom moves beyond national and institutional silos to ask: what would a credible, proportionate cross-border regulatory framework look like if designed for this reality — one that ensures both interoperability and local financial stability?</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p> <p>Speakers: Jo Yeo, Director & Head, Payments Development & Data Connectivity Office, Monetary Authority of Singapore Sonja Davidovic, Senior Digital Expert on Transformative Technology, International Monetary Fund Matthew Osborne, Director of Policy for Europe, Ripple Scott Bauguess, VP, International and Regulatory Policy, Coinbase Stefan Grasmann, Group Head of Thought Leadership & Chief of Blockchain, Zühlke Candace Kelly, Chief Legal & Policy Officer, Stellar Development Foundation Kirit Bhatia, Chief Digital Assets Officer, Banking Circle</p>

Tue, Jun 23
2:30pm - 3:30pm

Launchpad Room, Level 1

Unlocking a Cross-Border Multi-Moneyverse: From Fragmentation to Integration - Powered by Giesecke+Devrient

The digital currency landscape is expanding rapidly into multi-currency, cross-jurisdictional ecosystems spanning CBDCs, stablecoins, tokenised deposits, and commercial bank money tokens. How can these forms of money operate simultaneously across borders and platforms? What bridging architecture is needed to ensure seamless interoperability, instant exchangeability, and coherent governance, without recreating the very fragmentation tokenisation was meant to solve?

This workshop moves from strategic paradigm to implementation architecture. Participants will examine concrete use cases, explore cross-border design patterns, and identify the regulatory and liquidity conditions required to make the multi-moneyverse a reality. It is designed for decision-makers ready to move from roadmap to execution.

Moderators:

Dr. Wolfram Seidemann, CEO Currency Technology, Giesecke+Devrient

Tom Mutton, Executive Director of Payments Innovation & Fintech, Bank of England

Wednesday, 24 June 2026

Forum Stage

<p>Wed, Jun 24 8:50am - 9:00am</p> <p>Kongresssaal, Level 1</p>	<p>Welcome to Point Zero Forum 2026 - Day 2</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>
<p>Wed, Jun 24 9:00am - 9:20am</p> <p>Kongresssaal, Level 1</p>	<p>Future-Proof Money In a Digitalised World</p> <p>As digital assets and tokenized financial market infrastructures gain ground, ensuring future-proof money is essential – from a monetary policy, financial stability and payments perspective.</p> <p>In this fireside chat, Antoine Martin will elaborate on SNB's perspective on money, tokenization, and liquidity fragmentation in an increasingly digitalized world.</p> <p>Speaker: Dr. Antoine Martin, Vice Chairman of the Governing Board, Swiss National Bank</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>
<p>Wed, Jun 24 9:20am - 9:45am</p> <p>Kongresssaal, Level 1</p>	<p>The Opportunity Imperative: UBS Group CEO Sergio P. Ermotti on AI and Switzerland's Moment</p> <p>A global bank managing trillions in assets, UBS is heavily investing in AI and positions itself for the major international wealth transfer, which is creating new opportunities for clients. In this fireside chat, Sergio P. Ermotti discusses UBS's approach to AI, explains how UBS is responding to evolving client needs, and outlines how Switzerland can remain competitive in an era of change.</p> <p>Speaker: Sergio P. Ermotti, Group Chief Executive Officer, UBS Group AG</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>

<p>Wed, Jun 24 10:30am - 11:10am</p> <p>Kongresssaal, Level 1</p>	<h3>The \$320 Trillion Rewiring: Infrastructure, Rules and the Race to Move Money</h3> <p>The global payments system is being rebuilt simultaneously across every layer: real-time rails, ISO 20022, CBDs, stablecoins, and B2B clearing infrastructure are all live at once, each pulling in different directions. Leaders representing the full stack - from consumer networks and B2B rails to global messaging, public digital money, and the next frontier of SME payment access debate the architectural choices that will define how \$320 trillion moves each year.</p> <p>Speakers: Arjun Varma, General Manager, GCash International Mikkel Grønlykke, President, Banking Circle Shriyanka Hore, Managing Director, Swift Tim Moncrieff, Managing Director of Visa Payments & Currencycloud & VP, Strategic Initiatives & Execution, Visa Direct, Visa</p> <p>Moderator: Anthony Thomas, Chief Strategy & Growth Officer, Global Finance & Technology Network (GFTN)</p>
<p>Wed, Jun 24 11:10am - 11:30am</p> <p>Kongresssaal, Level 1</p>	<h3>Europe's Currency at a Crossroads: Digital Euro, Stablecoins, and the Mutiny of Money</h3> <p>The digital euro and dollar-denominated stablecoins represent two distinct approaches to programmable money - one rooted in central bank architecture and monetary sovereignty, the other in private infrastructure and market-driven adoption. Each carries different implications for how money is issued, held, settled, and governed in a digital economy. This session explores the fundamental design choices behind both instruments, what they are each built to do, and how they are likely to coexist - or not - as Europe's digital currency landscape takes shape.</p> <p>Speaker: Dante Disparte, Chief Strategy Officer and Head of Global Policy & Operations, Circle</p> <p>Moderator: Josh Lipsky, Vice President & Chair, International Economics, Atlantic Council</p>
<p>Wed, Jun 24 11:30am - 11:50am</p> <p>Kongresssaal, Level 1</p>	<h3>The Exchange as Settlement Layer: How Tokenization Rewires the Role of a Crypto Platform</h3> <p>Tokenization of real-world assets is no longer a proof of concept - it is becoming load-bearing infrastructure. This session examines what that transition demands of exchanges: not incremental product updates, but a fundamental rethink of how clearing, custody, and liquidity are architected when the underlying assets are programmable.</p> <p>Speaker: Ben Zhou, Co-founder & Chief Executive Officer, Bybit</p> <p>Moderator: Pat Patel, Chief Executive Officer, MEA, USA, LATAM & Forums, Global Finance & Technology Network (GFTN)</p>

<p>Wed, Jun 24 11:50am - 12:30pm</p> <p>Kongresssaal, Level 1</p>	<h3>The Agentic Checkout: When AI Becomes the Buyer</h3> <p>AI agents are already booking travel, managing subscriptions, and initiating B2B purchases - without a human clicking confirm. As agentic commerce scales, the payments infrastructure built for human decision-makers faces fundamental questions: how do you authenticate a machine, assign liability for an autonomous transaction, and prevent fraud when the buyer never sleeps? This session examines the emerging architecture of machine-to-machine commerce and what it means for every layer of the payments stack.</p> <p>Speakers: Saira Zahid, Director, Agentic Payments, Amazon Sam Hinton-Smith, Head of International Public Policy, Stripe Shayan Hazir, Chief Digital Officer, Asia (xHK) & MENAT, HSBC Tom Mutton, Executive Director of Payments Innovation & Fintech, Bank of England Mamerto Tangonan, Deputy Governor, Bangko Sentral ng Pilipinas</p> <p>Moderator: Nicole Sandler, Chief Ecosystem Officer, Ubyx Inc</p>
<p>Wed, Jun 24 1:20pm - 2:00pm</p> <p>Kongresssaal, Level 1</p>	<h3>The Infrastructure Gap: What It Actually Takes to Put Assets On-Chain at Scale</h3> <p>The technology is proven. The regulation is arriving. So why aren't tokenised assets mainstream yet? The answer lies not in the rails themselves, but in the institutional plumbing around them: interoperable networks, central bank money that can settle on-chain, and regulatory frameworks that work across jurisdictions simultaneously.</p> <ul style="list-style-type: none"> • How can central bank money underpin private tokenisation markets without constraining innovation? • Can MiCA, the GENIUS Act, and Asia-Pacific frameworks converge enough to allow truly cross-border tokenised asset flows? <p>Speakers: Burkhard Balz, Member of the Executive Board, Deutsche Bundesbank Carolyn Rogers, Senior Deputy Governor, Bank of Canada Leong Sing Chiong, Deputy Managing Director, Markets & Development, Monetary Authority of Singapore Sarah Breeden, Deputy Governor, Bank of England</p> <p>Moderator: Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)</p>
<p>Wed, Jun 24 2:30pm - 2:40pm</p> <p>Kongresssaal, Level 1</p>	<h3>Introducing the FinTech Regulatory Futures Index: A Global Benchmark for the Future of Fintech Regulation</h3> <p>Every year, trillions of dollars move through fintech markets governed by rules that no one has systematically measured, compared, or ranked across sectors.</p> <p>At PZF 2026, the Fintech Foundation and GFTN introduce the FinTech Regulatory Futures Index, the first rigorous, evidence-based benchmark that measures regulatory quality across jurisdictions.</p> <p>The Index aims to function as a public-interest instrument and a call to action for every market that wants to lead. Built with regulators, practitioners, and academics from over 30 countries, the Index is designed to become the definitive global reference point for what good fintech regulation looks like, and what it costs when it falls short.</p> <p>Speaker: Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)</p>

<p>Wed, Jun 24 2:40pm - 2:55pm</p> <p>Kongresssaal, Level 1</p>	<h3>Quantum Tech in Financial Services: A Primer Keynote</h3> <p>More details to follow soon.</p> <p>Speaker: Dr. Philip Intallura, Head of Quantum Technologies, HSBC</p>
<p>Wed, Jun 24 2:55pm - 3:35pm</p> <p>Kongresssaal, Level 1</p>	<h3>The Quantum Horizon: Applications, Readiness and What Finance Must Do Next</h3> <p>Quantum computing is no longer a distant theoretical promise - leading institutions are already running portfolio optimisation, derivatives pricing, and compliance simulations that classical computers cannot match for speed or accuracy. But readiness across the industry remains deeply uneven, the talent gap is acute, and the post-quantum cryptography migration clock is ticking loudly. This session brings together pioneers to map where quantum technology genuinely stands in financial services - and what it will take to move from early advantage to industry-wide transformation.</p> <p>Speakers: Charlie Markham, Technical Specialist, Emerging Tech & Research, Financial Conduct Authority Eric Adolphe, Founder & Chief Executive Officer, Forward Edge-AI, Inc. Kelly Richdale, Venture Partner, Amadeus Capital Partners & Senior Advisor, SandboxAQ, SandboxAQ Melissa Chambers, Co-Founder / Chief Executive Officer, Sitehop</p> <p>Moderator: Camilla Bullock, Chief Executive Officer, Emerging Payments Association Asia</p>
<p>Wed, Jun 24 3:35pm - 3:50pm</p> <p>Kongresssaal, Level 1</p>	<h3>Stocktake on the Digital Euro: A Virtual Fireside Chat with Piero Cipollone, Member of the Executive Board, European Central Bank</h3> <p>As the European Central Bank advances the Digital Euro towards legal and operational readiness, key design choices today will shape Europe's payments architecture for decades. In this virtual fireside, Piero Cipollone, Member of the Executive Board, European Central Bank will be sharing the latest strategic updates on the Digital Euro initiative.</p> <p>Speaker: Piero Cipollone [Speaking Virtually], Member of the Executive Board, European Central Bank</p> <p>Moderator: Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)</p>

 3:50pm - 4:30pm

Kongresssaal, Level 1

What the Future Holds for Europe's Digital Currencies and Payments Landscape

Europe's monetary architecture is being actively redefined: central bank digital currencies (CBDCs), local currency denominated stablecoins and tokenised deposits have been added to the mix of public and private money in Europe's digital financial system. This session brings together central banks and industry leaders to assess the emerging landscape of digital currencies in Europe and to confront the key design trade-offs around privacy, interoperability, and distribution. From the role of intermediaries to the risk of fragmentation across competing forms of digital money, the discussion will explore how Europe can balance innovation, sovereignty, and financial stability in its future financial infrastructure.

Speakers:

Dr. Alexandra Hachmeister, Director General Digital Euro, Deutsche Bundesbank

Andrus Alber, Deputy Governor, Eesti Pank (Bank of Estonia)

Dr. Christian Pirkner, Chief Executive Officer, Blue Code International AG

Janine Hirt, Chief Executive Officer, Innovate Finance

Nadia Filali, Head of Innovation & Development, Caisse des Dépôts

Moderator:

Anne-Sophie Gogl, Vice-Chairwoman, Digital Euro Association

Wed, Jun 24
 4:30pm - 5:10pm

Kongresssaal, Level 1

Towards Trusted Global Payment Infrastructure for a Multi-Asset Economy

As financial flows increasingly move across fiat, stablecoins, and tokenised assets, the infrastructure supporting global value transfer is rapidly evolving. From settlement networks and on/off ramp infrastructure to multi-asset treasury and liquidity flows, institutions are rethinking how value moves across borders in a more digital, always-on economy.

But scaling these systems globally requires trusted governance, regulatory alignment, and coordinated technical standards that allow value to flow across jurisdictions. This session convenes infrastructure providers and financial institutions to explore what will be needed to support the next phase of global connectivity and adoption.

Speakers:

Chan Yam Ki, Managing Director, Asia Pacific, Circle

Dawei Wang, Senior Vice President, Thunes

Jesse McWaters, EVP, Head of Global Policy, Mastercard

Lu Yin, Head of APAC, Solana Foundation

Moderator:

Lindsey Argalas, Chief Executive Officer, Taxbit

Wednesday, 24 June 2026
Public-private Roundtables

Wed, Jun 24
12:00pm - 1:30pm

Roundtable Room 3,
Ground Floor

Building Regulatory Maturity: From Quantum Security to Quantum Advantage

To date, regulatory and industry engagement on quantum computing has largely focused on quantum security, with meaningful progress made in raising awareness, developing transition plans, and beginning the migration to post-quantum cryptography.

This roundtable reflects on that momentum and asks a forward-looking question:

What can the quantum security journey teach us about the regulator's role in enabling innovation and quantum applications in financial services?

Starting with the lens of GFIN's Project Otto – Quantum Maturity for Regulators, this discussion will bring together regulators and industry to:

- Reflect on what has worked well in progressing quantum security from awareness to early implementation
- Discuss the regulatory tools, approaches, and mechanisms that have supported firm engagement and investment
- Explore how these lessons can be applied to support firms in experimenting with, investing in, and ultimately deploying quantum-enabled use cases
- Consider how regulators can balance risk mitigation with enabling growth, ensuring markets are prepared for both the challenges and opportunities quantum technologies present

By connecting lessons and experiences from quantum security to emerging quantum advantage, this roundtable aims to support more coordinated, proactive, and innovation-oriented regulatory approaches to quantum computing in financial services.

Speakers:

Achille Yomi, Co-Founder & Chief Executive Officer, Scenario X

Dr. Alessandro Curioni, IBM Fellow, Vice President, Europe & Africa and Director, IBM Research - Zurich, IBM Research

Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore

Colin Payne, Head of Innovation, Financial Conduct Authority (FCA)

Kelly Richdale, Venture Partner, Amadeus Capital Partners & Senior Advisor, SandboxAQ, SandboxAQ

Dr. Philip Intallura, Head of Quantum Technologies, HSBC

Vasily Pozdyshev, Advisor, BIS Innovation Hub

Moderator:

Charlie Markham, Technical Specialist, Emerging Tech & Research, Financial Conduct Authority

12:00pm - 1:30pm

Roundtable Room 2,
Ground Floor

Tokenised Financial Markets: Advancing Trust, Integrity and Compliance

Tokenisation is reshaping wholesale payments, foreign exchange, and securities. As adoption grows across platforms and jurisdictions, it introduces fragmentation, operational complexity, and coordination challenges that may affect liquidity, settlement certainty, and systemic stability.

This roundtable will examine the governance, control frameworks, and cross-border coordination needed to ensure trust, integrity, and resilience in tokenised financial markets. It will explore practical approaches to embed compliance, interoperability, and accountability, advancing trust in tokenisation, and enabling it to scale.

Speakers:

Alan Lim, Director & Head, Financial Infrastructure & Artificial Intelligence Office, Monetary Authority of Singapore
John O'Neill, Managing Director, Digital Assets & Currencies, CIB, HSBC
Dr. Jorgen Ouaknine, Global Head of Innovation & Digital Assets, Euroclear
Marco Kessler, Head Product and Business Development for Digital Assets, SIX Group
Rene Michau, Global Head, Digital Assets, Standard Chartered
Prof. Rolf H. Weber, Professor, Blockchain Center, University of Zurich
Sang Hyuk Lim, Visiting Economist, BIS
Tom Mutton, Executive Director of Payments Innovation & Fintech, Bank of England

Wed, Jun 24
12:00pm - 1:30pm

Roundtable Room 1,
Ground Floor

Global Stablecoin Regulatory Frameworks: From Principles to Practice

The January 2026 publication of the GDF Global Stablecoin Regulatory Playbook marked a pivotal moment in the evolution of digital asset oversight. For the first time, a comprehensive, principles-based framework has been developed, by and for stablecoin issuers, to establish shared terminology, foundational concepts, and outcome-oriented principles for stablecoin regulation across jurisdictions.

Yet the core challenge identified by the Playbook remains urgent: despite growing convergence on broad objectives, significant divergence persists in legal classification, terminology, reserve requirements, and redemption standards across the US (GENIUS Act), EU (MiCA), UK, Singapore, UAE, and beyond.

This fragmentation creates compliance burdens for global issuers, undermines cross-border scalability, and risks undercutting the very benefits - frictionless payments, financial inclusion, monetary efficiency - that stablecoins are positioned to deliver.

This roundtable convenes regulators, policymakers, and senior industry participants to analyse the GDF Playbook's findings, stress-test its recommendations against real regulatory experience, and identify actionable pathways toward greater international alignment.

Why Now?

Stablecoins have moved decisively from experiment to infrastructure. The GENIUS Act has established a federal US framework; MiCA has come into force across the EU; Singapore, Hong Kong, the UAE, and the UK have each enacted or are finalising their regimes. The window for shaping global interoperability, before these frameworks calcify into divergent silos, is narrow.

The GDF Playbook provides a neutral, issuer-grounded reference point from which regulators, policymakers, and industry can build shared understanding. This roundtable is designed to translate that reference point into regulatory action - identifying where equivalence determinations are ripe, where supervisory cooperation agreements should be deepened, and where international standard-setters should focus their attention.

Speakers:

Jo Yeo, Director & Head, Payments Development & Data Connectivity Office, Monetary Authority of Singapore
Peter Kerstens, Advisor, DG FISMA, European Commission
Peter Goodrich, Member of Secretariat, Financial Stability Board
Emma Butterworth, Head of Innovation & Payments Policy, Bank of England
Matthew Osborne, Director of Policy for Europe, Ripple
Patrick Hansen, Senior Director, EU Strategy & Policy, Circle
Nick Gersh, Senior Regulatory Counsel, Paxos
Eszter Major, Lawyer, State Secretariat for International Finance
Stephanie Cabossioras, Chief Strategy & Global Policy Officer, Societe Generale-FORGE

Moderator:

Jannah Patchay, Executive in Residence & Board Member, Global Digital Finance

The Great Convergence: Building Tomorrow's Integrated Payments Networks

Roundtable Room 1,
Ground Floor

The consensus is clear: global payment networks see collaboration, not competition, as their path to future dominance. Major networks are already building bridges – Mastercard with Ant International, Swift with blockchain layers, NGP's Nexus connecting instant payment systems worldwide. But as these technical integrations accelerate, a critical question emerges: what policy frameworks will govern this interconnected future?

When payment networks interoperate across borders, whose rules apply? How do regulators ensure consumer protection when a transaction touches multiple jurisdictions and networks? As networks become more interdependent, how do policymakers balance innovation with systemic risk? And perhaps most importantly – how can policy frameworks evolve to support beneficial network effects while preventing any single player from wielding excessive market power?

This roundtable brings together payment network leaders, financial regulators, and policy experts to explore how regulatory frameworks must adapt to govern an era of payment network collaboration. The stakes are high: get the policy right, and we unlock unprecedented efficiency and inclusion in global payments. Get it wrong, and we risk creating new systemic vulnerabilities or stifling the very innovation that promises to transform how the world moves money.

Speakers:

Agnès Bastaert, Head of Global Affairs & Strategic Development, Europe, Ant International

Lawrence Chan, Group Chief Executive Officer, Network for Electronic Transfers (Singapore)

Tim Moncrieff, Managing Director of Visa Payments & Currencycloud & VP, Strategic Initiatives & Execution, Visa Direct, Visa

Helena Forest, EVP, Real Time Payments Product & Commercial, Mastercard

Marc Schluemp, Head of Banking Operations, Swiss National Bank

Mike Truter, Director, Head of Industry Engagement, Swift

Anubhav Sharma, Deputy Chief - Partnerships, Business Development & Marketing, NPCI International Payments Limited

Moderator:

Jo Yeo, Director & Head, Payments Development & Data Connectivity Office, Monetary Authority of Singapore

Wed, Jun 24
2:00pm - 3:30pm

Roundtable Room 3,
Ground Floor

Digital Money Meets Traditional Finance: Treasury, Cash Management, and Liquidity

Stablecoins have crossed \$300 billion in circulation. Tokenized deposits are live at various global banks. Yet for all the headline numbers, the hard question remains unanswered: how do programmable money instruments actually integrate with the treasury operations, correspondent banking relationships, and payments infrastructure that keep traditional finance running?

This session convenes senior practitioners from banks, corporates, and digital asset firms to examine the real friction points - legal, operational, and technical - where digital money collides with TradFi plumbing, and where the integration is showing progress. Participants will discuss strategies to scale the integration of digital assets within traditional operations, including updating risk management frameworks, adhering to regulatory requirements, and architecting interoperability across systems.

Speakers:

Dr. Alexander Thoma, Head of Digital Assets, PostFinance

Alvinder Singh, Head, Innovation Acceleration Office, Monetary Authority of Singapore

Arjun Vir Singh, Partner, Global Head of Fintech & Digital Assets, Arthur D. Little

Ceridwen Choo, Chief Executive Officer, Cleanverse International Pte Ltd

Jesse McWaters, EVP, Head of Global Policy, Mastercard

Richard van Rees, Executive Director, Digital Money Products, UBS

Serena Sebastiani, Group Chief Strategy & Venture Officer, Head of Regulatory Affairs, Fuze

Yoyee Wang, Global Head of B2B, ByBit

Rahul Advani, Global Co-Head of Policy, Ripple

	<p>Moderator: Steve Vallas, Chief Executive Officer, Blockchain APAC</p>
<p>Wed, Jun 24 2:00pm - 3:30pm</p> <p>Roundtable Room 2, Ground Floor</p>	<p>GL1 Dialogue: Institutional-Grade Ledger Infrastructures</p> <p>As digital assets continue to expand across global markets, public and private sector stakeholders face growing complexities around operations, regulations, and scalability. Some advocate for a single global ledger, while others favour consistent standards to be applied across networks to enable seamless interoperability.</p> <p>This roundtable will examine these perspectives and explore what it will take to build a scalable digital asset ecosystem on institutional-grade infrastructure.</p> <p>Speakers: Audrey Metzger, Director of Innovation & Financial Market Infrastructures, Banque de France Dante Disparte, Chief Strategy Officer and Head of Global Policy & Operations, Circle Holger Neuhaus, Head of Market Innovation & Integration, European Central Bank Jennifer Lassiter, Managing Director, Head of Digital Assets for Europe & Americas, Standard Chartered Masashi Watanabe, Managing Director, Head of Digital Assets, MUFG Bank, Ltd. Sandra Ro, Chief Executive Officer, Global Blockchain Business Council (GBBC) Stephanie Cabossioras, Chief Strategy & Global Policy Officer, Societe Generale-FORGE Takaya Sugino, Deputy Director, Fintech Innovation Office, Financial Services Agency of Japan Emma Butterworth, Head of Innovation & Payments Policy, Bank of England Omar Azhar, VP of Business Development, Matter Labs ZKsync</p> <p>Moderator: Alan Lim, Director & Head, Financial Infrastructure & Artificial Intelligence Office, Monetary Authority of Singapore</p>
<p>Wed, Jun 24 4:00pm - 5:30pm</p> <p>Roundtable Room 1, Ground Floor</p>	<p>Investor Protection in the Age of Cryptocurrencies: Risk Management at Every Step of the Journey</p> <p>In recent years, the function of popular cryptocurrencies has shifted. While originally designed as payment instruments, they are nowadays more frequently used as highly volatile investment objects by a variety of investors including retail investors. While a BIS Working Paper showed that between 2015 and 2022 an estimated 73-81% of retail investors have likely lost money on their initial investment in Bitcoin, recent reviews by IOSCO and FSB found that investor protection is still underdeveloped in this area.</p> <p>This raises the question how and to what extent investors, especially retail investors, must be protected. Starting with a discussion on the available data, the panellists will discuss gaps in current regulation and concepts for an appropriate cryptocurrency regulation architecture in the area of (retail) investor protection.</p> <p>Speakers: Richard Gabbert, Chief of Staff, Crypto Task Force, US SEC Sarah Jungo, Attorney-at-law / Senior policy advisor, State Secretariat of International Finance Ryosuke Ushida, Director for International Policy, International Affairs Office, Financial Services Agency of Japan (JFSA)</p> <p>Moderators: Léonard Bôle, Member of Executive Board, Swiss Financial Market Supervisory Authority (FINMA) Matthias Obrecht, Head Supervision New Technologies, Swiss Financial Market Supervisory Authority (FINMA)</p>
<p>Wed, Jun 24 4:00pm - 5:30pm</p>	<p>Digital Capital Markets: Taking the Stack On-Chain</p>

Roundtable Room 2,
Ground Floor

The stock market is going on-chain. The NYSE-DTCC Russell 1000 pilot, the explosion of tokenized Treasuries past \$11 billion, and a generation of on-chain private credit platforms are no longer proofs of concept - they are live infrastructure. The question has shifted from whether capital markets can tokenize to how fast the supporting stack - prime brokerage, custody, clearing, compliance, and investor access - can be rebuilt for on-chain settlement.

This roundtable convenes the architects of Digital Capital Markets to map where the infrastructure is genuinely ready, where legacy systems are the bottleneck, and what it will take to move emergent infrastructure from pilots to the primary issuance venue of choice. Participants will examine the impact of specific on-chain mechanics on the next generation stock market, including:

1. how T+0 atomic settlement changes margin and liquidity requirements
2. what fractionalisation does to price discovery and secondary market depth, and
3. whether the current generation of permissioned chain architectures can deliver the throughput and finality guarantees that institutional issuers actually require.

The session will also address the regulatory frontier - jurisdictional recognition of on-chain ownership, the status of tokenized securities under existing market structure rules, and where the gaps between MiCA, the GENIUS Act, and emerging APAC frameworks create opportunities for either arbitrage or paralysis.

Speakers:

Frank Seibold, Global Head of Banking and Capital Markets Sales, Chainlink

Oya Celiktemur, Director, EMEA, Ondo Finance

Roy Choudhury, Managing Director and Senior Partner
New York, BCG

Varun Paul, Senior Director, Financial Markets, Fireblocks

John O'Neill, Managing Director, Digital Assets & Currencies, CIB, HSBC

Arthur Carabia, Senior International Government Affairs Strategist, Robinhood

Georgina Jarratt, Managing Director, Head of FinTech & Digitalisation, International Capital Market Association

Alexandre Kech, Chief Executive Officer, Global Legal Entity Identifier Foundation (GLEIF)

Matthias Wyss, Chief Executive Officer, Obligate

Sven Wilke, Deputy Chief Executive Officer & Chief Growth Officer, Seturion

Marni McManus, Citi Country Officer & Banking Head, Citi

Moderator:

Thomas Moser, Alternate Member of the Governing Board, Swiss National Bank

Agentic AI: From Automation to Autonomy: Is Liquidity About to Run Itself?

Autonomy of automated systems is increasing rapidly thanks to advances in agentic AI technology. This development impacts not just our everyday life but the economic framework and established systems in various ways, ranging from the automation of simple tasks to increasingly autonomous systems of agents interacting with minimal oversight.

This roundtable unpacks the impact such developments have on both traditional and on-chain payment systems and explores risks and opportunities emerging as adoption progresses.

A diverse group of roundtable participants representing the “full-stack” of payment system actors, including central and commercial banks, regulators, payment providers, digital asset platforms and technology providers, will discuss implications for liquidity management on both an individual and systemic level, uncover design principles for safe agent-based payment systems, and provide insights on priorities for regulatory coordination.

Speakers:

Musa Parmaksiz, Head Of AI Center of Excellence (IB), UBS

Todd Fox, President of Visa Economic Empowerment Institute, Visa
Soha Hohnecker, Global Head of Sales and Marketing, Amazon

Moderator:

Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)

Workshops

<p>Wed, Jun 24 12:00pm - 12:30pm</p> <p>Workshop Room, Level 1</p>	<p>The Autonomous Analyst – How Agentic Workflows are Solving the Source-of-Wealth Bottleneck in Private Banking - Powered by Julius Baer</p> <p>In this session, Julius Baer's Nicolas de Skowronski (Head of Digital Business Transformation) and Michael Zemp (Head of Service Engineering) pull back the curtain on how Julius Baer is deploying Agentic AI to solve the industry's most persistent "unsolvable" challenge: the Source of Wealth bottleneck. Participants will learn how to bridge the gap between business requirements and technical execution. They will walk away with a blueprint for turning a manual, friction-heavy onboarding process into a strategic advantage that redefines institutional trust.</p> <p>Speaker: Nicolas de Skowronski, Head Digital Business Transformation, Bank Julius Baer & Co. Ltd.</p>
<p>Wed, Jun 24 1:00pm - 1:30pm</p> <p>Workshop Room, Level 1</p>	<p>Bridging the Divide: Harnessing DeFi to Modernise Traditional Finance - Powered by Chainlink Labs</p> <p>As digital assets become core financial market infrastructure, the question is no longer whether DeFi and traditional finance will converge, but how. In this executive panel we discuss what it takes to achieve true global interoperability across onchain markets and existing financial infrastructure. This session will examine how blockchain-based models, combined with trusted institutional standards, are enabling programmable value transfers, real-time settlement, and seamless connection between banks, liquidity venues, custodians, and blockchain networks at scale.</p> <p>The discussion will dive into the practical realities of how to connect private and public blockchains, enable secure cross-chain transactions, and overcome fragmentation across disparate networks and standards. We'll also discuss the technical, regulatory, and cross-border coordination challenges that must be solved to reach critical mass, and what a future financial system looks like when DeFi and TradFi are one seamless interoperable ecosystem.</p> <p>Speakers: Nick Kerigan, Managing Director, Head of Innovation, Swift Fernando Vázquez, President, Capital Markets, Chainlink</p>
<p>Wed, Jun 24 2:00pm - 2:30pm</p> <p>Workshop Room, Level 1</p>	<p>Rethinking Onboarding: How Veridian and vLEI are Reshaping Regulatory Compliance for the Digital Age - Powered by Veridian by Cardano Foundation</p> <p>As regulatory complexity grows across global financial markets, organisations face mounting pressure to streamline onboarding while maintaining rigorous compliance standards. This session introduces Veridian's innovative technology offering and its vLEI onboarding solution — a next-generation approach to regulatory compliance that reduces friction for both institutions and their clients. Attendees will gain insight into how modern compliance infrastructure can be reimagined to be faster, more transparent, and fully aligned with evolving regulatory expectations. Whether you're a financial institution, a regulator, or a technology provider, this session will offer practical perspectives on the future of compliant digital onboarding.</p>
<p>Wed, Jun 24 3:00pm - 3:30pm</p> <p>Workshop Room, Level 1</p>	<p>AI and Blockchain: Powering Innovation, Managing Risk, Shaping the Future - Powered by TRM Labs</p>

	<p>AI is driving progress across all sectors, including blockchain-powered financial services—accelerating efficiency and unlocking analytical capabilities that would have been unthinkable just a few years ago. The same capabilities transforming financial services are equally critical in managing the risks that come with them—from financial crime and illicit flows to smart contract vulnerabilities, operational and custody failures, and emerging threats to market integrity.</p> <p>In this interactive workshop, leaders from financial intelligence, digital infrastructure, and global regulation come together to share what AI-powered risk management looks like on the ground today—the wins, the lessons, and the open questions. Rather than debating frameworks, this session will allow for honest exchange: what's being built, how it's landing, and what the path to responsible, explainable AI adoption might need from policymakers tomorrow.</p>
<p>Wed, Jun 24 4:00pm - 4:30pm</p> <p>Workshop Room, Level 1</p>	<h3>Managing Enterprise Risk After OpenClaw: Identity, Privacy, and Governance - Powered by Terminal 3</h3> <p>OpenClaw has introduced the power of autonomous Agentic AI to the masses, powering real-world actions across innumerable consumer and enterprise systems. However, there is now a new class of security, identity, and compliance challenges that traditional infrastructure was never designed to handle.</p> <p>In this session, Gary Liu from Terminal 3 explores how governed AI agents that can handle sensitive credentials — including payment data, PII, and API keys — without exposing them to risk, and what trustworthy, auditable agent deployment looks like in the age of OpenClaw.</p> <p>Speaker: Gary Liu, Co-Founder & Chief Executive Officer, Terminal 3</p>
<p>Wed, Jun 24 5:00pm - 5:30pm</p> <p>Workshop Room, Level 1</p>	<h3>Blockstream Research: Quantum Resilience for Bitcoin and Liquid — What's Solved, What's Not - Powered by Blockstream</h3> <p>Blockstream Research is a leading research lab in the Bitcoin ecosystem, working on cryptographic protocols and security. A quantum computer could forge the signatures that authorize Bitcoin and Liquid transactions and use them to steal coins. Liquid, Blockstream's Bitcoin sidechain, is exposed in more ways: an attacker with a quantum computer could also inflate confidential assets, strip their privacy, forge the federation's block signatures to take over consensus, or go after the Bitcoin peg. We walk through each threat, show what we have already built (including the first post-quantum transactions on a production Bitcoin sidechain, run on Liquid), and say plainly what is still open and why we think those problems can be solved.</p>

Wednesday, 24 June 2026

Boardrooms

<p>Wed, Jun 24 6/24/2026 7:30 AM</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] Breakfast Briefing: The Interoperability Imperative: Navigating the Fragmented Global Stablecoin Map - Powered by Paxos</p> <p>Stablecoins are inherently global, yet their regulation is increasingly fragmented. As major jurisdictions diverge on standards for reserves, custody, and issuance, how can the industry avoid a "splinternet" of digital value? This session examines the operational tools for multi-jurisdictional issuance and the pathways toward a harmonized global standard that preserves both innovation and financial stability.</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p> <p>Speakers: Aymeric Salley, Head of Digital Assets Platform, Banking Circle Dea Markova, Director of Policy, Fireblocks</p> <p>Moderators: Tero Reuna, Chief Executive Officer, Paxos Issuance Europe, Paxos Pat Patel, Chief Executive Officer, MEA, USA, LATAM & Forums, Global Finance & Technology Network (GFTN)</p>
<p>Wed, Jun 24 6/24/2026 12:00 PM</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] Lunch Briefing: Scaling Institutional Stablecoins: Unlocking the Next Frontier of Digital Asset Infrastructure - Powered by Societe Generale – FORGE</p> <p>Regulated, transparent, and bank-grade stablecoins are no longer a theoretical concept - they are a strategic necessity. This exclusive boardroom lunch briefing, powered by Societe Generale-FORGE, will convene a select group of senior leaders to stress-test the commercial and systemic implications of institutional-grade digital cash. We will explore how Euro and USD stablecoins can serve as trusted reference assets, enhancing Europe's financial sovereignty and accelerating institutional adoption across crypto trading, cross-border payments, and capital markets.</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p> <p>Speaker: Sergio Mello, Global Head of Stablecoin Solutions, Anchorage Digital</p>
<p>Wed, Jun 24 6/24/2026 2:00 PM</p> <p>Boardroom, Ground Floor</p>	<p>[Invite-only] After MiCA: The Next Phase of Cross-Border Crypto Supervision - Powered by Binance</p> <p>MiCA has established a harmonised framework for crypto-assets across the European Union, but the focus of policy discussion is now shifting from rulemaking to supervisory implementation. As digital asset markets become increasingly cross-border and interconnected, important questions are emerging around supervisory coordination, market oversight and the interaction between regional frameworks and global market activity.</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p> <p>Speakers: Jennifer Lassiter, Managing Director, Head of Digital Assets for Europe & Americas, Standard Chartered Patrick Hansen, Senior Director, EU Strategy & Policy, Circle</p>

Wednesday, 24 June 2026

Launchpads

<p>Wed, Jun 24 1:00pm - 2:00pm</p> <p>Launchpad Room, Level 1</p>	<p>The Future of Cross-Border Commerce in the Age of AI and Stablecoins - Are We Building Payments Infrastructure That Works for Merchants, Consumers, and Machines? - Powered by Amazon</p> <p>Cross-border payments for merchants remain expensive, slow, and fragmented — and for SME sellers in emerging markets, often inaccessible entirely. This session tests whether tokenised money (stablecoins, tokenised deposits, CBDCs) is genuinely reducing cost, time, and friction for merchants in live corridors today, or whether the promise still outpaces reality. It then introduces agentic commerce — AI agents executing transactions autonomously on behalf of businesses — as the stress test that reveals whether the infrastructure, regulation, and trust frameworks being built are fit for what comes next. Participants will leave with a grounded picture of where tokenised money works for merchants today, where the gaps remain (particularly for SME sellers in emerging markets), and the specific policy and infrastructure conditions that would unlock the next stage of cross-border commerce.</p> <p>Speakers: Amira Karim, Head of International Public Policy, Payments & Financial Services, Amazon Nicole Sandler, Chief Ecosystem Officer, Ubyx Inc</p> <p>Moderator: Camilla Bullock, Chief Executive Officer, Emerging Payments Association Asia</p>
<p>Wed, Jun 24 2:30pm - 3:30pm</p> <p>Launchpad Room, Level 1</p>	<p>Building the Bank-Grade Backbone: How Pioneer Banks Are Anchoring the Digital Asset Ecosystem - Powered by Banking Circle</p> <p>The rails of money and assets are being redrawn. Digital assets are already reshaping treasury management, settlement, and payments, but making this technology work under a bank umbrella demands an entirely different standard of infrastructure. This session places first-mover banks at the centre of fast-growing digital asset ecosystems: as the trust anchor connecting stablecoin issuers, tokenized asset managers, payment companies, fintechs, and institutional settlement networks. Hear from the pioneers already building to that standard, and what it truly takes to get there.</p> <p>Speakers: Georg Schneider, Global Head of RWA, Digital Asset Tero Reuna, Chief Executive Officer, Paxos Issuance Europe, Paxos</p> <p>Moderator: Aymeric Salley, Head of Digital Assets Platform, Banking Circle</p>
<p>Wed, Jun 24 4:00pm - 5:30pm</p> <p>Launchpad Room, Level 1</p>	<p>[Invite-only] Spotlight: DLT in Financial Markets – Resilience Game-Changer or Risk Multiplier? - Powered by Swift</p> <p>In an increasingly fragmented and volatile global environment, resilience has shifted from a technical requirement to a core design principle for Financial Market Infrastructures (FMIs). While Distributed Ledger Technology (DLT) promises enhanced efficiency and decentralised continuity, its potential contribution to systemic resilience, and the new vulnerabilities it may introduce, remains a critical area for strategic debate.</p> <p>This invitation-only session will convene a curated cohort of Senior policy makers and C-Suite leaders to explore the role of DLT-based infrastructures in safeguarding the stability of payments and capital markets.</p> <p>If you would like to be part of the discussion, please register your interest here, subject to approval.</p>

Thursday, 25 June 2026
Forum Stage

<p>Thu, Jun 25 8:50am - 9:00am</p> <p>Kongresssaal, Level 1</p>	<p>Welcome to Point Zero Forum 2026 - Day 3</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>
<p>Thu, Jun 25 9:00am - 9:20am</p> <p>Kongresssaal, Level 1</p>	<p>The New Architecture of Wealth: Private Markets, Private Banks and the Decade Ahead</p> <p>The 60/40 portfolio is under structural pressure - and the \$145 trillion shift toward private markets is no longer a trend, it is a reconfiguration. A new generation of clients is demanding access - the platforms and institutions built to serve private wealth are both rebuilding their models at the same time. This session brings together two leaders who have shaped the industry from different vantage points to ask the defining question: when the clients, the assets, and the access points are all changing simultaneously, how does wealth management rebuild itself - and what does the private bank of 2030 actually look like?</p> <p>Speakers: Dr. Axel Weber, International Advisory Board Member, Global Finance & Technology Network (GFTN) & President, Center for Financial Studies, Goethe University Frankfurt, Lawrence Calcagno, Chairman & Chief Executive Officer, iCapital</p> <p>Moderator: Manisha Tank, Broadcaster & TV Presenter,</p>
<p>Thu, Jun 25 9:20am - 10:00am</p> <p>Kongresssaal, Level 1</p>	<p>Digital Assets at the Crossroads: A CEO Dialogue</p> <p>For the first time, the industry has what it spent years demanding - regulatory clarity, with MiCA enforced, the GENIUS Act signed, and market structure reform unlocking institutional tokenisation at scale. Yet the tailwinds arrive alongside real headwinds: a fractured macroeconomic order, geopolitical realignments reshaping capital flows, and AI competing for the infrastructure investment and boardroom attention once directed squarely at digital assets. This gathering of industry CEOs takes an honest look at where the industry truly stands.</p> <p>Speakers: Dr. Adam Back, Co-founder & Chief Executive Officer, Blockstream & BSTR Boris Bohrer-Bilowitzki, Chief Executive Officer, Concordium Christian Schmid, Senior Partner & Global Leader Global Banking & CIB, BCG Simone Maini, Chief Executive Officer, Elliptic Hon. Sunil Sabharwal, Board Member, Securitize.io</p> <p>Moderator: Sandra Ro, Chief Executive Officer, Global Blockchain Business Council (GBBC)</p>

<p>Thu, Jun 25 10:00am - 10:40am</p> <p>Kongresssaal, Level 1</p>	<p>MiCA, GENIUS, CLARITY and the Global Race to Write the Rules for Digital Assets</p> <p>MiCA's 2026 deadline and the GENIUS Act's January 2027 compliance window represent two very different answers to the same question: how do you bring digital assets inside the regulatory perimeter without breaking what makes them work? The choices embedded in each framework - on reserve requirements, stablecoin volume caps, extraterritorial reach, and licensing architecture - will determine which markets lead and which lose ground. This session examines the design principles behind global digital asset regulation, and asks where the frameworks converge, where they conflict, and what a coherent global standard might actually look like.</p> <p>Speakers: Brian Quintenz, Advisor and Board Member, Ubyx, SUIG, KalshiEx Justin Slaughter, VP, Regulatory Affairs, Paradigm Lesley Chavkin, Head of Policy, Ribbit Capital Stu Alderoty, Chief Legal Officer, Ripple Vaida Česnulevičiūtė – Markevičienė, Deputy Chair of the Board, Bank of Lithuania</p> <p>Moderator: Candace Kelly, Chief Legal & Policy Officer, Stellar Development Foundation</p>
<p>Thu, Jun 25 10:40am - 10:55am</p> <p>Kongresssaal, Level 1</p>	<p>Sovereignty and Resilience in Digital Payments: Keynote by Danmarks Nationalbank Governor Ulrik Nødgaard</p> <p>More details to follow soon.</p> <p>Speaker: Ulrik Nødgaard, Governor, Danmarks Nationalbank</p>
<p>Thu, Jun 25 10:55am - 11:10am</p> <p>Kongresssaal, Level 1</p>	<p>State of Stablecoins: Keynote presentation by Simon Taylor</p> <p>More details to follow soon.</p> <p>Speaker: Simon Taylor, GTM, Tempo</p>
<p>Thu, Jun 25 11:30am - 11:40am</p> <p>Kongresssaal, Level 1</p>	<p>Geneva AI Summit 2027: The Road Ahead</p> <p>In this keynote address, Alexandra Baumann, incoming Swiss Ambassador to Singapore, explains why Geneva is uniquely positioned to serve as the global hub for AI governance, and why Switzerland is well placed to convene and lead this international dialogue. She outlines the vision for the Geneva AI Summit 2027 and what it means for the fintech sector.</p> <p>Speaker: Alexandra Baumann, Ambassador, Federal Department of Foreign Affairs (FDFA), Switzerland</p>

<p>Thu, Jun 25 1:00pm - 1:40pm</p> <p>Kongresssaal, Level 1</p>	<h3>Tokenization of Treasury: The CFO's New Liquidity Playbook</h3> <p>Idle corporate cash has long been a missed opportunity - but tokenised money market funds, on-chain repo, and atomic settlement are rewriting the treasurer's playbook. Major institutions are already delivering yield and instant liquidity through tokenised instruments, settling FX derivatives on-chain, and integrating programmable collateral into intraday operations. This session examines what the shift to programmable treasury infrastructure means for CFOs navigating 24/7 markets with systems built for banking hours.</p> <p>Speakers: Emmanuelle Pecenicic, Head of Digital Assets Distribution, Fidelity International Jerald David, Chief Executive Officer, Lynq Kelvin Li, General Manager of Platform Tech, Ant International Milind Sanghavi, Co-Founder & Chief Executive Officer, XWeave.io Tony McLaughlin, Chief Executive Officer, Ubyx Inc</p>
<p>Thu, Jun 25 1:40pm - 2:20pm</p> <p>Kongresssaal, Level 1</p>	<h3>From Law to Operations: The Digital Asset Ecosystem's New Reality</h3> <p>Regulation is one thing; implementing new rules across live systems, global entities, and market infrastructures is another entirely. While firms grapple with operationalising evolving regimes such as MiCA and the GENIUS Act, policymakers and standard-setting bodies are simultaneously reshaping the principles that underpin tomorrow's financial market infrastructures (FMI).</p> <p>This session brings together policymakers, central bankers, and industry practitioners to examine where gaps between policy intent, global standards, and operational reality are widest, how industry, policymakers, and regulators can better coordinate in an environment where rules and infrastructure are being built in parallel, and what the future of the institutional digital assets ecosystem will look like.</p> <p>Speakers: Carlos Conesa, Associate Director General Operations, Markets and Payment Systems, Bank of Spain Isabella Chase, Head of Policy, EMEA, TRM Labs Tero Reuna, Chief Executive Officer, Paxos Issuance Europe, Paxos</p> <p>Moderator: Ceridwen Choo, Chief Executive Officer, Cleanverse International Pte Ltd</p>
<p>Thu, Jun 25 2:20pm - 3:00pm</p> <p>Kongresssaal, Level 1</p>	<h3>Unchaining Tokenized Money: Stablecoins, CBDCs, and the Race for Scale</h3> <p>As CBDCs move from pilots to policy and stablecoins scale into real-world payment and settlement use cases, digital money is entering a phase of practical deployment. Yet regulatory and technical fragmentation continue to threaten the efficiencies that tokenization at scale promises to unlock.</p> <p>The discussion will focus on where real adoption is already taking place today, what barriers are still preventing scale, and how central banks, financial institutions, and technology providers can unlock interoperability across CBDCs, stablecoins, and tokenized financial systems globally within current market conditions.</p> <p>Speakers: Dr. Alexander Bechtel, Global Head of Digital Products & Solutions, DWS Group Dr. Mampho Modise, Deputy Governor, South African Reserve Bank (SARB) Dr. Wolfram Seidemann, CEO Currency Technology, Giesecke+Devrient</p> <p>Moderator: Joasia E. Popowicz, Associate Editor, Central Banking Publications</p>

Programmable Compliance: Opportunities, Risks, and Real Use-Cases

The ever evolving and accelerating world of financial and payment services presents challenges for regulators and market participants. Regulators struggle with establishing an appropriate regulatory framework to effectively address the risks associated with services leveraging innovative technologies and market participants may reject new rules if compliance is perceived as too burdensome and costly.

Technological advancement, however, not only presents challenges but also opportunities as rules and policies may be directly implemented into products and the provision of services to clients. At the roundtable, regulators, academics and industry leaders will explore the potential, risks and limits as well as regulatory requirements on a national and international level of this approach, which is commonly referred to as "programmable compliance".

Speakers:

Alexandre Kech, Chief Executive Officer, Global Legal Entity Identifier Foundation (GLEIF)

Aqsa Zubair, Deputy Director, FinTech Supervision, Bermuda Financial Authority

Pascale Bruderer, Founder & Chairwoman, Swiss Stablecoin AG

Moderators:

Prof. Nina Reiser, Associate Professor of Financial Market Law, Center for Financial Services Innovation, University of St Gallen

Dr. Stefan Härtner, Senior Legal & Policy Specialist, Swiss Financial Market Supervisory Authority FINMA

Thu, Jun 25
12:00pm - 1:30pm

Building a Practitioner's Guide for Tokenization in Finance: Working Group Members Convening

The problems that constrain tokenization at scale do not belong to one working group, one institution, or one regulatory perimeter. Cross-ledger settlement, stablecoin licensing fragmentation, FMI readiness in developing markets, and the legal enforceability of smart contracts are structurally connected with each a precondition for the next, each requiring actors across infrastructure and regulation to work from the same evidence base.

This session brings both working groups together for the first time in person. Working Group 1 (Interoperability and Infrastructure) and Working Group 2 (Regulation, Trust, and Governance) will each present their problem statements before presenting to the Oversight Panel. The purpose is to establish shared understanding of the initiative's full scope, test framing with peers who approach the same challenges from different vantage points, and sharpen the asks that each working group will direct to the Oversight Panel in the session that follows.

About the initiative

GFTN has launched Tokenization in Finance: Evidence and Implementation Pathways, a structured, multi-stakeholder initiative convening two working groups drawn from leading financial institutions, infrastructure providers, and market participants to assemble a practitioner-oriented evidence base spanning spanning digital money and payment rails through to tokenized real-world assets, securities, funds, and capital markets infrastructure. At Singapore FinTech Festival in November 2026, the initiative will publish a practitioner guide designed to give financial institutions a structured basis for sequencing their digital asset strategies, and to equip regulators and finance ministries in emerging and developing economies with implementation pathways they can draw on directly.

Speakers:

Amira Karim, Head of International Public Policy, Payments & Financial Services, Amazon

Arena Fernandez, Head of Digital Regulatory Initiatives, Amazon

Ariadne Plaitakis, Deputy Director, Regulation, Policy, & Research, Gates Foundation

	<p>Isabella Chase, Head of Policy, EMEA, TRM Labs Ivan Mortimer-Schutts, Global Head of vLEI, Global Legal Entity Identifier Foundation (GLEIF) Dr. Mark Staples, Chief Technology Officer, Digital Finance CRC Michael Maurer, Research Engineer, MIT Digital Currency Initiative (DCI) Mo Jalil, Head of Institutional Privacy, Ethereum Foundation Natalya Thakur, Founder & Chief Executive Officer, Knova Sandra Ro, Chief Executive Officer, Global Blockchain Business Council (GBBC) Scott Bauguess, VP, International and Regulatory Policy, Coinbase Sébastien Van Campenhoudt, Director, Innovation & Digital Assets, Tokenized Cash Lead, Euroclear Steve Vallas, Chief Executive Officer, Blockchain APAC Sunayna Tuteja, Former Chief Innovation Officer, Federal Reserve System Tang Wei, Head of Public Policy, Southeast Asia & Greater China, Stripe Toh Wee Kee, Global Head of Insights, Kinexys by J.P. Morgan Wee Kiat Goh, Open Innovation Lead, Julius Baer Alisha Chhangani, Associate Director, Future of Money, Atlantic Council</p> <p>Moderator: Maha El Dimachki, Chief Executive Officer, GFTN Solutions, Global Finance & Technology Network (GFTN)</p>
<p>Thu, Jun 25 12:00pm - 1:30pm</p> <p>Roundtable Room 3, Ground Floor</p>	<p>Governing AI Applications in Financial Services</p> <p>From autonomous agents to the management of LLM and other generative AI technologies, artificial intelligence disrupts conventional understandings of data governance, particularly within financial services. This disruption is engendering new trade-offs that policymakers, regulators, and financial institutions have to grapple with, including:</p> <ul style="list-style-type: none"> • Reducing digital dependencies vs engaging the realities of a borderless market • Preserving stability and building internal capabilities while optimising for speed and innovation • Managing regulatory divergence without sacrificing operational coherence across markets <p>As AI agents become increasingly empowered to execute transactions on behalf of individuals and businesses, and institutions become increasingly reliant on models developed by a concentrated pool of Big Tech players, how can governments, financial infrastructure operators, and financial institutions balance competing objectives? This session aims to develop a set of principles for governing the use of AI and data within financial services, capturing insights from across the ecosystem.</p> <p>Speakers: Isabelle Rocchia, Managing Director, Europe, IAPP Konstantin Kotulla, Founder, Porters Fred Sun, Head of Europe, Tencent Cloud International Thiébaud Meyer, Director, Office of the CISO, Google Cloud Dr. Joseph Breeden, Chief Executive Officer, CALM XAI Eva Selamlar-Leuthold, Co-CEO / Chairwoman / Ambassador Swiss AI Summit, Think&Do Tank for Financial Innovation / KYC Spider Andre Vellozo, Chief Executive Officer, Drumwave Dr. Nino Landerer, Deputy Director General Strategy & Innovation, Deutsche Bundesbank</p> <p>Moderator: Prof. Chia Tek Yew, Adjunct Professor, NUS - Asian Institute of Digital Finance</p>
<p>Thu, Jun 25 2:00pm - 3:30pm</p> <p>Roundtable Room 1,</p>	<p>Stablecoins and the Monetary Order: What Is at Stake and What Should Drive their Design?</p>

<p>Ground Floor</p>	<p>The global monetary system has a plumbing problem. Correspondent banking is slow, expensive, and exclusive, and now a \$300 billion stablecoin market has grown around it. Yet 97% of that market is dollar-denominated, issuers hold hundreds of billions in short-term Treasuries, already impacting yields, and the largest stablecoin carries rating agencies' lowest stability ratings.</p> <p>Stablecoins could become genuinely useful payments infrastructure: for cross-border payments, programmable settlement, and treasury operations. In this roundtable we explore what it takes to make stablecoins truly stable and useful for broad adoption, and why Switzerland is well-placed to help (re-)define what responsible stablecoin design looks like.</p> <p>Speakers: Dr. Attilio Zanetti, Alternate Member of the Governing Board, Swiss National Bank Michael Manz, Head of the Financial Systems & Financial Markets Department, State Secretariat for International Finance SIF Andreas Kubli, Managing Director Group Head of Digital Assets, UBS Christian Schmid, Senior Partner & Global Leader Global Banking & CIB, BCG Rebecca Mun, Director, S&P Global Pascale Bruderer, Founder & Chairwoman, Swiss Stablecoin AG Evaldas Ruzgys, Member of the Board, Bank of Lithuania</p> <p>Moderator: Andrea Luca Aerni, Policy Advisor Digital Finance and Innovation, State Secretariat for International Finance (SIF)</p>
<p>Thu, Jun 25 2:00pm - 3:30pm</p> <p>Roundtable Room 3, Ground Floor</p>	<p>Navigating the New Digital Order: Regulatory Divergence, Monetary Architecture, and a Path toward Coordination</p> <p>Digital assets, programmable money, and AI-driven transactions are crossing borders at increased speed. But the rules governing them are being written jurisdiction by jurisdiction, with no shared architecture in sight. As the US advances GENIUS Act rules for private-sector stablecoins, the EU deepens MiCA and pursues a digital euro, and China scales its state-backed e-CNY, three major economies are building divergent governance frameworks around one underlying technology — with significant implications for cross-border payments, monetary policy transmission, and AI in the global financial system.</p> <p>This policy divergence is a compliance challenge for market participants, but it is also the early stage of a structural buildup. When domestically rational policy choices generate internationally costly spillovers — and when no coordinating mechanism exists to manage them — fragmentation compounds over time until the cost of inaction becomes prohibitive. Digital currencies and AI governance are following this trajectory, and while the window to get ahead of it remains open, it is closing.</p> <p>Against this backdrop, the Bretton Woods Committee will convene a closed roundtable at Point Zero Forum on Thursday, June 25th to bring together global policymakers, central bankers, regulators, and private sector leaders to stress-test the diagnosis. This discussion will directly inform the Bretton Woods Committee's upcoming work, with a focus on the defining digital governance challenge of the moment: whether coordination across jurisdictions can accelerate to match the digital rails being built beneath the global financial system.</p> <p>The roundtable will be a 90-minute discussion featuring 10 minutes of scene-setting remarks from featured speakers, followed by an open exchange among the broader group. A brief framing paper will be circulated in advance. The core question animating the discussion: What are the costs of continued fragmentation — and what global coordination mechanisms are necessary to manage the associated risks and opportunities?</p> <p>Speakers: Dante Disparte, Chief Strategy Officer and Head of Global Policy & Operations, Circle Karim Mouaffak, Financial Sector Specialist, Arab Monetary Fund Mykolas Majauskas, Global Head of Policy, Bybit</p>

	<p>Natalya Thakur, Founder & Chief Executive Officer, Knova Pavle Avramovic, Director of Research & Policy, Financial Innovation for Impact Audrey Metzger, Director of Innovation & Financial Market Infrastructures, Banque de France</p>
<p>Thu, Jun 25 2:00pm - 3:30pm</p> <p>Roundtable Room 2, Ground Floor</p>	<p>Building a Practitioner's Guide for Tokenization in Finance: Oversight Panel Convening</p> <p>Tokenization is reshaping financial infrastructure across many economies. The decisions that are being made now on architecture, standards and governance will determine whether that infrastructure serves developed and emerging and developing economies, or leaves some behind. Ensuring that outcome requires senior public sector voices at the centre of these conversations.</p> <p>This session brings both working groups and the public sector Oversight Panel together for the first time. Working group leads will present their confirmed problem statements on what the evidence shows, and receive feedback and recommendations that working groups will pursue to build the practitioner's guide that will publish at Singapore FinTech Festival in November 2026.</p> <p>About the initiative GFTN is launching Tokenization in Finance: Evidence and Implementation Pathways, a structured, multi-stakeholder initiative convening two working groups drawn from leading financial institutions, infrastructure providers, and market participants to assemble a practitioner-oriented evidence base spanning spanning digital money and payment rails through to tokenised real-world assets, securities, funds, and capital markets infrastructure. At Singapore FinTech Festival in November 2026, the initiative will publish a practitioner guide designed to give financial institutions a structured basis for sequencing their digital asset strategies, and to equip regulators and finance ministries in emerging and developing economies with implementation pathways they can draw on directly.</p> <p>Speakers: Amira Karim, Head of International Public Policy, Payments & Financial Services, Amazon Daisuke Terayama, Deputy Director-General, Head of Fintech Center, Bank of Japan Kevin Cowan, Member of the Board, Central Bank of Chile Dr. Mark Staples, Chief Technology Officer, Digital Finance CRC Peter Kerstens, Advisor, DG FISMA, European Commission Scott Bauguess, VP, International and Regulatory Policy, Coinbase Sunayna Tuteja, Former Chief Innovation Officer, Federal Reserve System Tang Wei, Head of Public Policy, Southeast Asia & Greater China, Stripe Toh Wee Kee, Global Head of Insights, Kinexys by J.P. <p>Thu, Jun 25 4:00pm - 5:30pm</p> <p>Roundtable Room 1, Ground Floor</p>	<p>Beyond De-Risking: Are Stablecoins the Future of Trusted Cross-Border Payment Infrastructure?</p> <p>Cross-border payments remain among the most expensive, slowest, and least accessible financial services globally. Stablecoins have emerged as a working alternative in the corridors underserved by traditional correspondent banking, processing significant volume alongside traditional rails, but questions of trust, reserve integrity, adoption, and systemic risk remain unresolved.</p> <p>As regulatory frameworks mature across jurisdictions, this roundtable will explore the question of whether stablecoins are poised to graduate from a parallel system into genuine cross-border payment infrastructure, and what has to be true about their design, governance, and regulatory treatment for that to happen.</p>

With issuers, exchanges, payment-native banks, institutional settlement networks, and central banks at the table, the conversation will move beyond the technology debate to the harder questions of standards, coexistence, and who bears the risk when settlement infrastructure fails at scale.

Speakers:

Dr. Guerino Ardizzi, Deputy Head of the Analysis & Database Division (Retail Payment Instruments and Services Directorate), Banca d'Italia

Julie Guetta, Product Solutions Lead, Mojaloop Foundation

Matthias Obrecht, Head Supervision New Technologies, Swiss Financial Market Supervisory Authority (FINMA)

Defending the Chain: Financial Crime in a Tokenized System

Blockchain has created a new attack surface - from bridge exploits and mixer obfuscation to cross-chain layering that outpaces the tools regulators were given to fight it. As institutional capital flows onto on-chain infrastructure, the stakes of getting AML, sanctions screening, and transaction monitoring wrong have risen sharply.

This session brings together compliance leads, blockchain analytics practitioners, and regulators for an unfiltered conversation about what financial crime looks like in a tokenized system, what the current toolset can and cannot catch, and where the industry needs to move before the next major exploit exposes the gap.

Participants will examine the specific failure modes: how privacy-enhancing technologies complicate sanctions screening, why cross-chain bridges remain the highest-risk chokepoint in institutional flows, and what travel rule compliance actually looks like when assets move between permissioned and public infrastructure. The discussion will also touch on how intelligence is shared - or not - across institutional networks, and what it takes to make that collaboration work at scale.

The roundtable will also confront a harder structural question - whether the AML frameworks inherited from fiat finance are architecturally capable of governing a system where settlement is atomic, pseudonymous, and borderless by design, and what a purpose-built compliance regime for tokenized markets would need to look like.

Speakers:

Dr. Bernhard Gehra, Managing Director & Senior Partner
New York, BCG

David Rieder, Policy Advisor, Swiss State Secretariat for International Financial (SIF)

Wee Siang Lee, Executive Director (PDS), Head of APAC Compliance, Paxos

Patrick Green, Chief Compliance Officer, Banking Circle

Ariadne Plaitakis, Deputy Director, Regulation, Policy, & Research, Gates Foundation

Moderator:

Daniela Barbosa, General Manager, Decentralized Technologies, Linux Foundation & Executive Director, LF Decentralized Trust

Workshops

<p>Thu, Jun 25 1:00pm - 1:30pm</p> <p>Workshop Room, Level 1</p>	<p>From Float to Yield: How Banks can Integrate Defi and Offer Stablecoin Yield Safely - Powered by Fireblocks</p> <p>Technology and client demand are converging: banks can deploy stablecoin deposits into pooled, KYC'd, RWA-collateralised lending venues today. What's missing is the regulatory scaffolding — the economic model is novel, prudential treatment is undefined, and supervision hasn't caught up.</p> <p>Two implementation choices would create uncontested ground: separate institutional DeFi from retail/permissionless DeFi, and separate it from tokenised repo. From there, regulators should recognise an asymmetric permissioning model (permissioned borrowers, permissionless suppliers) and define the prudential treatment of bank-held positions in tokenised credit venues.</p> <p>Speakers: Dea Markova, Director of Policy, Fireblocks Tim Way, Senior Director, Global Banking Initiatives Lead, Fireblocks Varun Paul, Senior Director, Financial Markets, Fireblocks</p>
<p>Thu, Jun 25 3:00pm - 3:30pm</p> <p>Workshop Room, Level 1</p>	<p>Entering a New Era of Digital Asset Transparency: Global Reporting Requirements for 2026 and Beyond - Powered by Taxbit</p> <p>Crypto-assets, stablecoins, tokenization, and blockchain-based financial infrastructure are rapidly transforming global finance - and regulators are moving just as quickly to establish new transparency and reporting standards. International standard-setting bodies, particularly the OECD, have introduced new global reporting frameworks for digital assets that are already being implemented, or will shortly come into force, across major financial centers and offshore jurisdictions alike, including the UAE, Singapore, Hong Kong, Switzerland, the UK, the EU, the Cayman Islands, BVI, and Seychelles.</p> <p>This session will provide attendees with a practical and internationally focused overview of the emerging compliance landscape, including CARF and related reporting developments, and explore what financial institutions, crypto-asset service providers, payment providers, and intermediaries need to consider to remain compliant in 2026/2027 and beyond.</p> <p>Participants will gain insights into:</p> <ul style="list-style-type: none"> • Key global implementation trends and timelines • Operational and compliance challenges arising from the new frameworks • Practical considerations around data collection, reporting readiness, and governance • How firms are preparing internally for a rapidly evolving international reporting environment <p>Speaker: Lindsey Argalas, Chief Executive Officer, Taxbit</p>
<p>Thu, Jun 25 4:00pm - 4:30pm</p> <p>Workshop Room, Level 1</p>	<p>The Digital Asset Frontier: A Strategic Workshop for Banks - Powered by Anchorage Digital</p> <p>This workshop overview will explore how digital assets and tokenization offer significant potential for banks to create value through new revenue streams, enhanced efficiency, and strengthened competitive positioning. Participants will learn to develop and execute digital asset strategies across key areas, including crypto brokerage and crypto-backed lending, tokenized money, tokenized funds, and tokenized real-world assets.</p> <p>Speakers: Sergio Mello, Global Head of Stablecoin Solutions, Anchorage Digital</p>

Christian Schmid, Senior Partner & Global Leader | Global Banking & CIB, BCG

Boardroom, Ground Floor

[Invite-only] Breakfast Briefing: The Next Digital Frontier: Building the Future of Global Financial Markets - Powered by Bybit

As digital assets, tokenisation and new payment technologies move into the core of global finance, the conversation is shifting from experimentation toward real world commercial adoption and scalable financial infrastructure.

This exclusive Breakfast Briefing, hosted by GFTN and Bybit, will bring together senior policymakers, financial institutions, central banks and industry leaders to discuss how next generation financial infrastructure is reshaping capital markets, payments, settlement and global asset distribution.

The discussion will focus on the practical opportunities emerging from tokenisation, digital assets and programmable financial infrastructure, including more efficient capital formation, improved cross border liquidity, faster settlement models and broader access to investment opportunities globally.

Participants will also explore how public and private sector collaboration can support the development of resilient, trusted and institutionally aligned digital financial ecosystems, while maintaining strong standards around market integrity, consumer confidence and financial stability.

The session is designed as a forward looking exchange among decision makers shaping the future architecture of global financial markets.

If you would like to be part of the discussion, please register your interest here, subject to approval.

[Invite-only] Building Europe's Tokenised Finance Ecosystem: Strategic Roadmap, Sovereignty and Market Opportunities - Powered by Caisse Des Dépôts

As part of its Horizon Numérique 2030 strategic programme, Caisse des Dépôts has launched significant initiatives at European scale, including a €18 billion financing policy by 2030 to support the digital transformation of the economy. Within this broader framework, Caisse des Dépôts has developed a dedicated roadmap for digital assets and tokenised finance, which will be presented during this boardroom around four strategic priorities: financing the European ecosystem, operating trusted tokenised services, supporting market-wide adoption and progressively integrating tokenised assets into the Group's own issuance and

investment activities.

If you would like to be part of the discussion, please register your interest here, subject to approval.
